Bravva Angels are joining the Rayscape round

One of the most active business angel networks in Romania enters the round with a significant ticket

Members of the BRAVVA business angel community have decided to join the Rayscape round, with a significant ticket.

BRAVVA Angels is one of the most active business angel communities in Romania. Investment decisions are taken within the community, following its own analysis of the team, the product and the business model.

What this means for an investor?

Investors on the platform enter the same round, on the same terms, alongside a group that evaluates companies professionally and that has chosen to put its own capital in Rayscape.

This is not a guarantee of results. It is one more positive signal about the analysis behind this round, and a good reason to read the campaign documentation with the same attention.

What is next?

The round remains open on Growceanu until the **20th of September**. The investment terms, the round structure and the associated risks are described in full on the campaign page.
