

Pipe Coil Trailers

All available
for HIRE or
PURCHASE

Hexi Trailer

Transports and dispenses 63-90mm coils of all lengths, up to 500m – or 150m of 125mm.

Cost saving – by using 500m coils over several projects, PE wastage is reduced by up to 20%.

Easy to use – raised central drum dispenses quickly and effortlessly.

180 Pipe Coil Trailer

For the safe transport, storage and dispensing of coiled PE from 40mm to 180mm.

Accommodates a 100 metre coil of 180mm SDR 11/17 PE.

Leading end of PE is strapped to frame, preventing potential 'spring', avoiding injury hazard.

125/160 Pipe Coil Trailer

For the safe transport, storage and dispensing of coiled PE from 40mm up to 160mm.

Accommodates a 100 metre coil of 160mm SDR17 PE or a 150 metre coil of 125mm SDR17 PE.

Capable of being towed by a standard long wheelbase vehicle.

50/90 Pipe Coil Trailer

For the safe transport, storage and dispensing of coiled PE from 40mm up to 125mm.

Accommodates up to a 150 metre coil of 63/75/90mm PE.

Carousel helps PE rotate and avoids kinking.

Mains Replacement

90mm PE
Live Head
for 4" Now
Available

Live Mains Insertion

Similar to dead insertion, by using a gland box the old main is kept live throughout the insertion process and the new PE is gassed up to maintain gas supplies to customers.

Benefits

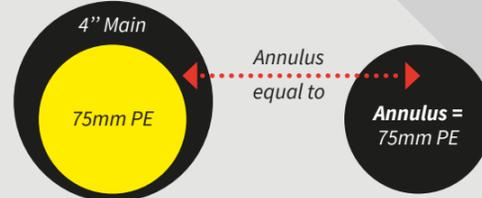

- Minimum traffic disruption – fewer excavations open at any one time
- Customers 'off gas' for minimum time
- One-hit service renewal, only one purge and re-light per customer – no wasted fittings
- Fast replacement technique

Pipe size combinations

A frequently asked question about **Live Mains Insertion** is whether the annular space between the inserted PE and the host main is enough to feed the customers required. In fact, the capacity is more than adequate – as shown below, inserting 75mm PE into a 4" main leaves an annulus equivalent to a 75mm diameter pipe.

The SVI MATRIX gives the capacity of the annulus as the nearest equivalent PE diameter. For more information [scan here](#)

Pipe Handling

125mm Mini Pipe Handler

Attaches to a 1.5-3 tonne digger arm for inserting and manoeuvring PE up to 125mm. Kit includes full range of shells, 63-90mm.

EFFICIENT — fast, lightweight tool with insertion speeds of 10+ metres per minute.

For more information [scan here](#)

180mm Midi Pipe Handler

Designed to fit a 3 tonne digger, the Midi is ideal for inserting coils or sticks of PE up to 180mm. Kit includes full set of shells, 63-125mm.

SAFE — the side loading jaw avoids the need for operatives to work in the trench.

For more information [scan here](#)

The Pipe Handler

The original digger mounted pushing machine for Tier 2 mains, designed to insert and manoeuvre sticks of PE from 250mm up to 900mm. Fits 5-11 tonne digger.

SIMPLE to use — low maintenance, designed for heavy duty pipe-laying environments.

For more information [scan here](#)

Perpetual Pipe Pusher™

A digger attachment used to continuously insert PE from 63mm up to 180mm using hydraulically driven rubberised rollers.

Pushes at speeds of 25 metres per minute.

Once the Perpetual Pipe Pusher is correctly positioned in the trench, the digger arm remains static throughout the insertion.

Pipe Cutting

Rapid Window Cutter

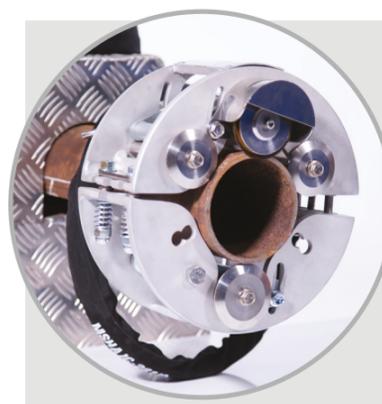

Compact, hand-held cutter for cutting windows in live or dead inserted mains, without risk of damaging inserted PE.

Suitable for all sizes of steel and ductile mains up to 13mm in depth.

Fast cutting times compared with traditional methods.

For more information [scan here](#)

Rapid Rotary Cutter

Circumferential Cutter for steel, ductile & cast iron mains up to 300mm/ 12" in diameter.

Quick cutting time — approx 2 mins per cut on 4"/100mm ductile iron and 4 mins per cut on 4"/100mm steel.

For more information [scan here](#)

Keel Cutter

Circumferential cutting and beveling machine which cuts steel, cast iron, ductile iron and plastic up to 1600mm in diameter.

Fast cutting time — typically 8 minutes to cut a 300mm diameter cast iron pipe.

Available to purchase, hire or as a contract service.

For more information [scan here](#)

PE Pipe Cutter

A circumferential cutter, designed to cut large diameter PE pipe in a single rotation, quickly and safely.

Improved safety — negates hazards associated with chainsaws, circular saws or hacksaws as the cutting device remains enclosed in wall of PE throughout cut.

*Available for hire only

Pipe Cracking

CRACKERJACK™

The fast, safe and affordable way to break out cast iron mains up to 6".

20 tonnes of break-out force cracks a 6" main in minutes.

Controlled break out avoids damaging internal PE.

For more information [scan here](#)

HD Mini MACAW Pipe Cracker™

For safe, effective cracking of small diameter, redundant cast iron gas mains — 4" to 8".

For use on abandoned and inserted mains, without damaging internal PE.

Ideal for use with Live Mains Insertion.

For more information [scan here](#)

MACAW Pipe Cracker™

Designed for large diameter mains, a digger attachment for safe, effective cracking of redundant cast iron — 8 to 24" diameter.

Safer and faster than using a 'podger bar' or sledge hammer.

For use on abandoned and inserted mains, without damaging inserted PE.
