

Alexander Reddicks | Web Developer

Summary

I am a junior front-end web developer that enjoys UI/UX design, especially micro-interactions. I tend to make things that I either need or want and then distribute them on their respective platforms since other people might use them as well. I want to work in a team of developers to collaborate with (and learn from) on products that are meaningful or have a positive impact on people's lives.

Interests

- Watching developer talks and listening to podcasts
- Playing video games with friends
- Hiking/Camping when the weather permits
- Gym and/or running every weekday

Education

Arkansas Tech University

(Aug 2010 - present)

- Senior project had my group working with the FBI and the Emergency Management department on campus.

Skills | Tools | Languages

Proficient in:

- Web Design
- Wireframing
- HTML/CSS
- JavaScript
- Polymer
- Firebase
- Github/Bitbucket
- NPM

Used previously:

- Amazon Web Services
- Drupal
- C++/C#
- Java (Android)

Projects

Unhelpful Thinking Habits

My counselor gave me a useful handout, but who's going to carry that around? So I made a small web app for it using Polymer.

Patios-N-Stuff

A demo site, made using Polymer, based off of one I created for a previous job that ended up not being used.

ISAC v1

My Pebble watch face that I created in the visual style of The Division's in-game interfaces

Employment

EveryChannel Marketing

Web Developer (Jan 2016 - Dec 2017)

- I was responsible for finding and modifying Drupal templates for the client's needs.
- Learned to use Amazon Web Services, such as the E3 and S3 servers.

Computer Information Science Department at Arkansas Tech University

Work study (Sep 2012 - Jan 2016)

- I did various work for the department such as filing papers, delivering paperwork, etc. to other departments, assisting with networking, as well as studying for classes.
- I also tutored other students in programming such as C++/C#, HTML/CSS, etc.
