

Digital Innovation For Modern Operations

"**DIFMO** isn't just an IT service provider — we're your strategic partner in navigating the dynamic digital landscape."

About Us

At Difmo, we didn't start by registering a company—we started by building a team. For the past three years, we've worked together as a close-knit group of passionate technologists, overcoming challenges, testing ideas, and refining our skills. Now, with a battle-tested team and a shared vision, we are officially stepping into the market as **Difmo Pvt. Ltd.**

We don't just develop—we collaborate. We take the time to understand your business, your challenges, and your aspirations to deliver truly personalized and impactful digital solutions. Our foundation is built on trust, resilience, and a relentless drive to push boundaries. Join us as we turn ideas into solutions and challenges into achievements.

Services

At **Difmo Pvt. Ltd.**, we are committed to redefining IT excellence by working hand-in-hand with our clients to transform their visions into reality. Our mission is to precisely shape your ideas into high-quality digital products that align seamlessly with your goals and expectations.

Portfolio

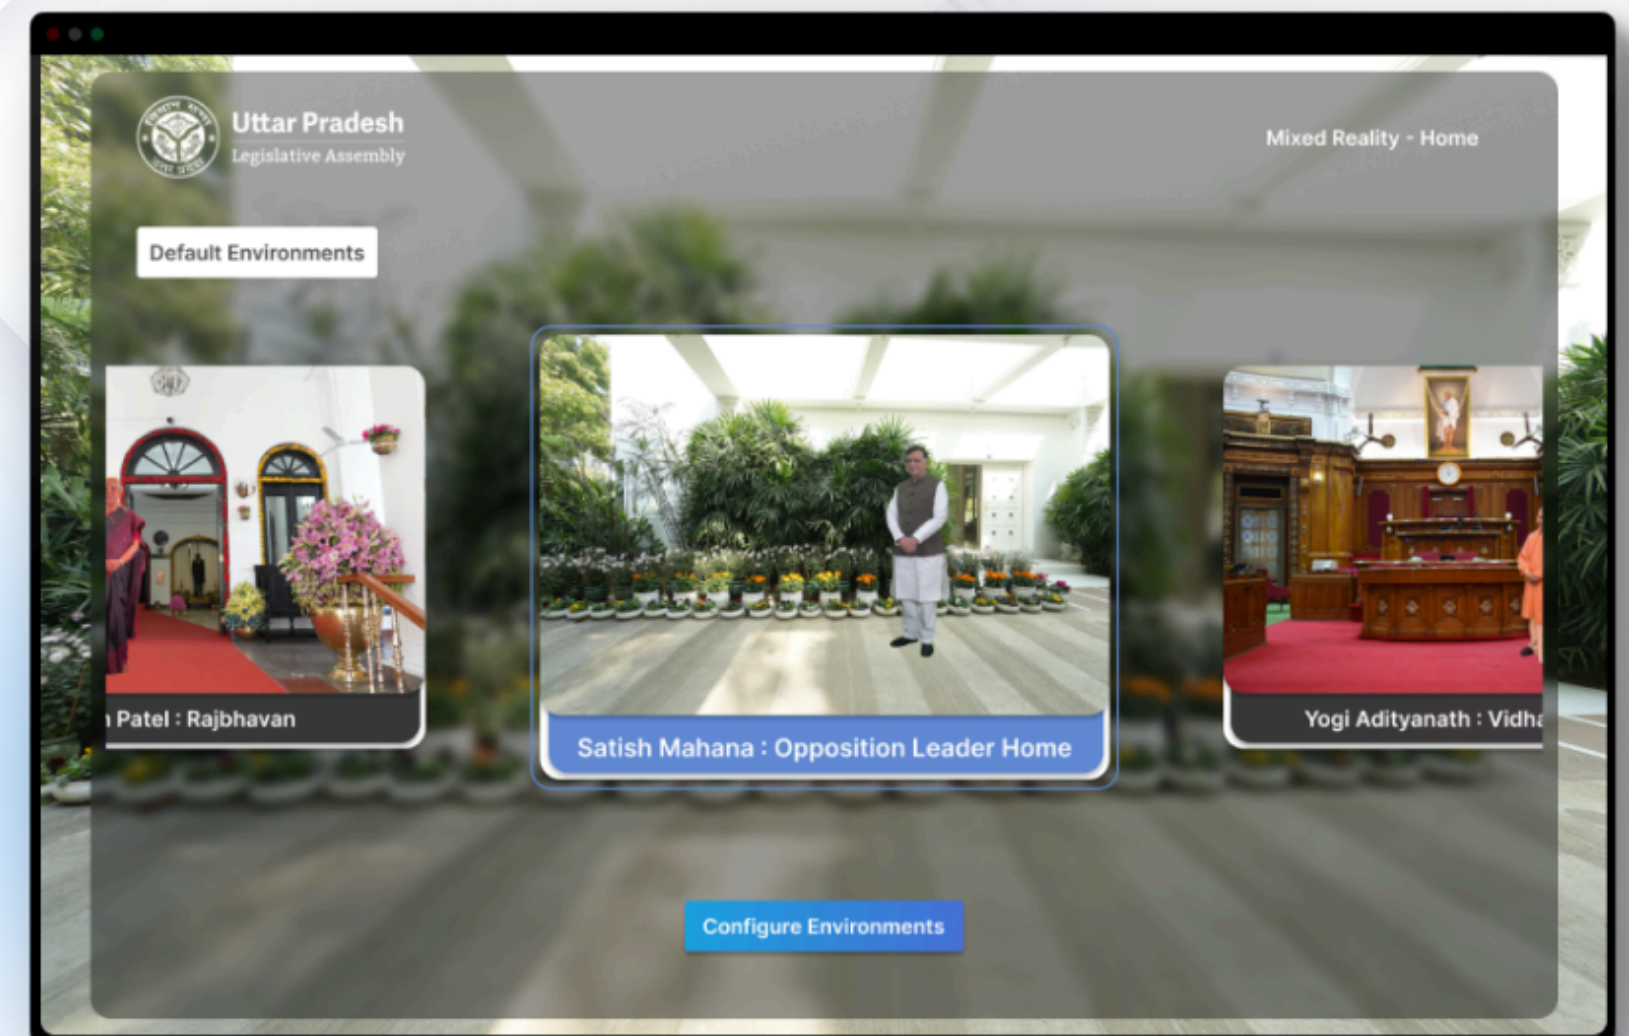

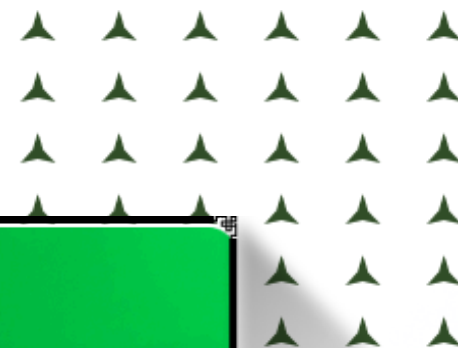

Desktop App / ML

Mixed Reality Desktop App

The Mixed Reality Desktop Application (Selfie Point) was a project initiated by the Indian Government at Vidhan Sabha, Lucknow in partner with Live Pixel and Mizzle Codes. The objective of this project was to develop a mixed reality-based desktop application capable of sensing objects on-screen through a live camera feed and blending it into mixed reality in real time with numerous other custom features.

- Tracking real time changes of students and performing CRUD operation.
- Managing and controlling multi level access with different user rights.
- Downloading and updating students data through excel sheet.
- Designing custom ID card for school and tracking status.
- Developing all other school admin controls through desktop app

Portfolio

NextZeni

Web App

Welcome to NextZeni, a platform built on the belief that education is not just about textbooks—it's about transformation.

We began as a humble coaching initiative to empower students in communication, personality development, and public speaking. Today, we're evolving into an educational content powerhouse—a dynamic space for learners, dreamers, and doers of all ages.

What We Offer

- 🎤 Communication & Personality Development: Speak better. Think deeper. Grow stronger.
- 📚 Curated Learning: Explore content across disciplines—Mathematics, History, Technology, Design, Philosophy, and more.
- 🧠 Life-Ready Learning: Beyond exams, we focus on skills that matter—confidence, expression, strategy, and growth.
- 🌱 Community & Growth: Join a community of learners who support, uplift, and challenge each other to rise.

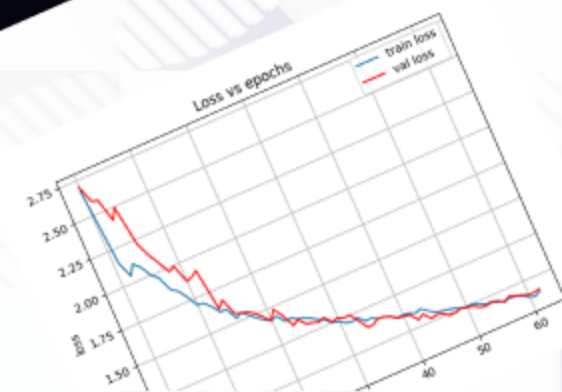

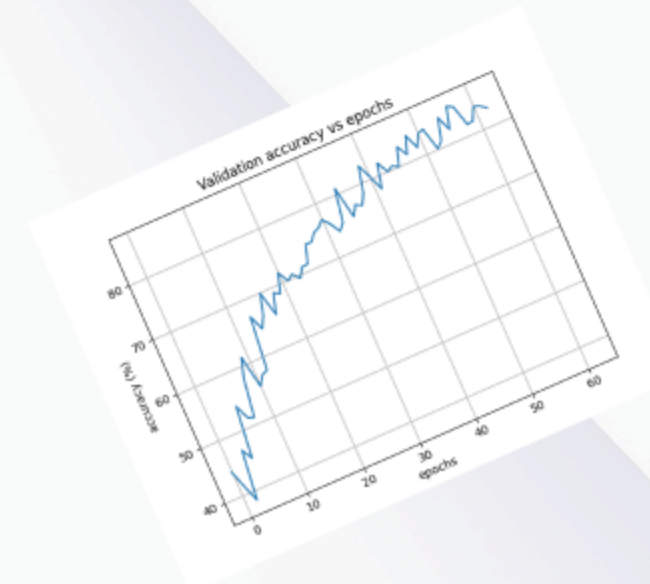

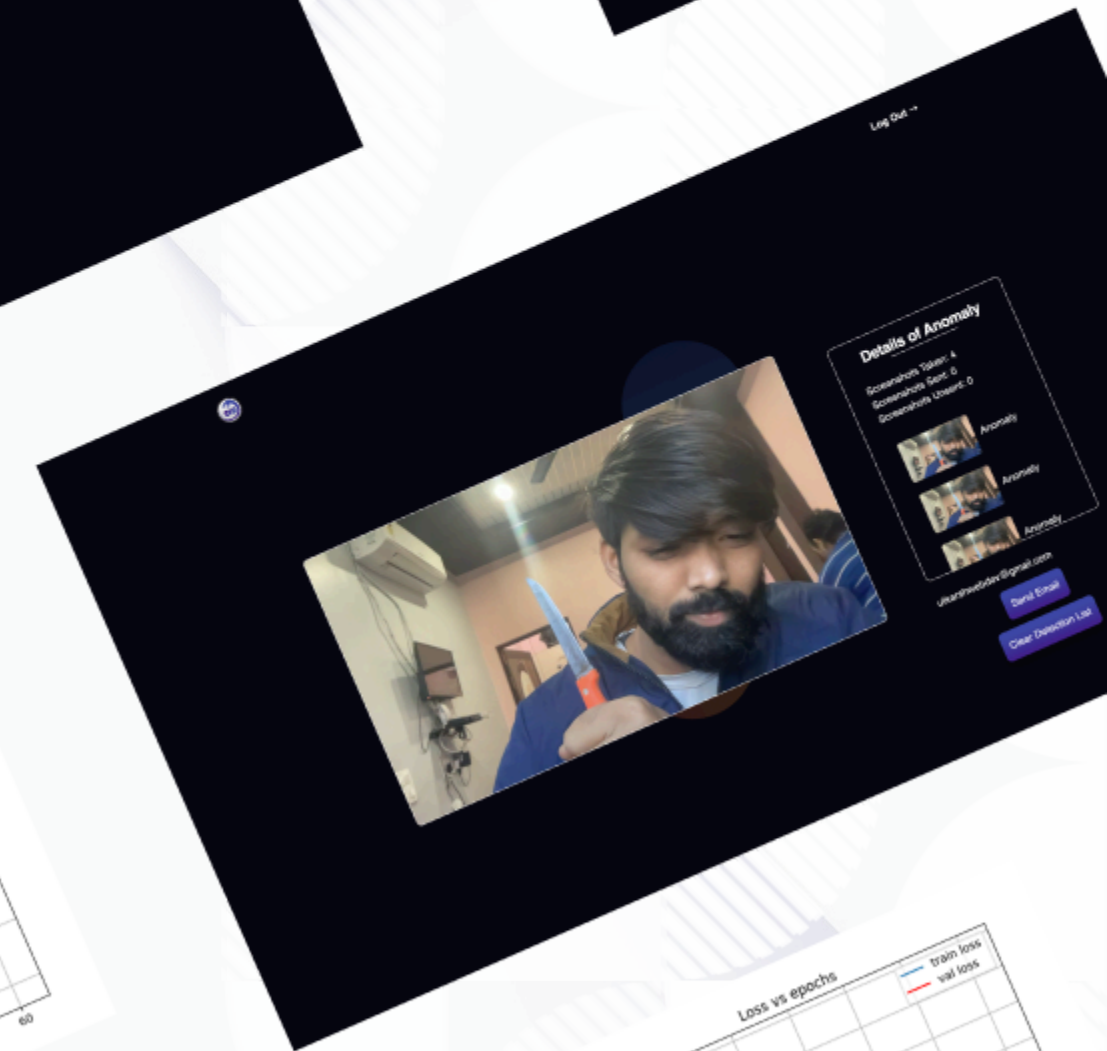

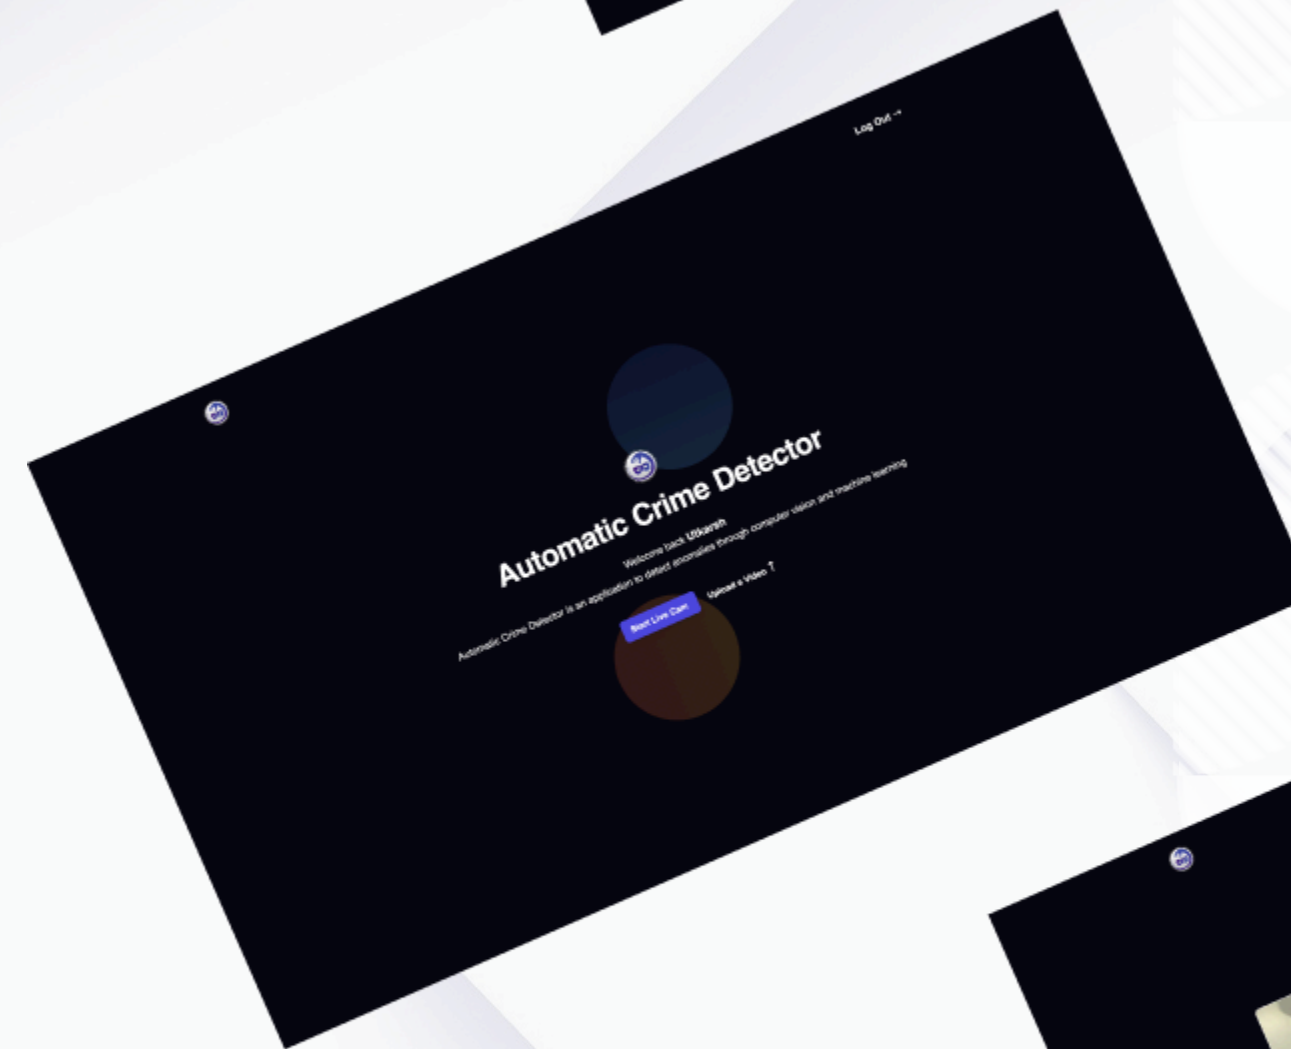

Portfolio

Automatic Crime Detector

Crime Detector App is a Django ML based project for crime detection through web cam input/uploading a video, using ultralytics, and the models are trained with open source data set. The detected anomalies are then emailed instantly with while capturing the anomaly and time at which it was detected. It was developed for a client from middle east to instal it over his system and can be access from anywhere online.

This project involved

- Web App & logo design .
- Website development & model training for specific use case.
- Capturing real time data footage and analysing each frame on trained model.
- Capturing and mailing detected anomaly in real time.
- Anomaly detection accuracy above 82%, before delivery acquired 95.1%
