BIG NEWS!
Schools are closed because of a germ called coronavirus.
Coronavirus is a very sneaky germ, but we can outsmart it. If we all stay home, coronavirus has trouble finding people. That is why all the schools closed.
Grown-ups are working very hard to stop coronavirus and keep everyone safe.
Even as a kid, I can do an important job, too. I can be a GERM BUSTER!
When you clean your hands with soap and water, coronavirus gets killed and washed away down the drain.
I also call and video chat with family that I cannot see right now. I think it makes them happy to say hello through the phone.
Coronavirus can hide in messy places. When everything is put away and washed, the germs go away, too. I am extra careful to clean the screen on my tablet, since I use it a lot.
It is very important to give your body the nutrients it needs. This helps your cells fight back against coronavirus. I try to eat fruits and vegetables every day.
I also drink a glass of water with every meal. This makes my body strong, so the germs can't get in.
For now, I am happy I can help to do my part. Together we can stop coronavirus in its tracks. Go Germ Busters!
