# Expert teams. Practical insight. Measurable impact.

**APEM** Group

At APEM, we combine cutting-edge science with practical expertise to help organisations build and improve infrastructure that's in harmony with the local environment.

From clean water to renewable energy, our integrated, scientific approach empowers better decisions across every stage of a project.

## **Innovative Solutions**

*Forward-thinking science for water and ecosystems.*

- Invasive Non-Native Species (INNS) biosecurity plans and risk management
- Hydroecological modelling
- Remote sensing and aerial surveys
- Water quality assessments
- Nature based solutions and habitat surveys

## **Efficiency of Capital**

*Maximising value through data-led decisions.*

- Route selection and feasibility studies
- Asset risk mapping
- Resource and demand management
- Biodiversity optioneering
- Long-term asset optimisation

## **Sustainability & Regulatory Compliance**

*Balancing progress with environmental responsibility.*

- Regulatory navigation across water and energy sectors
- Environmental permitting and assessments (EIA's)
- Nature-based solutions
- Climate resilience planning
- Sustainability reporting and advisory

**Speak to our experts – let's shape a sustainable future together.**
