

# Expandable Seal. Safer Execution.

---

**ProStopp™ DS**  
ISOLATION TOOL

ENERGIZED | REVOLUTIONARY | MULTIPLE PIPE IDS | TOTAL LEAK PROTECTION

# Securing what matters.

The ProStopp™ DS isolation tool is a low-pressure double block and bleed technology specifically designed for the gas distribution industry. Using ProStopp™ DS isolation technology results in faster, more reliable operations and eliminates potential leaks in your isolation, even in your toughest crevices and weld seams. Hydraulically activated, this energized seal can accommodate multiple internal pipe diameters with its variable design and increases the likelihood of first-time sealing success, securing what matters.

## ProStopp™ DS ISOLATION TOOL

**REDUCE RISK, TIME, EFFORT AND COST.**

### SPECIFICATIONS:

6 to 12-inch size options\*

For pressurized carbon steel distribution lines

Accommodates schedule 10-60 pipe

Rated to 300 psi (20 bar)

*\*4-inch applications coming soon*

- One seal fits several inner diameters, eliminating additional inventory and configurable parts.
- Built-in chip sweep reduces operational time.
- Compatible with existing valves and fittings.
- Reusable seal and wear parts.
- Ground-operated, reducing trips up and down the ladder.
- Bleeds through housing, resulting in less hardware on the line.

**For the life of your pipeline.**
