M.Ali Raza Khan

Mobile Application Developer - Team Lead at WebHR | Developing Intuitive Mobile Apps
Hyderabad, Sindh, Pakistan

Summary

As a Mobile Application Developer - Team Lead at WebHR, I design, develop, and debug programs for various projects, using React Native, Android, and Flutter. I also coordinate with project management on database development timelines, and design intuitive graphical user interfaces to improve user experience. I have successfully updated old code bases to modern development standards, improving functionality and performance.

I have a Bachelor's degree in Information Technology from the University of Sindh, and I have acquired multiple certifications in JavaScript, React, and SQL from HackerRank. I have a track record of creating well-received and commercially viable apps, such as Fieldwork, Microfinance Loan, Pickit, and Mazebaan, for different clients and industries. I am skilled at working as a team and incorporating input into projects, as well as looking for ways to improve upon existing apps. I have a strong eye for detail and a tenacity to never quit on something until it is absolutely perfect.

Experience

WebHR

Mobile Application Developer - Team Lead
April 2022 - Present (3 years 2 months)

- Led a team of 3,4 React Native developers in the design, development, and modification of mobile applications, ensuring adherence to project timelines and quality standards.
- Conducted code reviews and provided technical guidance to team members, fostering a collaborative and high-performance work environment.
- Collaborated with cross-functional teams, including designers and QA engineers, to ensure seamless integration of features and timely delivery of projects.

- Spearheaded the adoption of best practices and modern development standards within the team, resulting in improved code quality and overall project efficiency.
