# Android Device

quick setup guide

This guide will help you configure your Android device so you can use it to test your apps developed on Android Studio

1 Connect the device to your PC

2 Download and install device drivers

- ⊙ Download and install ADB Driver Installer
- ⊙ Select your device and continue with the installation
- 🔗 http://adbdriver.com/

3 Activate Android debugging

- ◉ on your phone, got to Settings >> Developer Options

- ◉ if Developer Options doesn't show up, navigate to About Phone and touch Build Number several times, the menu will be available right away

- ◉ under Developer Options activate Android debugging
