TECHNOLOGY SOLUTIONS

We are Systal.

Global Managed Network, Cloud and Security Transformation Specialists.

We provide tailored technology solutions to enterprise businesses across 3,500+ sites in 93 countries. These solutions help our customers achieve strategic technology transformation and maximise the business value, security and innovative potential of their IT infrastructure.

As global enterprises, our customers generally have very complex and unique requirements. At Systal, we focus on providing a higher quality delivery that complements and empowers their individual needs. Independent and vendor agnostic, we have a global technical community of highly certified and accredited specialists, named and aligned as a natural extension of their own IT teams.

Our mission is to be the world's most trusted technology solutions partner – inspiring, empowering and enabling the innovation and transformation of today and tomorrow.

The Experts Trusted By The Experts

Systal's certified specialists provide tailored solutions based on unique customer needs, and built upon strategic counsel and best-in-class technical capability.

How we Deliver

Professional Solutions

Consultation and assessment solutions to optimise IT infrastructure, support business goals and ensure you get the best possible return on IT investment.

Technology Solutions

From network infrastructure transformation to disaster recovery solutions, we design and implement solutions that ensures your infrastructure runs effectively.

Operational Solutions

Our dedicated team run, monitor and manage all elements of enterprise IT infrastructure across network, cloud, security and digital workplace.

How We Help

Our
Solutions

Covering emerging and traditional technologies, we consult, deploy and integrate complex IT solutions across managed network, cloud, security and digital workplace:

Security Solutions

Network Solutions

Cloud Solutions

Your Trusted Technology Solutions Partner

Network Solutions

Across our 24/7 Global NOCs, we deliver long-term network transformation and managed solutions to the world's largest and most complex enterprises.

Systal manages large, complex networking security for some of the world's largest companies. We can help you to integrate your network with maximum efficiencies into the rest of your business' IT service, delivering long-term network transformation and managed solutions.

Managed Network Solutions

Systal's Managed Network Solutions (MNS) offering is crucial for businesses struggling to balance expense optimisation with greater network agility and performance, whilst seeking higher-quality and secure managed network solutions. Our focus is on meeting the current and emerging needs of our customers by optimising the performance, security, and reliability of their network infrastructure.

TECHNOLOGY SOLUTIONS

Network Infrastructure Transformation

Our Network Infrastructure Transformation solution optimises your network to enhance performance, improve security and enable the adoption of emerging technologies for your business needs and applications. We make the most of what you already have, to upgrade, modernise and optimise your existing infrastructure.

Network Strategy and Optimisation

Our Network Strategy and Optimisation offerings help your network adapt to growing demands. We integrate continuous performance monitoring and periodic evaluations to promptly identify emerging issues and implement the necessary adjustments, ensuring your network will remain robust, secure, and capable of meeting evolving organisational needs.

Network Project Management Office

Our Network Management Project Office is an extension of your network service team to provide a robust and secure solution capable of supporting your growth and technological advancements. It centralises the management and expertise required to maintain a modern, reliable, and secure network infrastructure.

Communication Managed Solutions

Systal's Communication Managed Solutions offering helps you to maximise employee efficiency and effectiveness whilst ensuring the underlying communications infrastructure is robust and secure. We allow your organisation to focus on employee productivity and core business activities while our experts manage the communication systems.

Cloud Solutions

We support you with all aspects of your Cloud journey, integrating Cloud solutions with classic IT to maximise the potential of your cloud infrastructure.

Systal support customers with all aspects of their Cloud journey – whether you have already transitioned your infrastructure, are partway through transformation, or just want to know what migration could mean for you, our experts are here to consult, implement and bring your Cloud strategy to life. We have proven experience with integrating Cloud solutions with classic IT to maximise your investment in the assets you already own and provide service continuity throughout your operation.

TECHNOLOGY SOLUTIONS

Cloud Technical Solutions

Our Cloud Technical Solutions offering provides you with the necessary design, implementation and project solutions required for successful cloud deployment. We confirm the technical specification required to optimise your IT hosting environment, integrating with your classic IT environment where required.

Cloud Assessment and Strategy Consulting

Our Cloud Assessment and Strategy offering provides you with the necessary guidance and technical strategy required for successful cloud adoption. No matter where you are on your cloud journey, we can help you to define your cloud goals and develop a strategic roadmap for increased adoption, improved architecture, migration planning and integration with classic IT environments.

Managed Cloud and Infrastructure Solutions

Our Managed Cloud solutions offering is crucial for any business struggling to balance expense optimisation with greater cloud agility and performance, whilst seeking higher-quality and secure managed cloud solutions. Our focus is on meeting your current and emerging needs by optimising the performance, security, and reliability of your cloud and general application hosting infrastructure.

Cloud Project Management Office

Our Cloud Management Project Office centralises the management and expertise required to maintain a modern, reliable and secure cloud infrastructure. As an extension of your network service team, we provide a robust and secure solution capable of supporting your growth and technological advancements.

Security Solutions

Our end-to-end global capability provides a holistic approach to cyber defence, managing your security risk and protecting you from those with the intent of doing harm.

Systal Security Solutions provide physical and cyber security partner and managed security service provider (MSSP) solutions. We pride ourselves in our ability to provide high value security solutions to ensure our customers are better protected against attack from those with the intent of doing harm. Our end-to-end global capability ensures a holistic approach to physical security and cyber defence across your IT and OT systems.

SYSTAL_
TECHNOLOGY SOLUTIONS

Architecture, Design and Implementation

Our Technology Solutions help you design and implement security techniques, hardware and software for the protection of your data, networks and systems. We provide end-to-end cyber security solutions tailored specifically as a response to the challenges faced by your organisation.

Assessment Security and Strategy Consulting

Our Assessment Security and Strategy Consulting Solutions help you comprehensively assess your organisation's risks and demonstrate that you have the right capabilities in place to achieve your strategic business objectives. We will help you identify the scale of your cyber security risk exposure and design practical action plans to close any gaps.

Cyber Defence and Security Operations

Systal's Operational Solutions offer a comprehensive framework to safeguard your organisation's digital health and resilience. With a dedicated Cyber Defence Centre and continuous Security Operations, our solutions are meticulously designed to proactively monitor, manage, and mitigate potential cyber threats.
