

# RealT Style Guide

Updated 2020-06-26

## Colors

	#294378	Our <b>anchor</b> color. Use this as the foundation for RealT-themed layouts.
	#112c4c	Our <b>attention-getting</b> color. Use this to call out areas that demand serious consideration.
	#156cab	Our <b>actionable</b> color. Use this for CTAs, or to signal interactivity.
	#f2a91e	Our <b>interaction feedback</b> color. Use this for hover and focus states in tandem with #156cab.
	#90162d	Our <b>highlight</b> color. Use this to indicate a currently selected topic out of a set.
	#f7f7f7	Our <b>background offset</b> color. Use this when you need to distinguish between adjacent sections or elements with white backgrounds.

## Type

RealT makes use of only one font, **Montserrat**.

Paragraph Text uses the Medium weight. This is a CSS font-weight of 400.

Heading Text uses the **Bold** weight. This is a CSS font-weight of 700.

Subheading Text and labels use UPPERCASE.

## Logo

**The RealT logo, in either form, should be used against a light background.**

Do not alter the colors of the logo in any way.

Do not alter the orientation or order of the logo in any way.

More to come!
