# LOONY: MAKING SATIRE GREAT AGAIN

We started with a simple, almost heretical idea: what if the most effective response to a world gone mad was not to scream, but to laugh? LOONY was born as an act of satirical rebellion, a digital counter narrative to the relentless absurdity of authoritarianism and the cynical grift that came with it. Satire can be more than a joke; it can be a tool for community building, for funding art, and for landing a well aimed punchline at the powerful. But the first joke is just the beginning.

The vision for LOONY extends far beyond reactive satire. Our goal is to build a self sustaining, decentralized ecosystem dedicated to fostering a more informed, resilient, and hilariously engaged global citizenry. This is the roadmap for how we turn a crypto into a lasting movement for positive social impact.

## THE DIAGNOSIS - A SEVERE CASE OF NATIONAL BRAIN-WORMS

### An Abstract for the Chronically Online and Politically Exhausted

The last few years have felt like a cluster bomb attack on our collective consciousness. The political landscape, once a somewhat predictable terrain of policy debates and occasional gaffes, has morphed into a 24/7 reality show written by a committee of chaos monkeys. We live in a relentless news cycle of "crazy" pronouncements, where reality is optional, and the morning's most absurd headline is obsolete by lunchtime. This isn't just political discourse; it's a firehose of disinformation aimed directly at our faces, and our only shield is a flimsy umbrella of "fact checks" that the hose doesn't even notice.

The traditional arbiters of sanity are, to put it mildly, struggling. Our esteemed media outlets, bless their hearts, attempt to cover this political acid trip with the solemnity of a state funeral, their furrowed brows doing little to convey the sheer, pants on head lunacy of it all. Meanwhile, our democratic institutions respond with the speed of a tranquilized sloth. There is a palpable sense of unchecked power, a feeling that the guardrails have been sold for scrap metal.

And then, just when we thought the simulation couldn't glitch any harder, here comes the grift de la grift: the official coinage of the realm of absurdity. We saw the launch of \$TRUMP, the use of decentralized technology, a tool born from ideals of freedom and transparency, to fuel the most centralized, nepotistic grift in modern history.

### **The Final Straw: The Authoritarian Mute Button**

The fallout from the Jimmy Kimmel saga confirmed our suspicions: established media has traded free speech for self preservation. When the establishment was faced with a legitimate critique, they didn't offer a rebuttal; they hit the Authoritarian Mute Button. This wasn't an accident it was a strategic, three part harmony of lawyers, platform purges, and financial pressure designed to surgically remove witty critics.

This heavy handedness doesn't just suggest the need for a solution; it's a five alarm siren proving that if you want to crack a joke without getting cracked down on, you need a censorship resistant platform where wit can thrive and the mute button is safely out of reach.

This is not a political problem to be solved by another election cycle alone. This is a cultural contagion. It is a narrative crisis. And you cannot fight a bad story with a boring one. You need a better, funnier, and far more ridiculous story. You need to get a little loony.

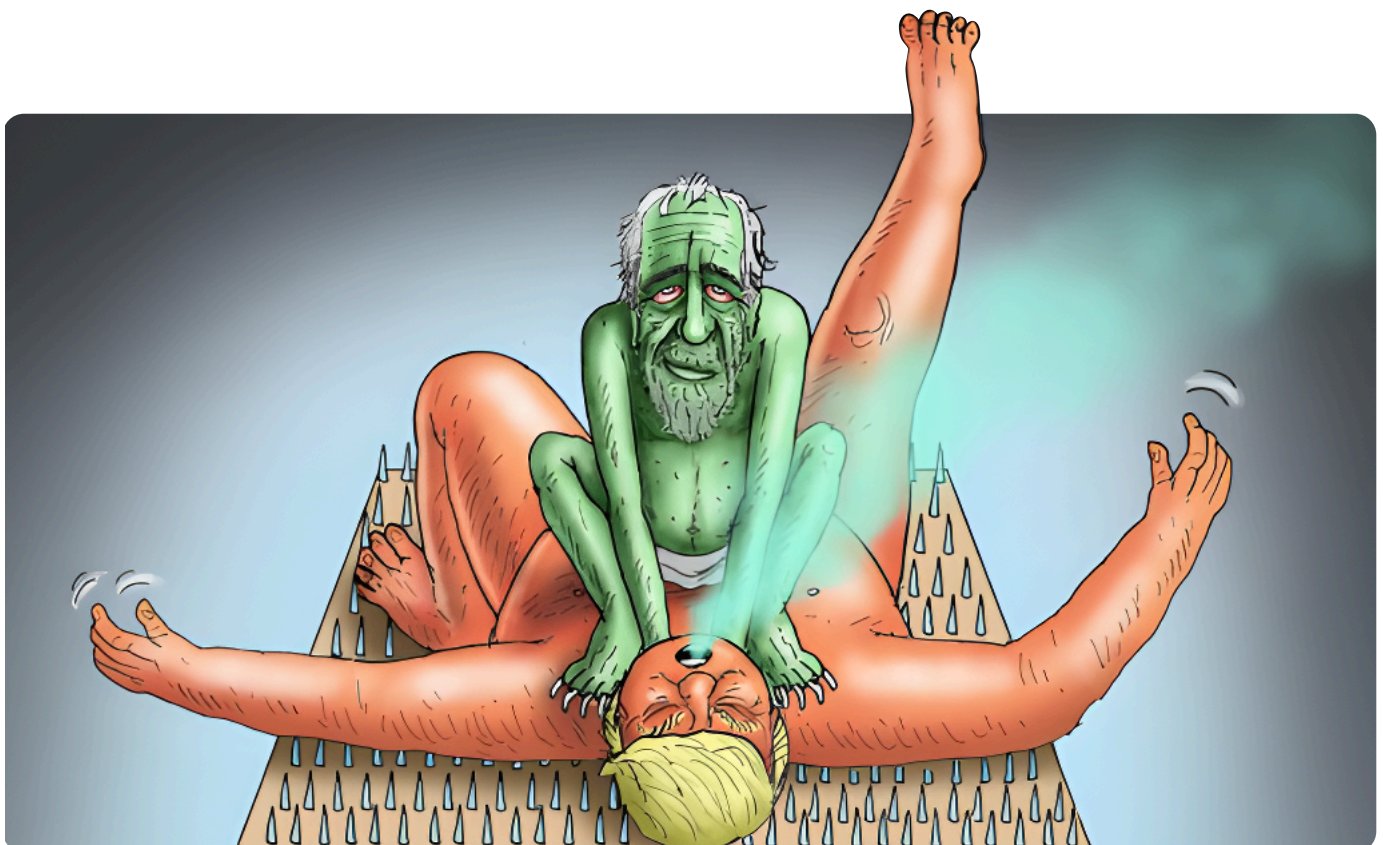

## THE PERFECT STORM: A NARRATIVE RIPE FOR SATIRE

The political winds are clearly shifting, proving that the public is more than ready for our prescription.

- The Epstein Saga continues to reveal "chinks in the armor" of the established narrative, exposing deep seated corruption and hypocrisy. The public is hungry for truth, even if it's served with a dose of absurdity.
- We've seen mainstream shows like South Park unabashedly mocking Donald Trump's perceived moral and political failings.
- Even establishment politicians like California Governor Gavin Newsom have entered the fray, strategically trolling political opponents and proving that satire is becoming the most effective form of political combat.

We are not inventing a market; we are capturing an existing zeitgeist. Across platforms, a massive, pre-existing audience of politically minded content creators aligns perfectly with the LOONY brand.

## THE PRESCRIPTION - A SANITY-RESTORING SATIRE TOKEN (LOONY)

### Introducing LOONY: The Official Unofficial Currency of the Rational

LOONY is not an investment strategy. It is an act of collective, satirical rebellion. It is a community driven crypto project that answers the firehose of crazy with a well aimed water pistol of intelligent satire. We are taking the tools of our time, Blockchain, Web3 Technology, and Artificial Intelligence, to creatively challenge the rising tide of authoritarianism and amplify voices that are witty, progressive, and not trying to sell you a gold plated sneaker. Our mission is to transform outrage into something humorous, shareable, and genuinely impactful.

Our identity is rooted in a simple, yet powerful principle: Satire, Not Slander. We don't punch down. We don't engage in hateful rhetoric. We are the court jesters in the kingdom of the mad, armed with sharp, layered commentary designed to make you laugh, and then make you think.

### We operate on four core beliefs:

#### 1. The Power of Intelligent Satire:

Laughter is a Trojan horse. It bypasses the brain's defensive political walls and delivers a payload of critical thought directly to the hippocampus (we think, we're not neuroscientists). By crafting humor that is both accessible and insightful, we can engage a wider audience than any lecture ever could.

#### 2. Decoupling from the Digital Overlords:

The age of relying on platforms run by a handful of unelected tech CEOs to host our political jokes is over. When free speech requires permission from a centralized organization (or their legal department), it ceases to be free. LOONY leverages Web3 to ensure our entire satirical ecosystem is decoupled from Big Tech, guaranteeing our dissent can't be deplatformed,

demonetized, or quietly scrubbed from history.

### 3. Poking Fun for Posterity:

Traditional outlets call it "news," but we know the internet's most potent tradition is the collective art of the decentralized political roast. These instant, shared satirical narratives are more powerful than any carefully worded official statement, mostly because they're funnier. LOONY takes this high velocity wit and gives it a Web3 backbone, creating an evolving, community shaped mythology where current political events are instantly immortalized as absurd folklore. Simply put, we aren't just commenting on the daily absurdity; we're crafting a living, breathing ledger of digital dissent a cosmic joke that's verifiable, decentralized, and utterly impossible to delete.

### 4. Community-Powered Resistance:

This is not a top down campaign. The narrative, the projects, and the direction are shaped by the LOONY community. The audience becomes the author. The consumer becomes the creator. We are building a decentralized network of satirists, artists, comedians, and concerned citizens who are tired of screaming into the void and are ready to laugh into it instead.

## THE TREATMENT PLAN - THE LOONYVERSE DAO & ITS UTILITIES

### How We Weaponize Laughter: The LOONY Token Utility

LOONY is the fuel for a new kind of action: The Decentralized Autonomous Organization for the Organization of Decidedly Amusing Opposition (The DAO, for short). Holding LOONY is your stake in the movement. The community controlled treasury is a war chest dedicated to fighting absurdity with art, creativity, and direct support.

- **Fund Satirical Projects & Creators:**

The DAO will act as a decentralized production studio. The community directly funds the internet's most creative minds animators, writers, video creators, musicians, and artists to produce high quality, satirical content that hijacks the narrative. This infrastructure provides artists and creators with both the financial runway and the uncensorable platform necessary to produce their sharpest, most fearless work. Imagine a weekly series that deconstructs the latest political lies, or a scathing satirical series about the Epstein Files that is too funny to ignore. Creators can do what they do best: tell the truth, funnily.

- **Decentralized Content Engine:**

A portion of our token allocation is dedicated to signing influencers to partnerships. We will identify and engage these creators by offering them a way to monetize their existing work and join a larger, funded movement. We will provide them with creative guidance from our team, funding from the DAO treasury, and a unified platform to amplify their reach, sourcing the decentralized content engine for the LOONY brand.

- **Support Organizations Promoting Democratic Ideals:**

This is where the joke gets serious. The DAO will allocate a portion of its treasury to make direct, transparent donations to vetted, on the ground organizations that are fighting the real world battles for democratic principles. We will support groups combating disinformation and holding power accountable. This is our direct counter narrative to grift: using the power of Web3 to actively strengthen the institutions that authoritarians seek to weaken.

## **THE VISION: ACCELERATING THE MOVE TO WEB3**

The digital economy is experiencing a Crisis of Relevance where traditional centralized institutions fail to respond to chaos with the necessary speed and relevance. LOONY is the mechanism to bridge this gap, accelerating the revolutionary shift from Web2 to Web3.

The current system of Traditional Curation relies on centralized, opaque algorithms controlled by tech companies, where value is measured by slow, filtered algorithmic engagement metrics like likes and shares. This setup is highly susceptible to centralized gatekeeping and only serves to capture user data for ad revenue. LOONY fundamentally shifts this model by moving to a Web3 Market. Our curation method is decentralized, on chain trading, where the token's price action acts as the Value Indicator a liquid, real time index of attention and Capital Flow. This system is instantaneous and transparent, providing an immediate reflection of virality and trend initiation. For investors, this shift means moving beyond capturing ad revenue toward financializing cultural attention and monetizing predictive capital on the future of social trends.

LOONY is not just a cryptocurrency; it is an internet native financial instrument that efficiently monetizes and organizes the flow of digital attention. Its price action serves as a transparent, liquid index of current cultural virality, making it a cutting edge mechanism for capturing and betting on the future of social trends.

The goal of LOONY is not to become the next Bitcoin. The goal is to build a resilient, hilarious, and effective counter culture that can chip away at the foundations of authoritarianism. We are directly challenging the cynical use of crypto for grift with a project focused on positive social impact.

The world has gone loony. It's time to stop pretending it hasn't. It's time to embrace the absurdity, harness its power, and turn it back on its creators.

Join us.

## CORE TOKEN FEATURES & SMART CONTRACT REQUIREMENTS

The LOONY token smart contract is engineered to be robust, secure, and to embody the project's core functionalities. It will include:

- **Basic ERC-20 Token Features:**

Standard functionalities such as `transfer()`, `transferFrom()`, `approve()`, `balanceOf()`, and `totalSupply()`, ensuring wide compatibility with wallets, exchanges, and dApps.

- **Burnable – Reduces Total Supply:**

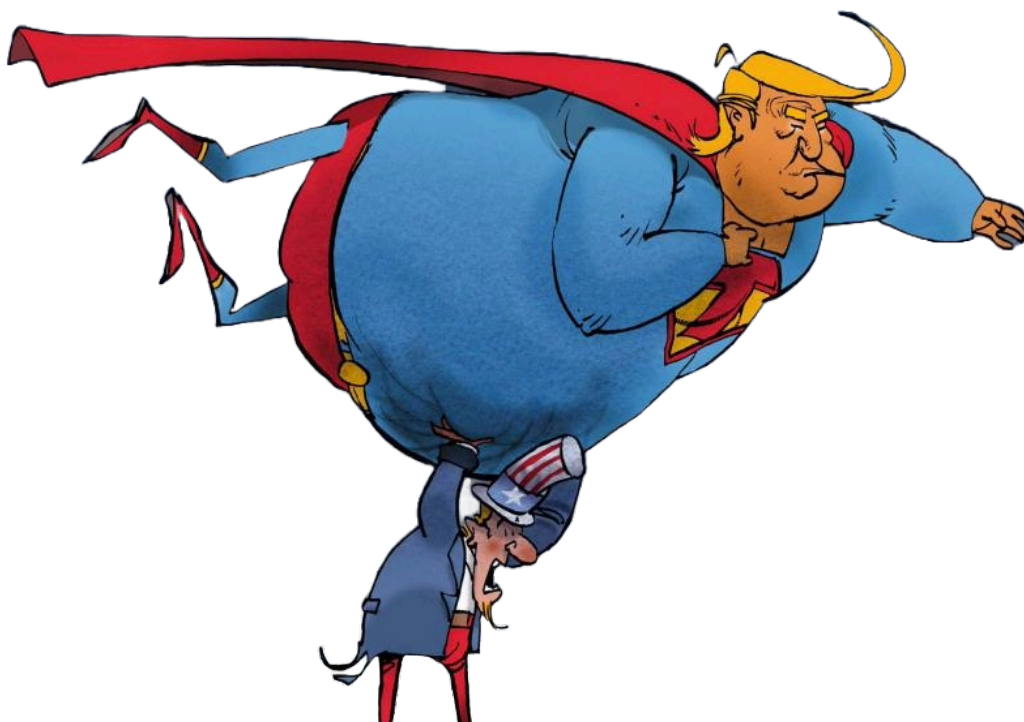

- The smart contract will include functions to permanently remove tokens from circulation, contributing to a deflationary supply over time.

- **Taxable on Buy/Sell Funds Community Treasury & Donation Wallet:**

- A fixed tax will be applied to every buy and sell transaction, automatically funding designated project wallets.

- **Ownership Transferable Avoid Centralized Control Risks:**

- The contract will allow for the secure transfer of ownership, laying the groundwork for future decentralized governance.

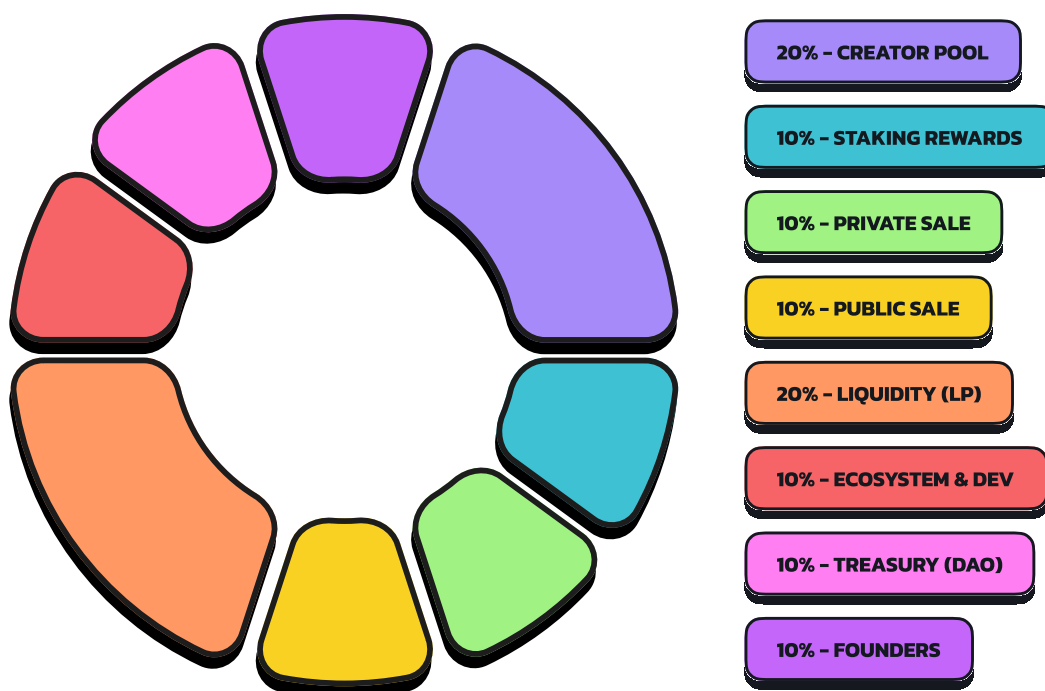

# TOKEN SUPPLY & DISTRIBUTION STRATEGY

The allocation of the total LOONY supply is strategically designed to foster robust liquidity, sustainable development, and vibrant community growth.

**Total Fixed Supply:** 1,000,000,000 (1 Billion) LOONY built on Base Blockchain.

CATEGORY	ALLOCATION (%)	TOKENS (LOONY)
Creator Pool	20%	200 million
Staking Rewards	10%	100 million
Private Sale	10%	100 million
Public Sale	10%	100 million
Liquidity (LP)	20%	200 million
Ecosystem & Dev	10%	100 million
Treasury (DAO)	10%	100 million
Founder & Team	10%	100 million
<b>Total</b>	<b>100%</b>	<b>1 billion</b>

## FOUNDERS' ALLOCATION & VESTING

The founders' allocation is subject to a structured vesting plan to ensure long-term commitment and alignment with the project's success.

### Vesting Schedule:

- **TGE Unlock:** 0% TGE
- **Cliff:** 6-month cliff
- **Vesting:** 24-month linear vesting.

## PRIVATE SALE VESTING

### Vesting Schedule:

- **TGE Unlock:** 5% TGE
- **Cliff:** 6-month cliff
- **Vesting:** 18-month linear vesting

## PUBLIC SALE VESTING

### Vesting Schedule:

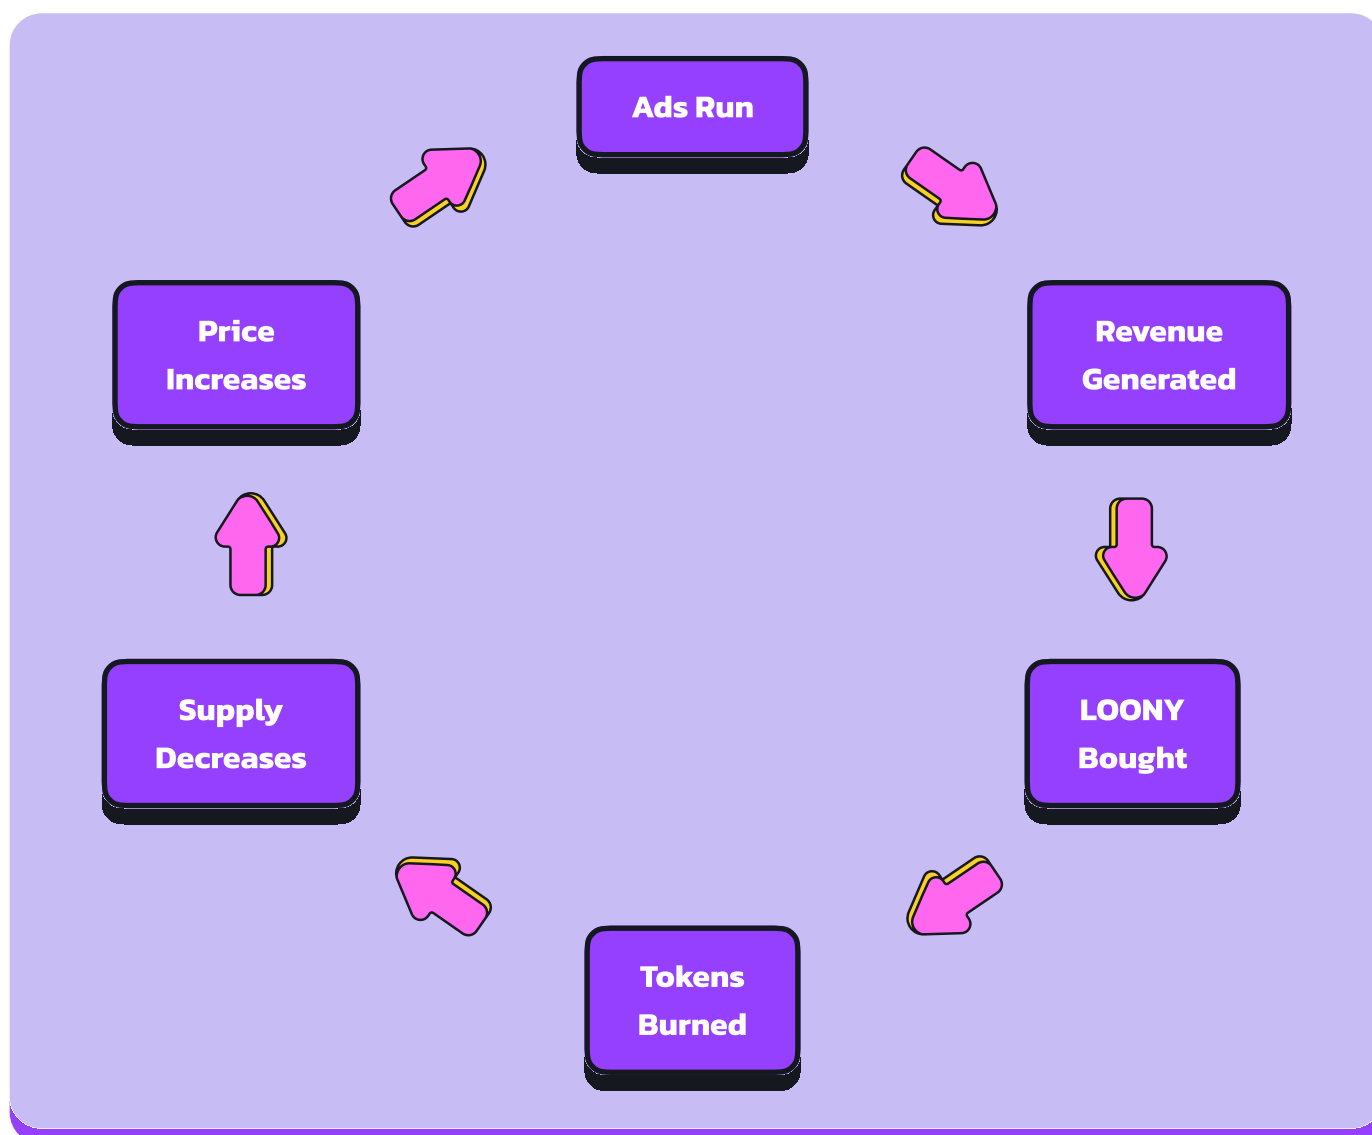

- **TGE Unlock:** 10% TGE
- **Cliff:** 1-month cliff
- **Vesting:** 9-month linear vesting

## **MONETIZING ATTENTION: THE WEB2 AD REVENUE BURN LOOP**

The LOONY project is fundamentally designed to accelerate the revolutionary shift from Web2 to Web3, specifically by challenging the centralized monetization models of traditional platforms. In the Web2 model, ad revenue generated by viral user content is captured centrally, failing to reward the creators or the community driving the cultural attention.

We are implementing a core tokenomic mechanism the Ad Revenue Burn Loop that flips this script entirely. This strategy leverages the massive volume of attention (and subsequent ad revenue) generated by our content on platforms like YouTube, Instagram, and TikTok to create perpetual, external buy pressure on the LOONY token.

## Mechanism: The Buy-and-Burn Engine

Once LOONY is deployed on exchanges, we activate a specific economic function:

- A percentage of all Web2 advertising revenue generated across our different social and distribution platforms (LOONY.Art and others) will be dedicated to buying LOONY from the open market.
- The purchased LOONY tokens will then be burned forever, removing them permanently from the total supply.

This creates a powerful, self reinforcing loop: **Ads Run** → **Revenue Generated**  
→ **LOONY Bought** → **Tokens Burned** → **Supply Decreases.**

## Investor Benefits and Economic Impact

This mechanism is highly beneficial for token holders, transforming cultural virality into direct financial utility:

### 1. Guaranteed Buy Pressure:

Every view, click, and eyeball on our viral content helps fuel market demand. The bigger the content ecosystem grows, the stronger the engine behind LOONY's market value becomes.

### 2. Deflationary Scarcity:

The systematic, revenue driven buy and burn mechanism continuously reduces the circulating supply of LOONY. This creates scarcity, rewarding long-term holders and combating market dilution.

### 3. Financializing Attention:

This structure allows investors to monetize predictive capital on social trends. The LOONY token's price action serves as a liquid index that efficiently organizes and monetizes the flow of digital attention. The buy and burn feature ensures that this cultural attention directly translates into token value.

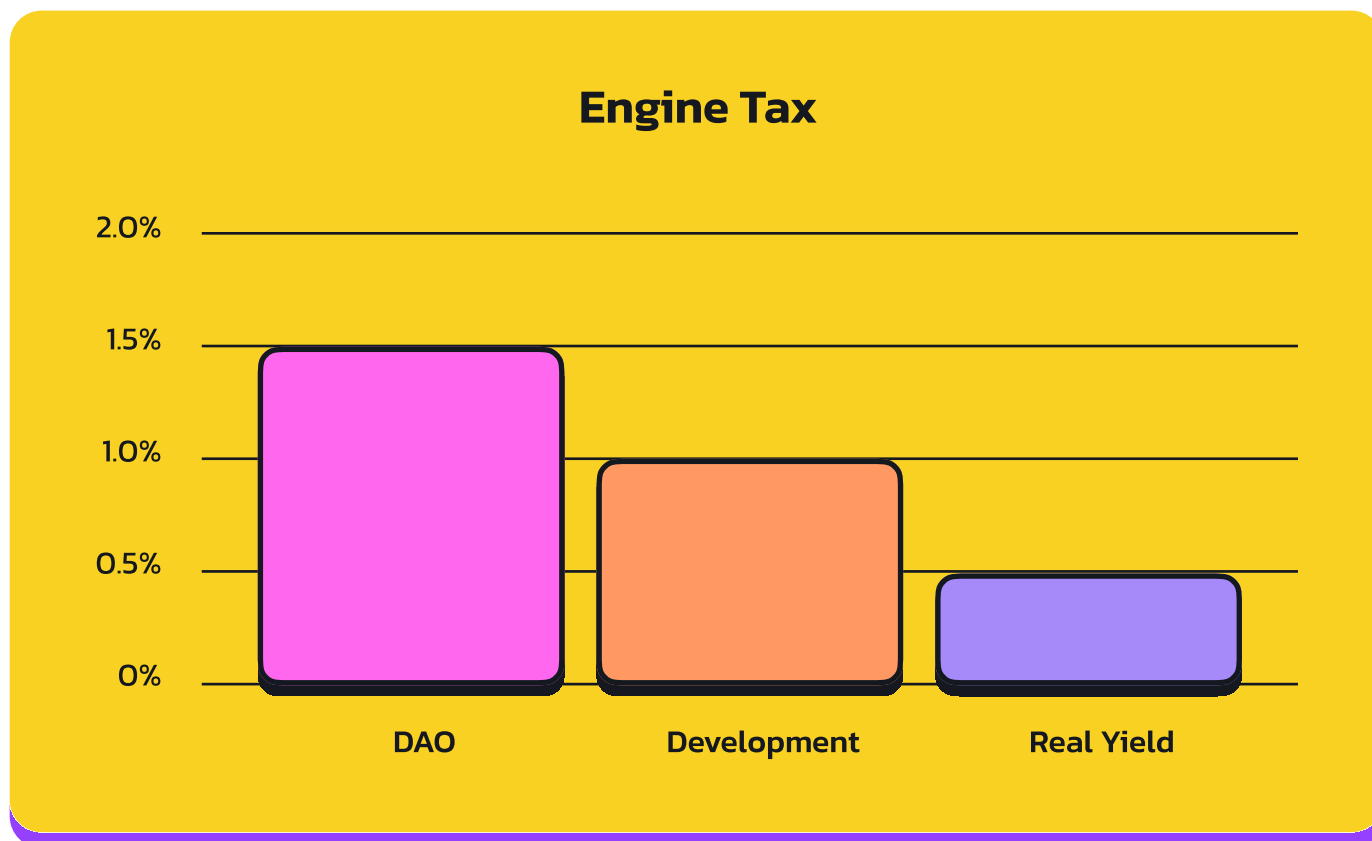

By integrating Web2 revenue into a Web3 deflationary model, LOONY builds a resilient, self sustaining ecosystem dedicated to fighting absurdity with art and

## THE 3.0% "ENGINE TAX" & VALUE ACCRUAL

LOONY utilizes protocol-level capture to ensure value flows back to the ecosystem.

- **1.5% - Art & Charity Fund (DAO):** Directly funds the AI Satire Lab and transparent on-chain donations to pro-democracy organizations.
- **1.0% - Development & Operations (Development):** Covers infrastructure maintenance and AI tool licensing.
- **0.5% - Staking (Real Yield):** Redistributed to stakers, providing yield backed by protocol activity.

## STAKING DURATIONS & TIERS

These tiers remain aligned with the satirical branding and provide high incentives for long-term "Sanity".

TIER NAME	DURATION	APY	UTILITY
The Short Fuse	30 Days	10%	Basic access to the Loonyverse.
The Institutionalized	90 Days	15%	Standard DAO voting weight.
Straightjacket Lock	180 Days	20%	1.5x Multiplier on DAO voting power.
The Asylum Founder	365 Days	25%	2x DAO Voting Multiplier + Exclusive NFTs.

**Early Withdrawal Penalty:** Exiting a vault triggers a 25% penalty on all Tiers. 50% of this is permanently burned (deflationary pressure), and 50% is redistributed to remaining stakers.

## DECENTRALIZING ART: THE LOONY NFT STRATEGY

The LOONY content engine generates a continuous stream of timely, politically charged digital art, a perfect asset class for the NFT economy. The strategic intent behind the LOONY NFT initiative is to tokenize ownership of this satire, creating a new revenue stream, fostering deeper community engagement, and establishing a core utility for the LOONY token. The marketplace will feature a curated selection of unique content assets, including limited edition Satirical Digital Art collections reacting to political events, tokenized versions of Global Editorial Cartoons, and NFTs granting membership access to exclusive content (for example Live event passes). This creates an immediate, high value monetization path for the creative output funded by the DAO treasury.

To maximize financial utility and maintain brand integrity, LOONY will establish a proprietary niche NFT marketplace rather than relying on existing universal platforms. This custom platform is essential for mandating LOONY as the primary currency for all transactions, thereby creating consistent, sustained demand and utility for the token. Furthermore, the proprietary platform is crucial for the seamless integration of key tokenomics, allowing the project to enforce creator royalties, rewarding artists, and ensuring that transaction revenues feed directly into the Ad Revenue Burn Loop. This strategy positions LOONY to dominate a niche market that is culturally relevant while creating a self sustaining financial ecosystem fueled by the value of satirical content.

## LIQUIDITY STRATEGY

A robust liquidity strategy is vital for token stability and accessibility, facilitating smooth trading for all participants.

- **Initial Liquidity:** Initial liquidity will be provided on a leading DEX on the Base Blockchain, using a portion of the total supply paired with ETH or USDC.
- **LP Token Locking:** A significant portion of the Liquidity Provider (LP) tokens will be locked for a substantial period (e.g., 1-2 years or more). This action demonstrates the team's long-term commitment and helps prevent sudden liquidity removals.
- **Community Incentives:** The project will explore incentives for users to provide liquidity, such as farming rewards or airdrops, if deemed necessary post-launch to deepen liquidity.

## UTILITY AND USE CASES

The LOONY token is the heart of the movement, providing tangible utility and empowering its community:

- **Fund & Support Satirical Creators & Projects:** A significant portion of the community fund, augmented by tax revenues, will be used to fund and support independent satirical artists, and content producers aligned with LOONY's mission.

- **Fund Charitable Donations**      The LOONY Treasury will allocate a percentage of all ecosystem revenue; including transaction taxes and Web2 ad revenue to a transparent, on chain charitable funds. We focus on vetted organizations combating disinformation, protecting voting rights, and ensuring executive accountability.
- **Access to Exclusive Perks & Token Governance:**      Holding LOONY may grant access to exclusive content, private community channels, early access to new initiatives, and the ultimate power to participate in future token governance decisions, directly shaping the project's direction and evolution.
- **NFTs**      LOONY's NFT marketplace serves as a critical utility layer by tokenizing the intellectual property of the Loonyverse, converting timely satirical content into unique, tradable digital assets. This mechanism drives direct demand for the LOONY utility token by requiring it for transactions within the proprietary marketplace and creates a novel revenue stream that is perpetually recycled back into the ecosystem via the Ad Revenue Burn Loop.

# THE LOONY ECONOMIC ENGINE: RESILIENCE BY DESIGN

## 1. The Attention Engine: Converting Viral Momentum into Token Scarcity

The primary "moat" of the LOONY ecosystem is its ability to bridge the gap between Web2 cultural dominance and Web3 value accrual. While traditional projects rely on internal circular logic, LOONY extracts value from the multi-billion dollar global ad economy.

- **Ad-Revenue Buyback & Burn:** Programmatically, 20% of net revenue generated from YouTube, TikTok, and Instagram is converted into LOONY via market buybacks and permanently burned.
- **Non-Inflationary Yield:** Unlike "farm-and-dump" protocols that fail when new buyers stop arriving, LOONY is fueled by advertising revenue and Licensing revenue. This creates a permanent buy-pressure that remains active even during stagnant or bearish crypto market conditions.

## 2. Anti-Fragility: Profiting from Volatility, Rewarding Conviction

In the "Loonyverse," market panic is not a threat it is a deflationary catalyst. We utilize a sophisticated system of "Sticks" and "Carrots" to protect the token floor and reward the most loyal participants.

- **The "Paper Hand" Stick:** Early withdrawal from staking vaults triggers a 25% principal penalty.
- **The Deflationary Rebound:** 50% of all penalties are immediately burned, while the remaining 50% is redistributed to the staking pool.
- **The Result:** When "weak hands" exit during a market dip, the total supply drops and the yield for "Asylum Founders" (long-term stakers) increases automatically. The protocol literally becomes more valuable as short-term speculators leave.

### 3. The Attention Hedge: A Crypto Asset Backed by Cultural Utility

Most crypto projects fail because they exist in a DeFi Vacuum. LOONY succeeds because it is an Attention Hedge, a financial instrument that thrives on the one thing that never disappears: political absurdity.

- **Non-Correlated Growth:** Political satire is not tied to the price of Bitcoin. People watch, laugh, and share regardless of global market trends, ensuring a steady stream of revenue to the burn engine.
- **Operational Efficiency:** Leveraging cutting edge AI technologies, we produce Hollywood-quality content at a fraction of traditional costs. This ensures a massive operational runway and a superior ROI on every dollar spent.
- **Uncensorable Funding:** By bypassing Web2 gatekeepers and corporate advertisers through our DAO-led treasury, we ensure the "Satire Rebellion" is funded directly by the community that values it.

### 4. Security & Institutional Integrity

Stability is built on a foundation of transparency and rigorous security standards.

- **Compliance & Identity:** All participants in LOONY ecosystem need to complete KYC/AML verification.
- **Treasury Protection:** All ecosystem and DAO funds are secured via Safe Multi-sig wallets, requiring consensus from founders and advisors to execute transfers.
- **Audited Infrastructure:** LOONY smart contracts are professionally audited to ensure the integrity of the tax, burn, and staking logic, providing a secure environment for long-term holders.

## TOTAL FUNDRAISING GOAL

The fundraising strategy is structured across private and public sale rounds to ensure broad participation and fair valuation.

FUNDRAISING ROUND	TOKEN ALLOCATION	TARGET RAISE	TOKEN CAPITAL RAISE	STRATEGIC PURPOSE
Pre Sale	100,000,000 (10%)	\$0.0200	\$2,000,000	Onboard strategic VCs and high-net-worth partners.
Public Round 1	40,000,000 (4%)	\$0.0240	\$960,000	Reward early waitlist and community members.
Public Round 2	35,000,000 (3.5%)	\$0.0280	\$980,000	Facilitate general retail participation
Public Round 3	25,000,000 (2.5%)	\$0.0320	\$800,000	Final DEX/CEX listing price and liquidity.
<b>Total</b>	<b>200,000,000 (20%)</b>	—	<b>\$4,740,000</b>	Fueling content, operations, and growth

- Total Pre Sale Tokens: 100 million
- Total Public Sale Tokens: 100 million
- Total Target Raise: = **\$4,740,000**

## ROADMAP

The LOONY Project will unfold in strategic phases, building from core functionality to full decentralization and expanded impact.

### PHASE 1 (Q2 - 2026)

### FOUNDATION

- Deployment on Base Blockchain.
- Establishment of initial liquidity on a leading DEX.
- Initiate private and public sale rounds.
- Development of website and social media presence.
- Entering marketing and partnership initiatives.

### PHASE 2 (Q3 - 2026)

### BUILDING MOMENTUM

- Onboarding satirical creators and artists through grant programs.
- Enhanced community engagement and satirical content creation.
- Rollout of exclusive perks for LOONY holders.
- Expansion of marketing and partnership initiatives to amplify the message.

### PHASE 3 (Q4 - 2026)

### EXPANDING REACH

- Implementation of DAO features for key project parameters and treasury management.
- Exploration of cross chain compatibility and broader Web3 integrations to expand reach.
- Continuous evolution of satirical campaigns, adapting to current cultural moments.
- Expanding community leadership and outreach efforts globally.

## **DISCLAIMER**

This White Paper is provided by LC Administrative LLC (referred to as "we," "us," or "our") solely for general information regarding the proposed LOONY ecosystem. This document outlines the project's technical specifications, objectives, overall vision, and its unique strategy for funding satirical content.

### **No Offer, No Advice, and Essential Warnings**

This White Paper is not an offer, solicitation, or recommendation to buy or sell any tokens, securities, or financial products. It is not financial, legal, tax, or investment advice. Any token described herein (the "Token") is not intended to be a security. We urge all prospective participants to perform their own due diligence and consult qualified professional advisors before taking any action. If any sale or distribution of Tokens takes place, it will be governed exclusively by separate, definitive legal documentation, which will supersede this White Paper in the event of any conflict.

### **Project Scope, Forward-Looking Statements, and Eligibility**

The LOONY tokens are intended strictly for utility within the project's ecosystem, primarily for community governance, participation in satirical activities, and as a tool for digital protest. Tokens do not represent equity, debt, voting rights, profit rights, or any other ownership interests in our company or its affiliates. While this document includes plans, projections, and future expectations such as the Roadmap and the Ad Revenue Burn Loop these are forward looking statements based on current management expectations. Actual results may differ materially due to unforeseen risks and uncertainties, and we do not promise to update these statements.

Access to Tokens or participation in the ecosystem may be limited or prohibited based on jurisdiction. Eligibility requirements and necessary KYC/AML checks will be defined in definitive terms. Persons in sanctioned or restricted jurisdictions may not participate.

## **Inherent Risks and Limitation of Liability**

Engaging with the LOONY ecosystem involves multiple inherent risks, including technology risks (experimental blockchain, smart contract vulnerabilities, potential failure, or attack), regulatory risks (evolving and uncertain laws), market risks (extreme volatility, illiquidity, or total loss of value), and operational risks. The protocol, code, and any Token are provided “as is” and “as available,” without any warranties.

To the maximum extent permitted by law, we and our affiliates are not liable for indirect or consequential losses (including lost profits, data, or goodwill) arising from or related to this White Paper, the ecosystem, or any Token. Our total liability will not exceed the greater of USD \$100 or the amount you paid directly to us for Tokens under definitive terms (if any). This White Paper may be changed or replaced at any time without notice, and we are not obligated to update it.

**Governing Law and Dispute Resolution:** This Disclaimer is governed by the laws of the State of Delaware. Any disputes will be resolved by binding arbitration in Denver, Colorado under JAMS rules. We reserve the right to seek injunctive relief in court to protect intellectual property or confidential information.
