

Campaign update

Prof. Gabriel Krestin has joined Rayscape's Board

The former President of European Society of Radiology, becomes an Independent Board Member at Rayscape.

Prof. Gabriel Paul Krestin has been appointed as an independent member of the Rayscape board. He brings more than four decades of experience in radiology, medical imaging, academic leadership and succesful entrepreneurship journeys.

Who is Prof. Gabriel Paul Krestin?

- Professor Emeritus of Radiology at Erasmus MC, where he led the Department of Radiology and Nuclear Medicine for 25 years
- Former president of the European Society of Radiology (ESR)
- Founder of Quantib, a medical imaging company that he successfully exited
- Involved in several healthtech and medical imaging companies, in board and advisory roles

Why this matters for an investor?

Rayscape sells into a market where radiologists and hospitals make the buying decision. Clinical credibility is the entry condition.

An independent board member with Prof. Krestin's profile brings three concrete things: access to the European clinical network, harder scrutiny of the product direction, and stronger governance as the company expands internationally.

What is next?

The round remains open on Growceanu until the **20th of September**. The investment terms, the round structure and the associated risks are described in full on the campaign page.
