Ctrl Hub SaaS Platform

Driving Compliant and Efficient Performance

- January 2025

What is Ctrl Hub?

Ctrl Hub is an easy-to-use software platform for managing safety, compliance and competency across your operation. It generates efficiencies in the field and in the office, reduces risk exposure and optimises data quality.

Ctrl Hub

Our Vision

We aspire to be a globally recognised software platform that provides solutions to organisations of all shapes and sizes to safely and compliantly manage their business operations allowing owners and executives to focus on their daily job.

Our Mission

Our mission is to make sure your people get home safely at the end of each day.

Ctrl Hub

Core Features

Discover how the Ctrl Hub platform can help you and your organisation.

DASHBOARD

Real-time overview of risk and compliance across your entire operation from one screen.

DATA CAPTURE FORMS

Digitise your field data capture forms and workflows, and store against each project, site, person and / or asset

PROJECT GOVERNANCE

Manage projects/sites with full risk and compliance view of people, vehicles and equipment, data from the field and project documents.

COMPETENCE

Manage competence of your people, projects, assets, vehicles and more, tracking qualifications and certifications, and applying requirements matrices.

WORKFORCE

Manage both your directly employed workforce and contractors, tracking their competence, responsibilities and activities
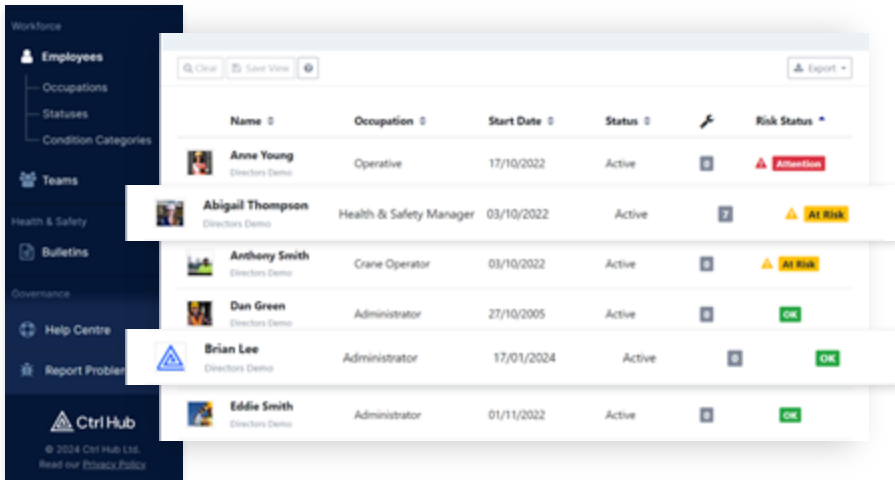

VEHICLES & EQUIPMENT

Manage maintenance, calibration and certifications of vehicles and equipment and assign them to people, teams and/or projects.

CONTRACTORS

Manage your contractors and their compliance position. Allow contractors to access critical project info and capture field data.

Manage People, Vehicles and Equipment

People

- Manage qualifications and certifications dates
- Track expiring and expiry dates
- Assign individual employees to a project/site
- Create teams and assign the team to a project/ site or vehicle
- Upload certificates for storage and easy access

Vehicles and Equipment

- Manage maintenance, calibration, road tax and other certification dates
- Assign vehicles to teams or a project/site
- Assign equipment to a vehicle, a project/site or an employee

Digitise Data Capture Forms

Digitise field and office processes

- Capture data in easy to use digital forms

- Workflows sit behind forms to ensure data is properly reviewed and processed

- Attach photos and videos

- Link forms to people, project/site or tasks for ease of access

- Obtain real-time information from field via form submissions

- Reduce the number of forms with drop-down menus and pre-populated data

- Utilise a vast library of tried and tested templates (e.g. HAVs form)

- Create pdfs to share with external stakeholders

Ctrl Hub

Ctrl Hub

ISO Management

03. Check/Act

02. Do

01. Plan

Actively manage ISO certifications

- Manage compliance of people, vehicle and equipment
- Set up shared folders
- Create digitised data capture forms and workflows
- Define processes for all activities via the platform

Drive continuous improvement :

- Analysing processes and activities
- Managing new opportunities
- Being flexible and agile
- Improving operations and processes

Ctrl Hub

Integration

Collating & managing data from various sources

Integration with:

- CRM Systems
- ERP Systems
- Vehicle Tracking software
- Reporting Tools (eg. Power BI)
- IoT (Internet of Things)
- Mobile communication applications

Key Benefits:

- Automates data transfer and eliminates manual tasks
- Synchronises real-time between systems
- Supports scalability without disrupting existing processes
- Enhances efficiency and productivity

Ctrl Hub

Key Benefits

How can the Ctrl Hub platform benefit your business?

Safety & Compliance

Enhanced peace of mind through real time visibilty, and a demonstration of commitment to the health and wellbeing of your people

Reduced Risk

Greatly reduced exposure to possible legal / investigative costs and reputational damage.

Data Quality

Increase the quality of your data and decision making by digitising data capture and processing of key information.

Efficiency Gains

Digitise, standardise and automate your processes to support scalability, freeing up time for long-term strategic thinking.

Clarity and Certainty

A single source of truth for all your documents, policies and procedures increasing consistency, legitimacy and efficiency.

Seamless Integration

Collate and manage data from multiple sources, eliminating manual tasks and increasing productivity and efficiency.

Return on Investment

Generate savings and efficiencies far beyond the cost of subscription, enhancing your bottom line.
