LITC–LIT THE LIGHT CAREER

LIT THE LIGHT CAREER initiative was inaugurated by Dr Alby John I.A.S

“LIT THE LIGHT”, is a non-profit organization, exclusively working for the overall development of the visually challenged community. We support them in every possible way, that includes Academics, Extracurricular activities, Medical support, and overall growth. We come across many visually challenged individuals who are well educated but work as a daily wage earner or in very low jobs, while most of them are unemployed. Our aim is to make them independent & confident enough to face the world with the right kind of JOB. During March 2020, our organisation initiated a step towards this goal, focusing on our visually challenged graduates. We started providing them assistance with career and employment opportunities. On March 15th 2020, during our Lit the Light READ FEST Event, LIT THE LIGHT CAREER initiative was inaugurated by **Dr Alby John I.A.S, Regional Deputy Commissioner, Greater Chennai Corporation (south)** at Presidency College.

Candidate Profiling

Visually challenged candidates looking for jobs are called individually for detailed discussion. Every detail of the candidate, relevant to the job s/he is looking for, is captured, and then guidance is provided to them in alignment to their individual needs and capability.

Resume Writing & Verification

Based on the information provided by the visually challenged candidate, we create their Resume, verify their educational documents and ensure they are marketed in the industry to secure a good placement.

Job Related Training Assistance

We have successfully partnered with training platforms and are also conducting internal training which helps in making the talent job ready. We have two resources who have successfully completed training with TCS Maitree and two selected for training with Enable India.

JOB is everyone's right and makes a person independent & confident. We are the facilitators who bridge the gap between Visually challenged talents and the organisation, ensuring that the right job opportunity reaches all qualified Visually challenged talents.

We are also working tirelessly to connect with organizations and secure good placements for our Visually challenged talent.
