

PSS Power Group

**Your Power
In Safe Hands**

2025

Introduction

PSS Power offers a range of high voltage electrical services for commercial, industrial, and utility clients. Our team of highly trained and certified professionals is equipped to handle even the most complex projects.

In addition to our core services, we also offer value-added services such as emergency repair services, project management, and energy management solutions. We are committed to staying at the forefront of the industry and continuously investing in the training and development of our team to ensure that we are able to offer the best possible service to our clients.

We are LRQA NERS accredited up to 132kv for all construction scopes.

PSS Power Logistics

We offer a full range of power logistics services in house that include Mewps, pole lorry's, rear mounted Hiab's and much more, to ensure safe delivery or removal of electrical plant or materials for any project.

- Carry out the work as per British Standard 7121 'Safe use of cranes' and LOLER (Lifting Operation & Lifting Equipment Regulations)
- Conduct in person site surveys to assess the planned work and to establish the safest installation methods creating site specific lifting plans
- Select and verify the correct equipment to meet your project requirements
- Project manage the delivery of equipment to site and the lifting operation's

PSS Power Civils

We offer full turnkey delivery for all electrical civils works up to 132kv. We are experienced in complex street works, civil engineering & critical infrastructure private networks.
