

Cloud Formations

Powered by Products. Delivered with Expertise.

Many organisations invest heavily in data and AI but struggle to realise value. Programmes run long, platforms become expensive to maintain, and teams are left dependent on specialists to keep things moving.

Cloud Formations exists to change that.

We help organisations unlock data value faster and at lower cost by combining outcome-led consulting with proven product accelerators. Our focus is practical delivery, reduced risk, and building capability that lasts.

Most consultancies rely entirely on people. Most product vendors rely on tools.

We deliberately combine both.

Our consulting services shape strategy, architecture and delivery approach. Our products accelerate execution, reduce risk and improve consistency. Together, they shorten the path from intent to impact.

Why Cloud Formations

Led by 40+ years of data expertise

Microsoft and Databricks Experts

Evergreen

Our Values in Practice

Integrity

We are honest about trade-offs, risks and effort required. No overselling, no surprises

Innovation

We apply new ideas where they genuinely improve outcomes, not for novelty's sake.

Delivery Excellence

We care about what works in practice, not just what looks good on a slide.

One Team

We collaborate closely with clients, building shared ownership and shared success.

Our Products, Purposefully Applied

Our product suite exists to solve common delivery problems we see repeatedly across organisations.

CF.Nimbus

Helps teams understand and de-risk complex legacy estates by making system logic, data flows and dependencies visible.

CF.Cumulus

Accelerates ingestion, transformation and orchestration using a metadata-driven approach that reduces engineering effort and improves consistency.

CF.Stratus

Provides platform assurance, operational resilience and ongoing confidence once solutions are live.

Services That Build Capability, Not Dependency

We work with client teams, not around them. Our services are designed to transfer knowledge, establish clear ownership and operating models and leave teams stronger at the end of the engagement.

Advisory

- Data & AI Strategy
- Technical Strategy
- Data Culture & Adoption
- Data Governance

Delivery

- Data Platform Build
- Data Science
- Data Visualisation

Training

- Data Engineering
- Data Visualisation
- Data Science
- Custom Courses

Outcomes we deliver for our customers

Our approach is designed to solve the problems organisations consistently face with data and AI delivery, not just deliver projects.

Reliable and Low- Risk Delivery

Uplifted Internal Capabilities

Business Value from Data

Trusted and Compliant Data

Lower Cost Data Platforms

Faster Time-to-Insight

Ready to deliver better data outcomes?
