Procode

Unlocking the power of energy data and beyond

Procode is a leading software company with a mission to unlock the potential of energy data.

Founded in 2006, Procode is all about innovative technology – our software solutions provide the tools to tap into smart data, transforming businesses and improving customer experience. Our approach allows Gas and Energy Distributors to focus on their core competencies while we take care of the technical complexities.

With a strong commitment to smart energy utilisation, we're shaping a smarter, more energy efficient future, dedicated to scalability and flexibility. Procode is your trusted partner in the drive towards providing more efficient, data-driven software energy solutions.

Making smart portfolios truly smart

Distribution network operators and energy suppliers need flexible, high-performance access to smart meter data. Procode's Intelligent Data Adapter delivers:

Advanced portfolio insights for smarter operational decisions.

Tailored alerting to manage incidents and outages.

Automated business orchestration to simplify complex smart meter interactions.

Full prepayment and credit support to give suppliers a full view of their portfolio.

Built on a secure, cloud-based platform, it ensures compliance with SEC regulations, making it a trusted choice for Critical National Infrastructure.

Accessing the rich stream of smart meter data

With over 30 million smart meters across Britain, access to real-time and historical data is critical for driving energy efficiency and compliance. Procode's Smart Datastream provides a seamless DCC connection, delivering 13 months of historical and real-time smart meter data - helping stakeholders:

Enhance energy efficiency by identifying consumption trends and wasted energy.

Optimise operations with a tailored insight layer, making energy data more actionable.

Meet regulatory obligations with reliable, compliant data access.

Procode's Ecofit supplies housing and renewables data for over 20 million UK households. By analysing 70+ property data points, Ecofit enables:

Targeted property upgrades to improve EPC ratings and avoid non-compliance.

Automated risk assessments for smarter investment and lending decisions.

Support for net-zero goals with granular energy efficiency insights.

Empower better energy management across the UK's housing stock—while ensuring compliance with Ofgem and government targets.
