

TheForce.Trade

A data aggregator specially designed for DeFi and NFT

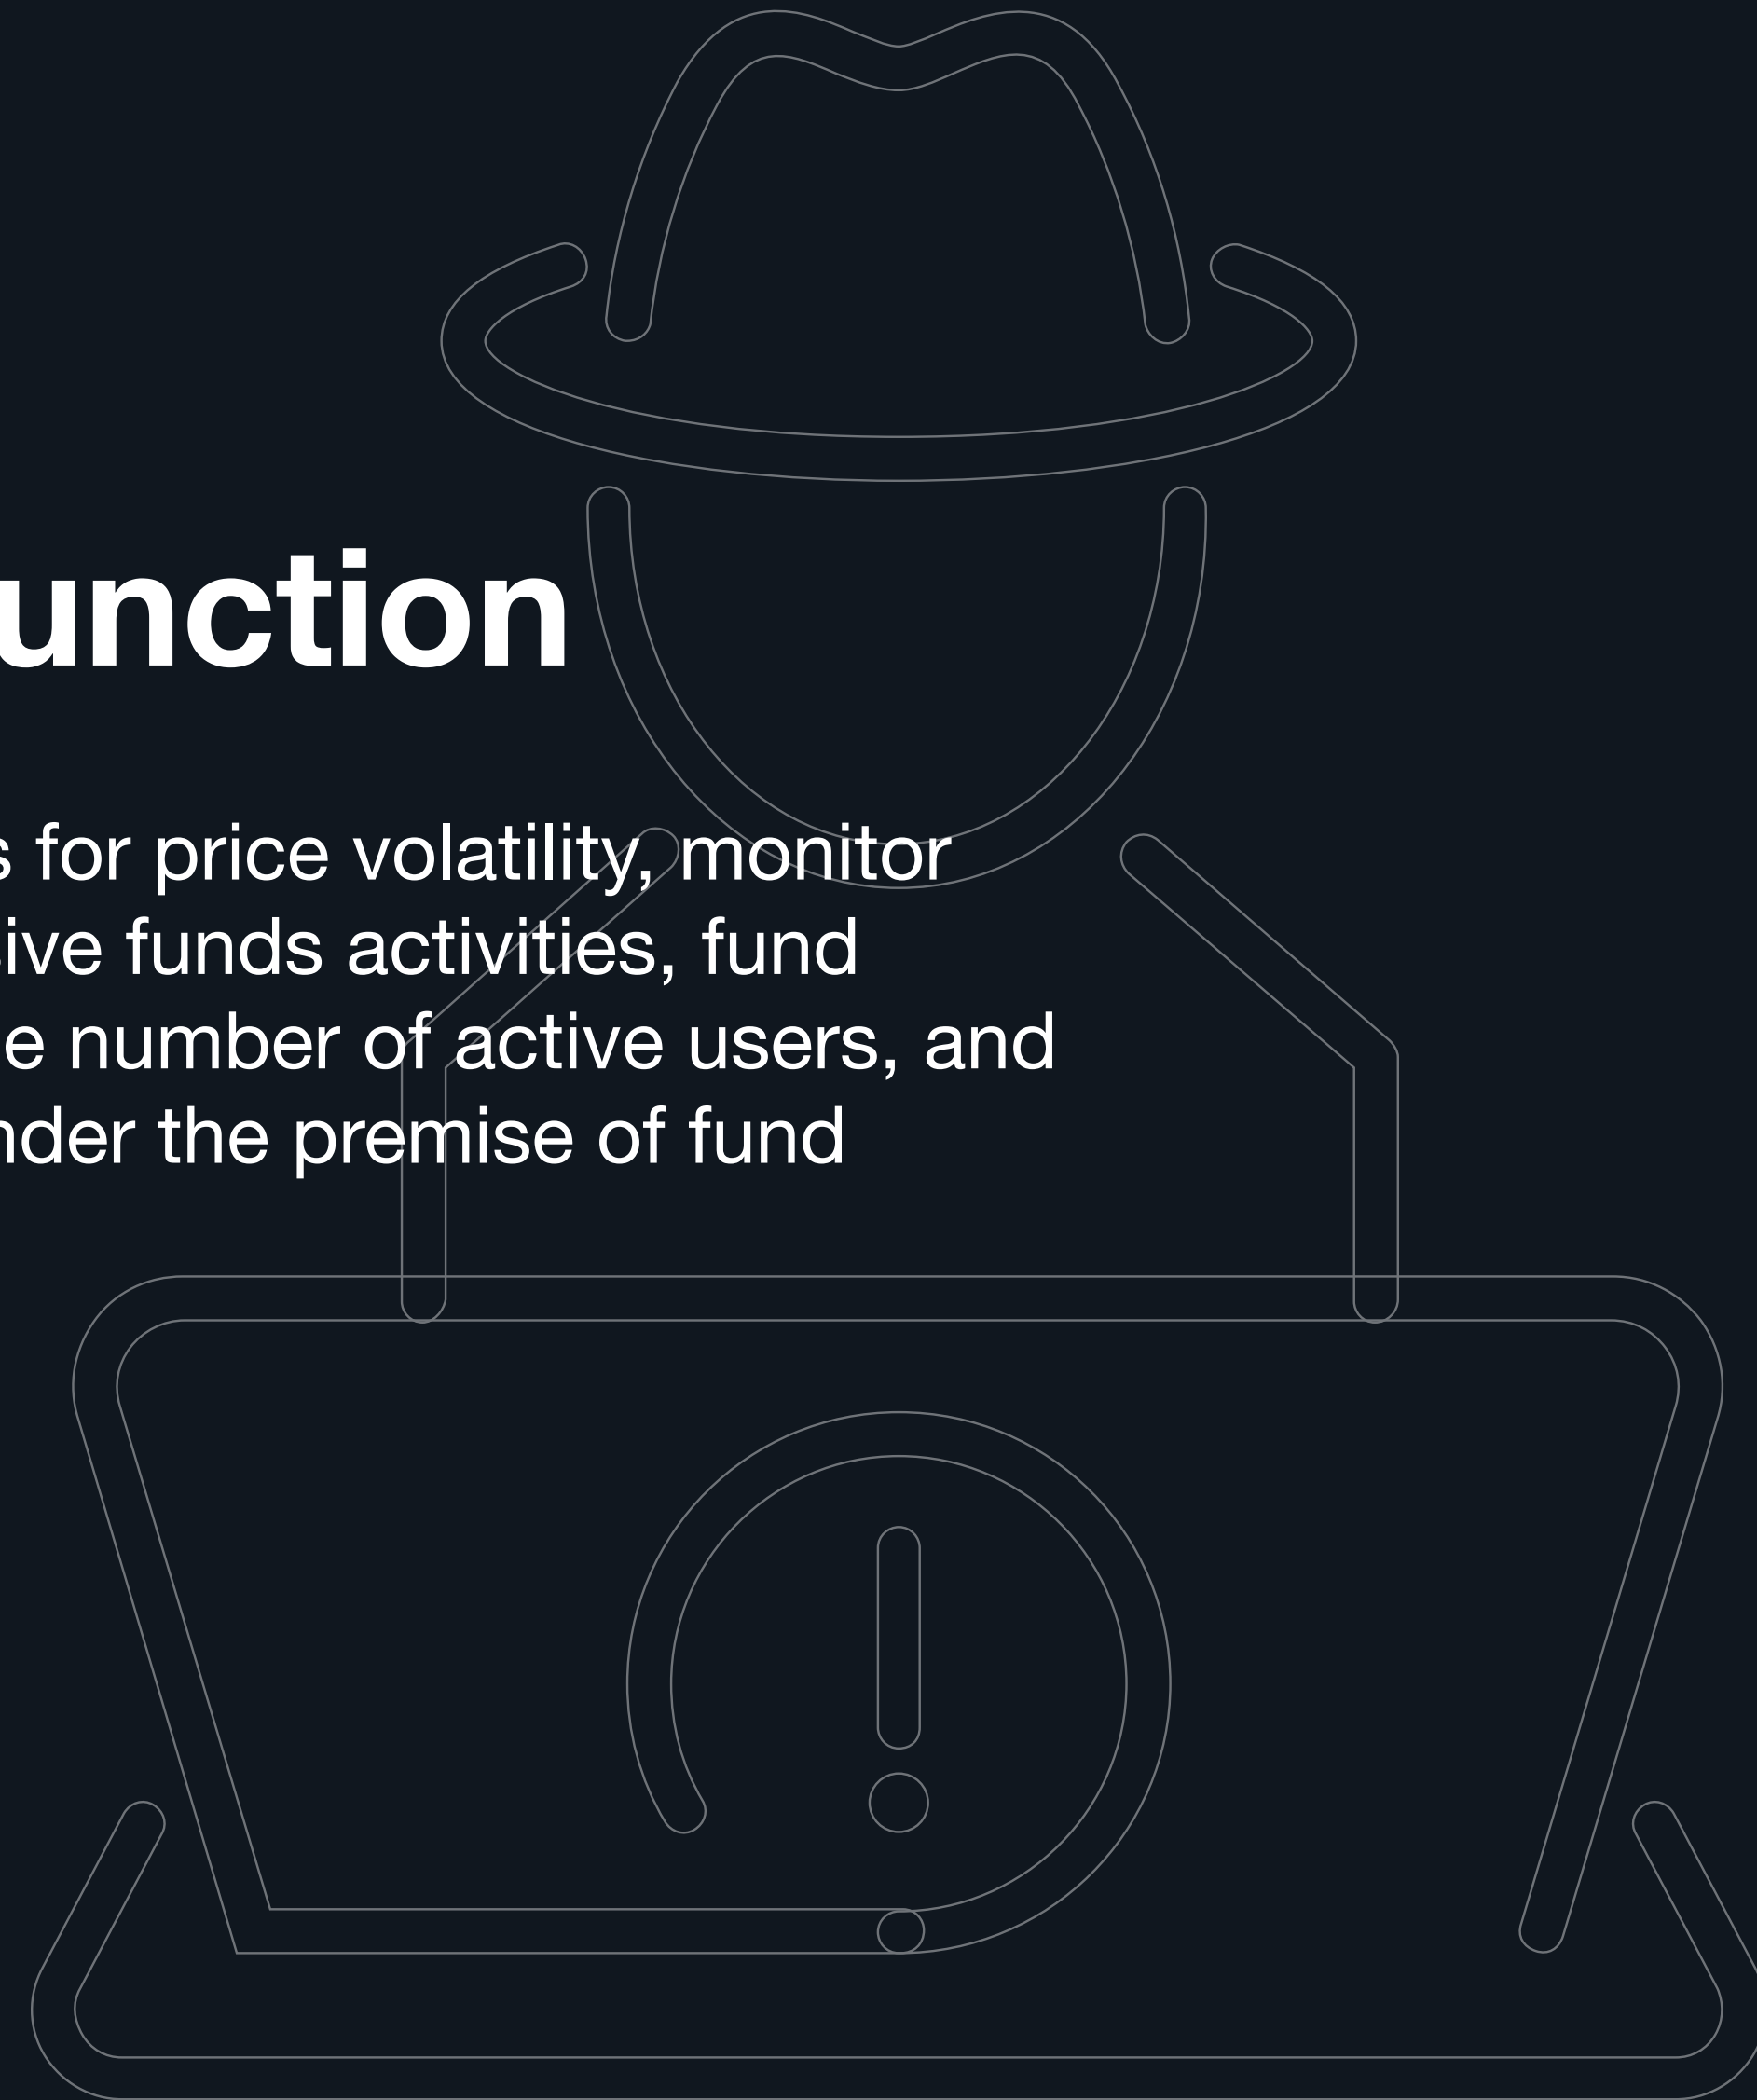

DeFi project mining pool risk and return assessment

TheForce.Trade labels and ranks mining pools based on risk assessment and profitability, and demonstrates the ranking list to users for direct target searching to find the most suitable mining pools to invest. We use qualifiable evaluation indicators like team risks, impermanent loss, development stage risk, contract security risk to assess and rate projects. Meanwhile, there are revenue indicators like total value locked, daily rate of return, gas fee consumption etc., with which beginners who are not familiar with DeFi risks and return data could learn about high-quality projects, avoid financial risks and see rate of return with transparency and accuracy. The page data of each project will be sorted, collected and visualized. Different DeFi projects are classified into the Dex/AMM section, staking/lending section, smart pool section, stablecoin section, derivatives section, NFT section, oracle section, etc., the dashboard allows users to understand market changes instantly.

Signal Warning Function

The integrated mining pools set alerts for price volatility, monitor real-time data on chain such as massive funds activities, fund transfer by project party, change in the number of active users, and to guarantee users to gain revenue under the premise of fund security.

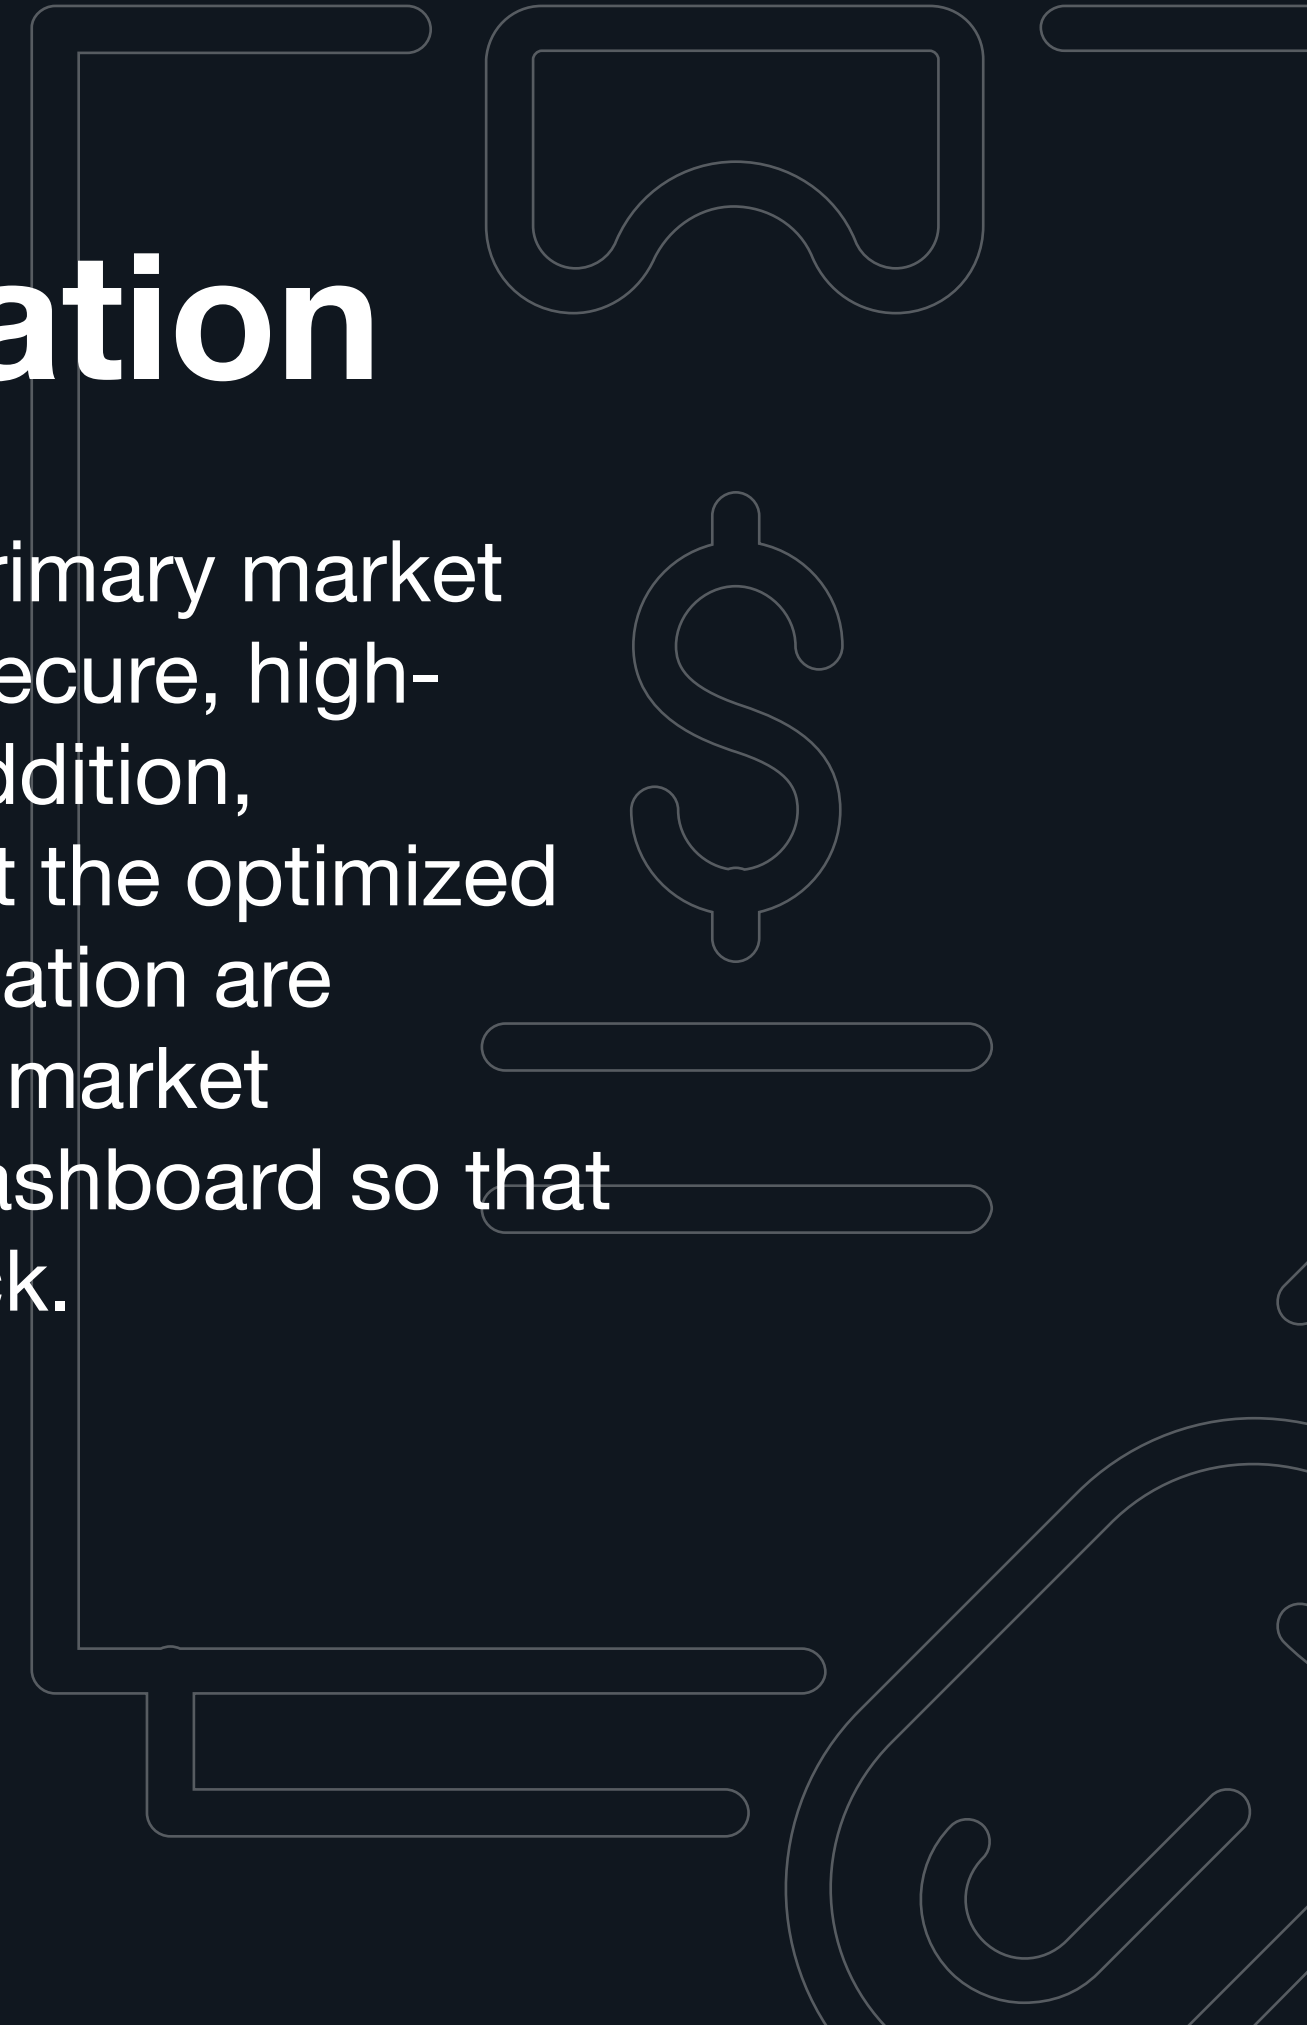

Auto-compound

Through TheForce.Trade auto compounded yield smart contract, users will be able to reinvest compound interest into the mining pool to multiply gains. This greatly optimizes mining operation and allows users to harvest with a simple click in order to maximize profitability. In terms of revenue, the AI model implements real-time monitoring and optimizes integrated mining pools to calculate gain factor that would recommend the best possible investment route for users and participate in the auto-compounded yield optimizer.

Primary Market Participation

TheForce.Trade will launch a retail investor-friendly primary market participation platform to help users select the most secure, high-quality projects out of hundreds of heated ones. In addition, TheForce.Trade will reach out to project parties to get the optimized investment quota. The requirements of identity verification are minimized within the compliance scope. The primary market investment function is embedded in the platform's dashboard so that all TheForce.Trade users can participate with one click.

5

High-end NFT Auction

TheForce.Trade will work with internationally renowned game manufacturers, artists and designers to launch their works onto NFT and provide them with services such as the use of digital wallets, NFT custody and monetization. Furthermore, TheForce.Trade (TFT) means to establish a high-end NFT boutique auction platform to sell their works, allowing inexperienced crypto beginners to easily access the world of NFT. We aim to provide artists with an exclusively high-end NFT one-stop-shop trading platform.

NFT

NFT Mining

NFT works purchased on TheForce.Trade platform can be staked into yield farming pools to incentivize liquidity providing and circulation in order to empower NFTs with greater value appreciation.

NFT dashboard and Oracle

The blooming emergence of NFT has attracted lots of new projects, along with the need for NFT data dashboard and oracle to provide in-time information and price feeding. TheForce.Trade platform offers information searching tools and oracle to fulfill the needs of all users.

Token Name

TheForce Coin

Token Symbol

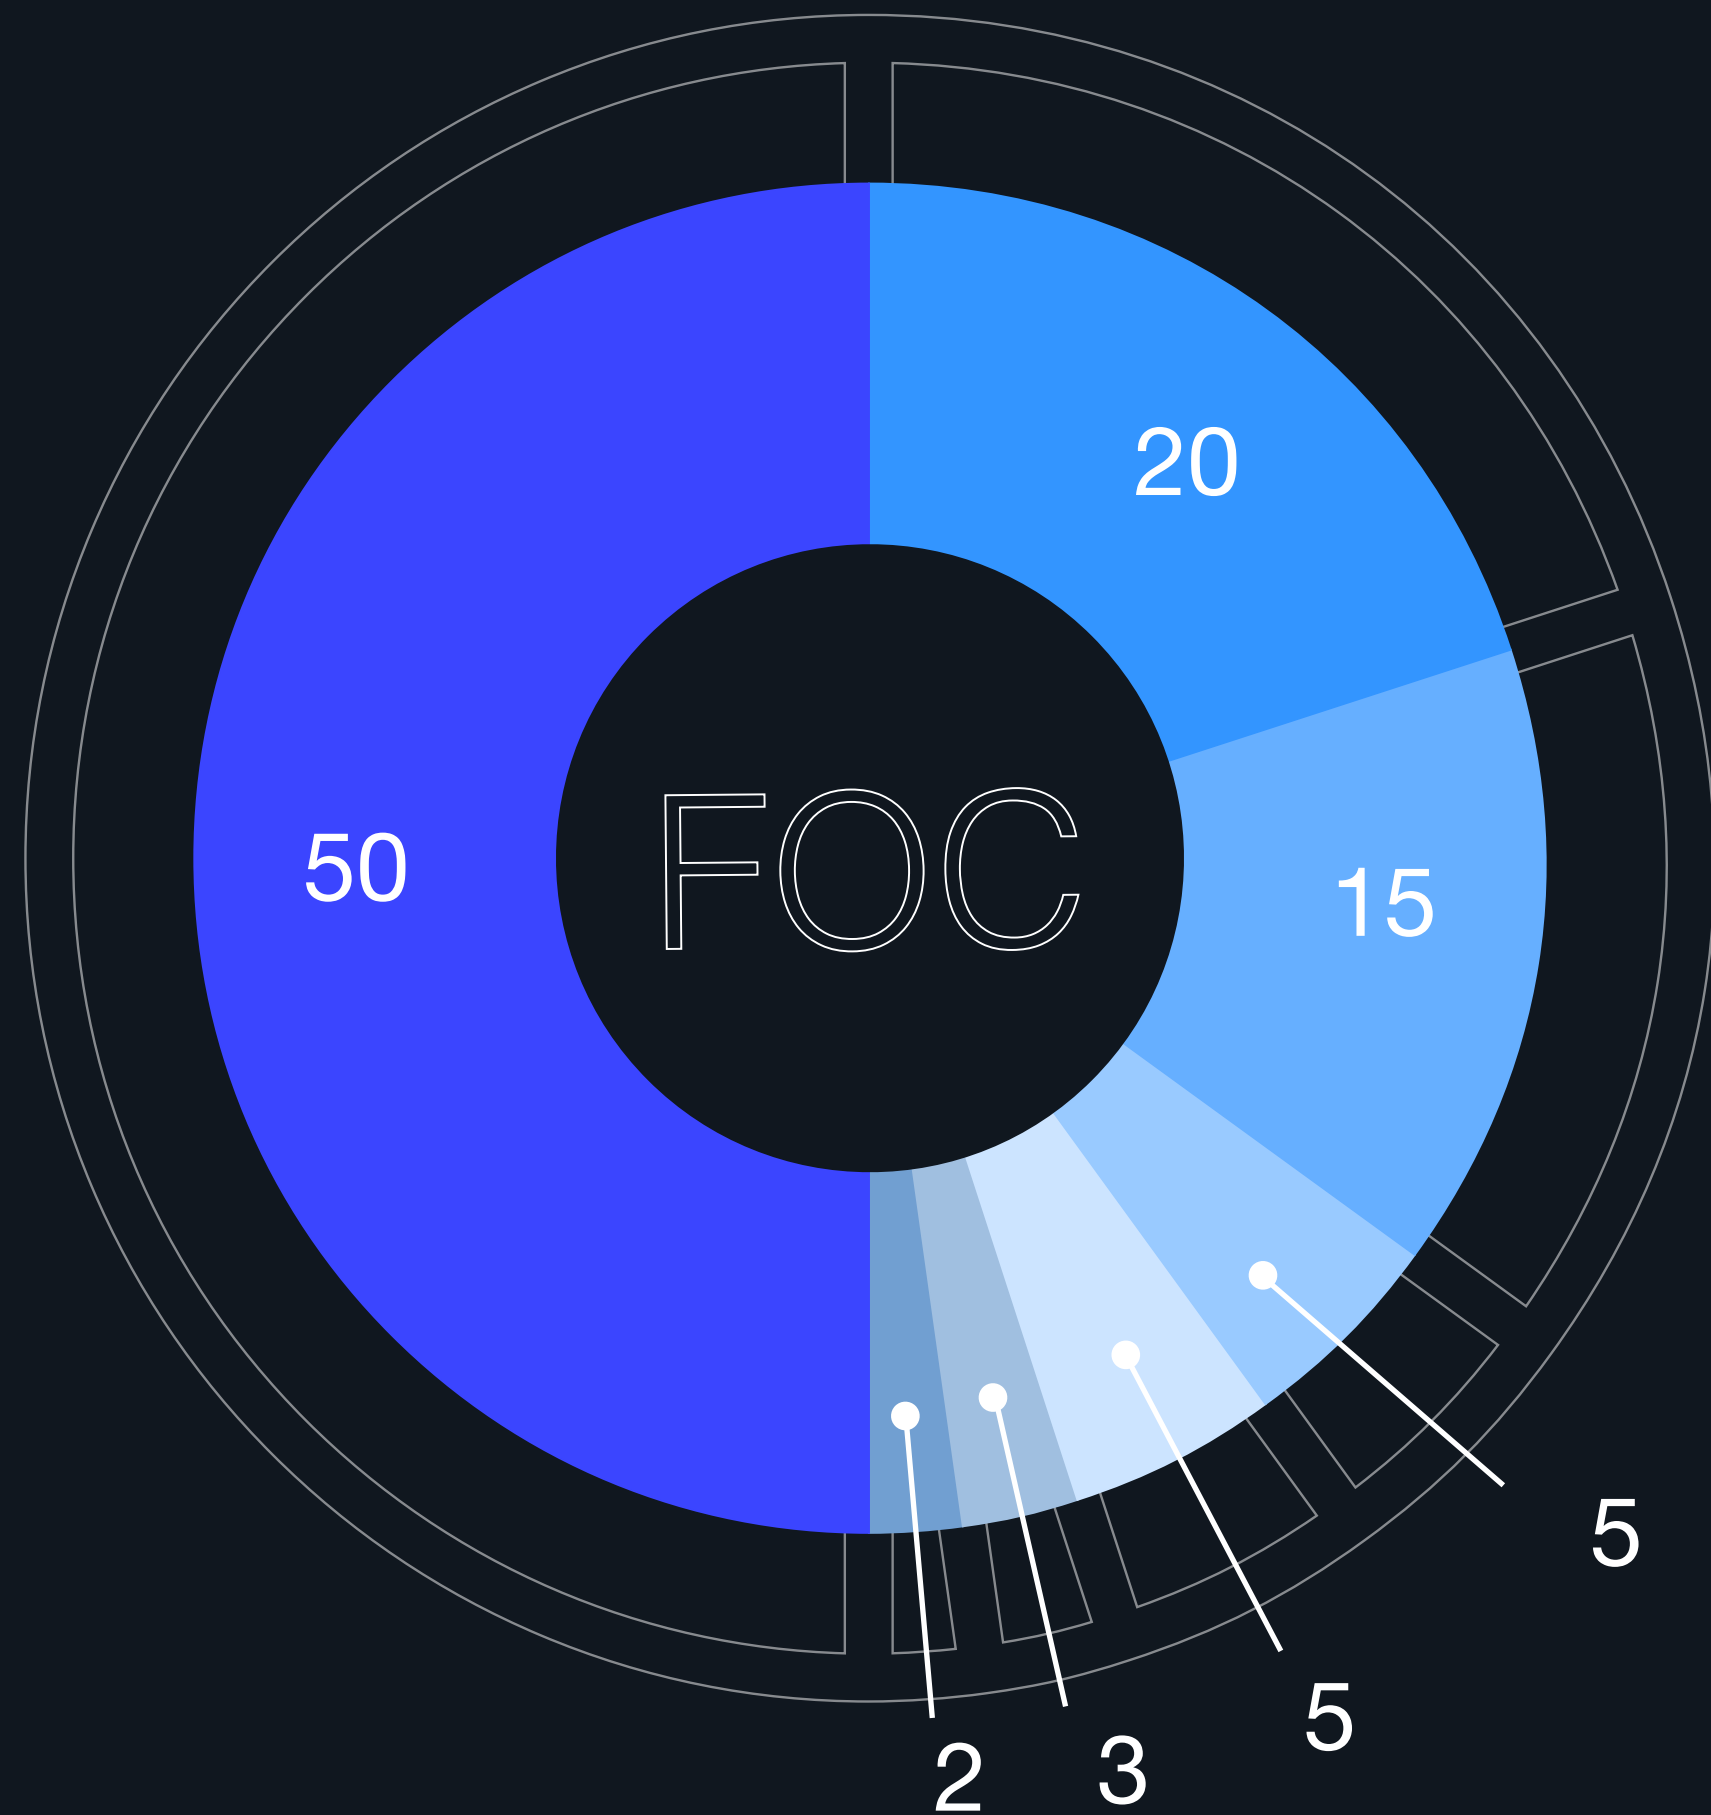

FOC

Token Supply

1,000,000,000

Initial Circulation

17,500,000

Token Allocation

-  Yield Farming 50%
-  Community Rewards 20%
-  Token Sales 15%
-  Liquidity Providing 5%
-  Team 5%
-  Marketing 3%
-  Operation & Maintenance 2%

|| PE and IDO ///

PE

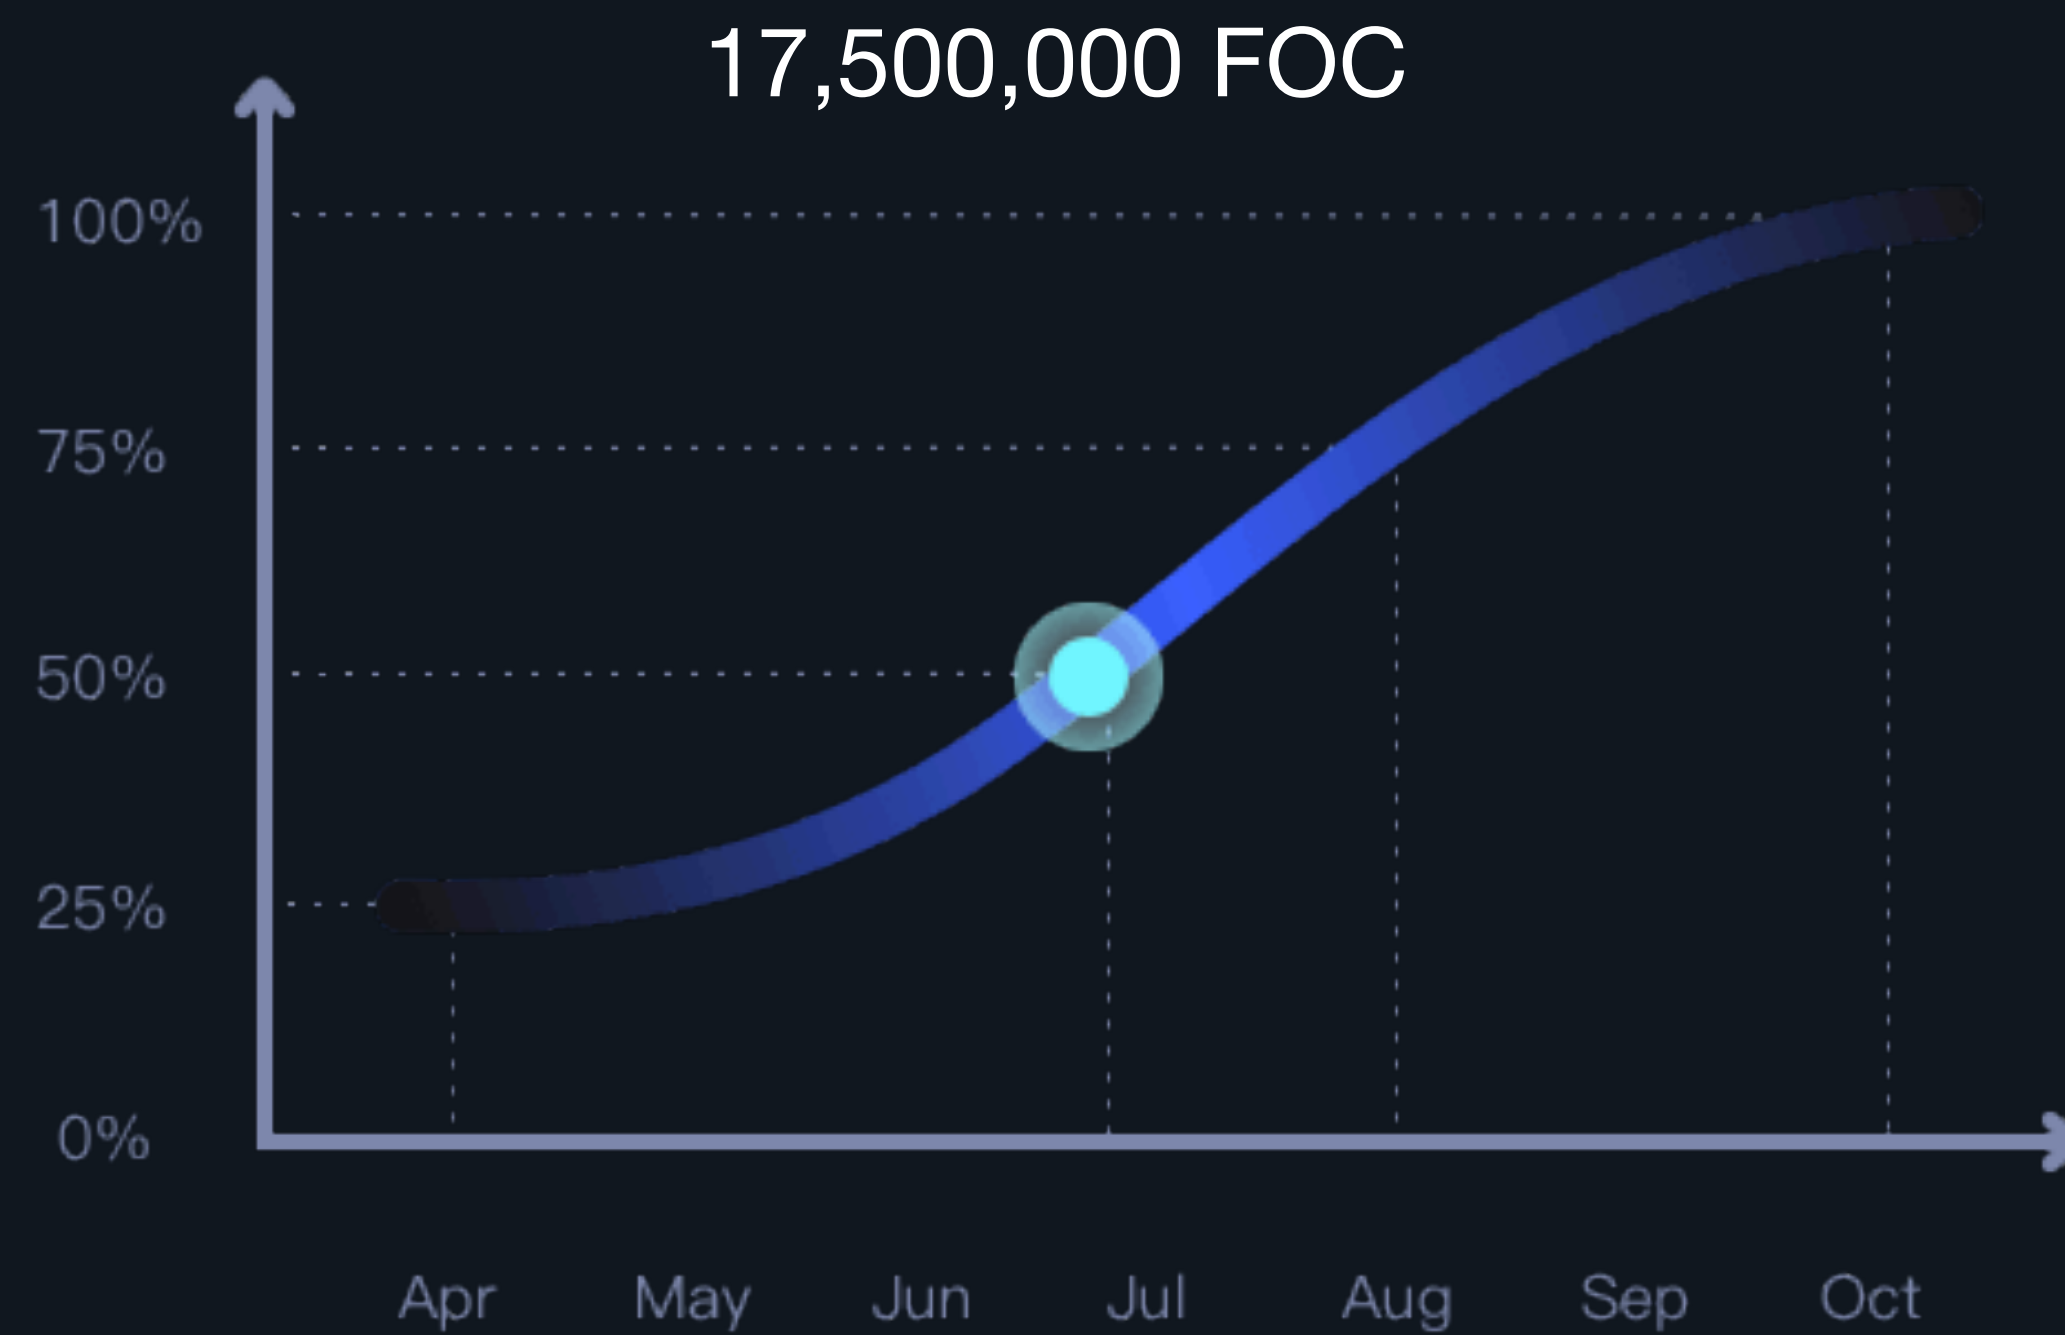

Price - 1 FOC = 0.1 USDT
Quantity - 30,000,000 FOC

IDO

Price - 1 FOC = 0.3 USDT
Quantity - 5,000,000 FOC

|| PE and IDO ///

Private Round and IDO Token Release Schedule

Private round and IDO round tokens will be unlocked 25% initially, the remaining tokens will be unlocked 12.5% per month in the next 6 months.

IDO tokens release varies on different launchpads.

/// About US ///

A focused team of financial and software engineers in Europe and Silicon Valley. Passionate about DeFi and NFT, risk-management know-how and Blockchain opportunities to all. Background from Google, Facebook and financial institutes.

|| RoadMap ///

2020 Q4

- TheForce.Trade
- DeFi model formation
- Risk assessment model formation
- NFT platform concept expansion

2021 Q1

- Seed round sale
- Launching the first version of DeFi Dashboard
- Optimising DeFi data

2021 Q2

- Launching the second version of dashboard function
- Private round sale
- Public round sale
- Launching automatic reinvestment function
- Launching on BSC and Heco
- Launching on DEX
- Launching LaunchPad
- Launching on CEX
- Launching NFT Drop function
- Launching NFT treasure box function
- Launching NFT mining function
- Launching NFT service platform

2021 Q3

- Debugging machine learning AI algorithm
- Debugging multi-factor model algorithm
- Launching on OK chain
