## Logitech International SA - Company Statement

A statement from the Management's Discussion and Analysis section of Logitech International SA is given below. The statement has been taken from the company's 10-K filing 2020 .

#### Overview of the Company

Logitech is a world leader in designing, manufacturing and marketing products that help connect people to digital and cloud experiences. More than 35 years ago, Logitech created products to improve experiences around the personal computer (PC) platform, and today it is a multi-brand, multi-category company designing products that enable better experiences consuming, sharing and creating digital content such as computing, gaming, video and music, whether it is on a computer, mobile device or in the cloud. Logitech's brands include Logitech, Logitech G, ASTRO Gaming, Streamlabs, Ultimate Ears, Jaybird, and Blue Microphones. Our Company's website is www.logitech.com. Our products participate in five large market opportunities: Creativity & Productivity, Gaming, Video Collaboration, Music and Smart Home. We sell our products to a broad network of domestic and international customers, including direct sales to retailers and e-tailers, and indirect sales through distributors. Our worldwide channel network includes consumer electronics distributors, retailers, mass merchandisers, specialty stores, computer and telecommunications stores, value-added resellers and online merchants. From time to time, we may seek to partner with or acquire when appropriate companies that have products, personnel, and technologies that complement our strategic direction. We continually review our product offerings and our strategic direction in light of our profitability targets, competitive conditions, changing consumer trends and the evolving nature of the interface between the consumer and the digital world. On October 31, 2019, the Company acquired all equity interests in General Workings, Inc. (Streamlabs) for a total consideration of \$105.7 million, which included a working capital adjustment, plus additional contingent consideration of \$29.0 million payable in stock only upon the achievement of certain net revenues for the period beginning on January 1, 2020 and ending on June 30, 2020 (the Streamlabs Acquisition). Streamlabs is a leading provider of software and tools for professional streamers. The Streamlabs Acquisition is complementary to the Company's gaming portfolio. On August 21, 2018, we acquired all equity interests in Blue Microphones Holding Corporation (Blue Microphones) for a total consideration of \$134.8 million in cash, which included a working capital adjustment and repayment of debt on behalf of Blue Microphones (the Blue Microphones Acquisition). Blue Microphones is a leading audio manufacturer that designs and produces microphones, headphones, recording tools, and accessories for audio professionals, musicians and consumers. The Blue Microphones Acquisition supplements our product portfolio.

#### Impacts of COVID-19 to Our Business

In March 2020, the World Health Organization declared the outbreak of a novel coronavirus ("COVID-19") as a pandemic, which continues to spread throughout the world. The spread of COVID-19 has caused public health officials to recommend precautions to mitigate the spread of the virus and, in certain markets in which we operate, government authorities have issued orders that require the closure of non-essential businesses and people to be quarantined or to shelter-at-home. The COVID-19 pandemic has significantly curtailed global economic activity, caused significant volatility and disruption in global financial and commercial markets, and is likely to lead to recessionary conditions for an indeterminate amount of time. We are conducting our business with substantial modifications, such as employee work locations and virtualization among other changes. We are continuing to actively monitor the situation and may take further actions that alter our business operations as may be required by federal, state or local authorities in the countries in which we operate, or that we determine are in the best interest of our employees, customers, partners, suppliers or shareholders. It is not clear what the potential effects of COVID-19 or any such modifications or alterations may have on our business, results of operations, financial operations, financial condition and stock price.

During February 2020, following the initial outbreak of COVID-19 in China, we experienced disruptions to our manufacturing, supply chain and logistics services, resulting in temporary inventory declines and an increase in logistics costs. We expect the increased logistics costs and adverse effects on our gross margins from COVID-19 to continue at least during the first half of fiscal year 2021. However, due to the ongoing shelter-athome requirements or recommendations in many countries, there was high demand and consumption of our products. It is difficult to predict the progression, the duration and all of the effects of COVID-19, when business closure and shelter at home guidelines may be eased or lifted, and how consumer demand, inventory and logistical effects and costs may evolve over time, or the impact on our future sales and results of operations. Some of this impact will undoubtedly occur over multiple financial periods and may have a lag effect between periods, such as what we are able to manufacture in one period affecting sales, channel inventory or logistics costs in subsequent periods. The full extent of the impact of COVID-19 on our business and our operational and financial performance is currently uncertain and will depend on many factors outside our control. For additional information, see "Liquidity and Capital resources" below and Item IA: Risk Factors, including under the caption "The full effect of the COVID-19 pandemic is uncertain and cannot be predicted, and the Company's business, results of operations and financial condition could be adversely affected by the COVID-19 pandemic." Summary of Financial Results Our total sales for fiscal year 2020 increased 7% in comparison to fiscal year 2019. The growth was broad-based across our regions and across most of our product categories. The results of operations for Streamlabs have been included in our consolidated statements of operations from the acquisition date.

Sales for fiscal year 2020 increased 8%, 9% and 2% in the Americas, EMEA and Asia Pacific, respectively, in comparison to fiscal year 2019. Gross margin increased by 50 basis points to 37.7% during fiscal year 2020, compared to fiscal year 2019. The increase in gross margin was primarily driven by favorable product mix and benefits from cost savings and operational efficiencies, partially offset by unfavorable currency

Logitech International SA (LOGN) - Financial and Strategic SWOT Analysis Review

Report Code: GDTC31036FSA Published: September 2020

exchange rates, an increase in U.S.-China tariffs and COVID-19 related costs primarily due to disruptions and higher costs in our manufacturing, supply chain and logistics operations and outsourced services.

Operating expenses for fiscal year 2020 were \$845.9 million, or 28.4% of sales, compared to \$773.8 million, or 27.8% of sales, for fiscal year 2019. The increase in operating expenses was primarily driven by \$39.0 million higher personnel-related costs due to additional headcount from business acquisitions as well as from S&M and R&D departments to support business growth, \$13.9 million higher third-party costs primarily in S&M and R&D to support our long-term growth opportunities, \$3.3 million higher amortization of intangible assets from the business acquisitions, and a \$23.2 million change in fair value of contingent consideration from the Streamlabs Acquisition, partially offset by a decrease of \$11.2 million in restructuring charges as we substantially completed our restructuring plan in the first quarter of fiscal year 2020. Income tax benefit for fiscal year 2020 was impacted by \$153.2 million from the measurement of deferred tax assets and liabilities, net of assessment of uncertain tax positions in Switzerland as a result of the enactment of TRAF in the canton of Vaud in Switzerland during the fourth quarter of fiscal year 2020. Net income for fiscal year 2020 was \$449.7 million, compared to \$257.6 million for fiscal year 2019.

# Section 2 - Company Analysis

# **Company Overview**

Logitech International SA (Logitech) is a designer, developer, manufacturer and marketer of mobile and personal computer peripherals. The company offers keyboards, desktops, mice, pointing devices, printing devices, tablet accessories, audio-PC, audio-wearable and wireless, video, PC gaming, and home-entertainment control systems. It also provides high-definition (HD) video communication endpoints, and HD video conferencing systems infrastructure software and hardware for video deployments. It markets its products through international and regional distributors, e-tailers and retailers. The company sells its products under Logitech G, Ultimate Ears, Jaybird, Logitech and ASTRO Gaming brands. The company has operations across the Americas, Europe, Asia-Pacific, Africa and the Middle-East. Logitech is headquartered in Lausanne, Switzerland.

# Logitech International SA - Business Description

Logitech International SA (Logitech) is a manufacturer and marketer of computer, tablet and mobile peripherals for individuals and businesses in 100 countries.

The company classifies its offering into ten product categories: Pointing Devices, Keyboards and Combos, Gaming, Mobile Speakers, Audio and Wearables, Video Collaboration, PC Webcams, Tablet and Other Accessories, Smart Home, and Other.

Logitech operates through sales offices located in Newark, California; Lausanne, Switzerland; Suzhou, China: Hsinchu, Taiwan; and Tokyo, Japan. It markets its products through regional and international distributors, e-tailers, and retailers.

#### Product Category: Audio and Wearables

#### Overview

Provides PC speakers, in-ear headphones, PC headsets and premium wireless audio wearables under Jaybird brand for active lifestyles and sports.

#### Performance

Reported revenue of US\$273.7 million for FY2020, which decreased 1% YoY, and recorded a CAGR of 6.9% during 2016-20. The segment accounted for 9.1% of the company's revenue in FY2020.

Negative growth was due to the decrease in sales of PC Speakers and Jaybird traditional wireless products.

#### **Product Category: Gaming**

#### Overview

Provides keyboards, gamepads, mice, ASTRO console gaming headsets, Streamlab Services, Saitek simulation controllers, flight sticks and steering wheels for gamers.

#### Performance

Reported revenue of US\$690.1 million for FY2020, which grew 6.4% YoY, and recorded a CAGR of 23% during 2016-20. The segment accounted for 23.2% of the company's revenue in FY2020.

Revenue growth was due to increase in sales of gaming mice, gaming keyboards, console gaming controllers, and gaming steering wheels, and sales from Streamlabs Services.

#### Product Category: Keyboards and Combos

#### Overview

Offers living room keyboards, corded and PC keyboards, and keyboard-and-mouse combinations (combos).

#### Performance

Reported revenue of US\$571.7 million for FY2020, which grew 7% YoY, and recorded a CAGR of 5.8% during 2016-20. The segment accounted for 19.2% of the company's revenue in FY2020.

Revenue growth was due to increase in sales of cordless and corded keyboards and Wireless Keyboards and mice combos.

#### **Product Category: Mobile Speakers**

#### Overview

Offers portable wireless Wi-Fi and Bluetooth speakers such as Ultimate Ears WONDERBOOM, BOOM 2, MEGABOOM, MEGABLAST and BLAST.

#### Performance

Reported revenue of US\$221.7 million for FY2020, which declined 4% YoY, and recorded a CAGR of 0.7% during 2016-19. The segment accounted for 7.4% of the company's revenue in FY2020.

Revenue declined was due to decrease in sales of WONDERBOOM, BOOM 2 and MEGABLAST.

#### Product Category: Other

#### Overview

Includes the products that are intended for transition or those which are already transitioned.

#### Performance

Reported revenue of US\$0.3 million for FY2020, which decreased 10% YoY, and recorded negative growth of 32.8% during 2016-20. The segment accounted for 0.1% of the company's revenue in FY2020.

#### **Product Category: PC Webcams**

#### Overview

Offers PC-based webcams such as C920 HD Pro Webcam, C922 Pro Stream Webcam, C270 HD Webcam, 4K Pro Webcam and Pro Webcam for individuals.

#### Performance

Reported revenue of US\$129.1 million for FY2020, which grew 7% YoY, and recorded a CAGR of 5.5% during 2016-20. The segment accounted for 4.3% of the company's revenue in FY2020.

Revenue growth was due to high sales of Webcam C260 and introduction of Logitech Streamcam in AMR and EMEA.

#### **Product Category: Pointing Devices**

#### Overview

Offers Mac and PC-related touchpads, trackballs, presenters and mice.

#### Performance

Reported revenue of US\$544.5 million for FY2020, which grew 1% YoY, and recorded a CAGR of 2% during 2016-20. The segment accounted for 18.3% of the company's revenue in FY2020. Revenue growth was due to increase in sales of cordless mice.

#### Product Category: Smart Home

#### Overview

Offers home entertainment controllers; connected home devices such as thermostats, door locks and lighting; and home security cameras.

#### Performance

Reported revenue of US\$43.4 million for FY2020, which declined 12% YoY, and recorded negative growth of 5.9% during 2016-20. The segment accounted for 1.4% of the company's revenue in FY2020.

Revenue decline was due to decrease in sales of Harmony remote products.

#### Product Category: Tablet and Other Accessories

#### Overview

Offers accessories such as covers, cases and keyboards for smartphones and tablets.

#### Performance

Reported revenue of US\$135.3 million for FY2020, which grew 5% YoY, and recorded negative growth of 5.4% during 2016-20. The segment accounted for 4.5% of the company's revenue in FY2020.

Revenue growth was due to the introduction of Slim Folio Pro cases for the 11 inch and 12.9 inch iPad Pro and sales from slim folio and Rugged Combo keyboard case.

#### Product Category: Video Collaboration

#### Overview

Offers Logitech's ConferenceCams with high definition (HD) 1080p video and enterprise-quality audio for businesses.

#### Performance

Reported revenue of US\$365.6 million for FY2020, which grew 41% YoY, and recorded a CAGR of 32.5% during 2016-20. The segment accounted for 12.2% of the company's revenue in FY2020.

Revenue growth was due to higher demand for Rally Ultra- HD PTZ Conference camera and introduction of Tap Touch Controller.

#### Geographical Segment: Americas

#### Performance

Reported revenue of US\$1,286.5 million for FY2020, which increased 8% YoY and reported a CAGR of 7.8% during 2016-20. The segment accounted for 43.2% of the company's revenue in FY2020.

#### Geographical Segment: Asia-Pacific

#### Performance

Reported revenue of US\$748.1 million for FY2020, which increased 1.5% YoY and reported a CAGR of 8.7% during 2016-20. The segment accounted for 25.2% of the company's revenue in FY2020.

#### Geographical Segment: EMEA

#### Performance

Reported revenue of US\$941.2 million for FY2020, which increased 9.2% YoY and reported a CAGR of 7.8% during 2016-20. The segment accounted for 31.6% of the company's revenue in FY2020.

#### **R&D Overview**

The company's research, development and design (RD&D) focuses on development of new products and enhancing existing products leveraging latest technologies. In FY2020, Logitech spent US\$177.6 million on R&D, which as a percentage of revenue, stood at 6%.

# Logitech International SA - Corporate Strategy

Logitech focuses on ability to innovate, design and produce new products. The company strategies its plan on product design capabilities and focuses on technology innovation. In line with this, the company aims at five future growth plans which include Design, Engineering, Go-to-market, Marketing and Operations. The company focuses on long term growth by partnering, acquisitions and divesture activities.

## Logitech International SA - SWOT Analysis

## **SWOT Analysis - Overview**

Logitech International SA (Logitech) designs, develops, manufactures and markets peripherals for personal computers and other digital platforms. Strong financial performance, distribution network, and R&D are the company's major strengths, whereas increasing accounts receivables remains a cause for concern. Launch of new products, investment in gaming market, and positive outlook for global hardware infrastructure market are likely to offer growth opportunities to the company. However, intense competition, environmental regulations, and dependence on third party product sales could affect its business operations.

## Logitech International SA - Strengths

#### **Strength - Distribution Network**

Logitech has a well-established sales and distribution network. Through its operating subsidiaries, the company maintains market and channel support offices in 40 countries. Logitech sells its wide range of products through a network of distributors, retailers and e-retailers. These retail channels are supported with third-party distribution centers located across North America, Europe, and Asia Pacific. The company's global channel network comprises computer and telecommunications stores, mass merchandisers, specialty stores, value-added resellers, online merchants, and consumer electronics distributors, retailers. Its distributors resell products to retailers, value-added resellers, systems integrators and other distributors. Major distributors of the company in North America include Ingram Micro, Tech Data Co, D&H Distributing Co, and Synnex Corp. In Europe, major distributors include Ingram Micro, ALSO Group, Tech Data, and DCC PLC. Logitech also sells products to several regional distributors including ASBISC Enterprises PLC, Copaco Dc B.V. in the Netherlands, Littlebit Technology Partners AG in Switzerland, and others. In Asia, the company's distributors in China include Wincheers International Trading and Beijing Digital China Limited, Daiwabo in Japan, Synnex in Australia, apart from the Pan-Asian distributor, Ingram Micro. The major retail chains, which carry Logitech's products, include Best Buy, Office Depot, Staples, Target, and Wal-Mart in the US, and Metro Group, FNAC, Elkjop, and Dixons Stores Group PLC in Europe and other key national consumer electronics chains. Logitech products are also available at the top online e-retailers, which include JD.com and Amazon.com.

#### **Strength - Innovation Capabilities**

Logitech focuses on innovation, value and product quality. It made significant investments in product R&D so as to facilitate innovation of new and improved products and technologies. In FY2020, the company spent US\$177.6 million, which as a percentage of the revenue, stood at 6%. Logitech established an organization focused on developing and selling products for enterprise markets, including peripherals for unified communications applications. Initiatives such as these helped the company in delivering high quality innovative products that meet the changing needs of its customers. It employed about 800 people in R&D department at the end of FY2020. The company's properties in Newark, California; Lausanne, Switzerland; and Hong Kong, China focus on activities.

#### **Strength - Financial Performance**

The company's financial performance improved in last FY2020. Improvement in financial performance enables the company to provide higher returns to its shareholders, enabling it to attract further investments. Growth in revenue and profitability also enhance the company's ability to allocate adequate funds for growth and expansion. In FY2020, the company reported revenue of US\$2,975.9 million as compared to US\$2,788.3 million in FY2019, representing an annual growth of 6.7%. Growth in revenue was due to increase in sales of product categories such as gaming, pointing devices, keyboards and combos, video collaboration, tablet and other accessories and pc webcams. The company's operating income increased from US\$263.2 million FY2019 to US\$276.5 million in FY2020. Similarly, the company's net profit margin increased from US\$257.6 million in FY2019 to US\$449.7 million in FY2020.

# Logitech International SA - Weaknesses

#### **Weakness - Accounts Receivables**

The group reported an increase in its accounts receivable. Increase in accounts receivable could be a factor for the decrease in the group's cash flow from operations. For the fiscal years ended March 2020, 2019 and 2018, the group's accounts and other receivables were US\$597.3 million, US\$573.4 million and US\$482.9 million, respectively. Inability to recover accounts receivable would significantly affect its current assets, which hampers the company's cash flow and liquidity. The recovery of the company's receivables would be a critical factor as it affects its core earnings.

# **Logitech International SA - Opportunities**

#### **Opportunity - Launch of New Products**

Logitech continues to design and develop innovative products to meet the growing needs of its customers. The company has launched several products at regular intervals, which helps it in retaining its customer base and garner higher market share. It dedicated to the advancement of product design as well as technological improvements to deliver quality products to its customers. In August 2020, the company's brand Logitech G launched G923 Racing Wheel and Pedals for Microsoft Xbox and PC. In the same month, the company's Logitech brand introduced G733 LIGHTSPEED Wireless Gaming Headset. In July2020, the company introduced a new keyboard case, Folio Touch, for 11-inch iPad Pro. In the same month, the company's Logitech brand launched Logitech G PRO X LIGHTSPEED Wireless Gaming Headset. In the same month, the company introduced the G502 Lightspeed wireless gaming mouse in India. In June 2020, the company's gaming brand, Logitech G, entered into a partnership extension with ENCE to develop new games. In May 2020, the company launched G915 TKL Tenkeyless LIGHTSPEED wireless RGB mechanical gaming keyboard.

#### **Opportunity - Gaming Market**

The company has taken several initiatives to strengthen its presence in gaming market. In June, the company's gaming brand, Logitech G, entered into a partnership extension with ENCE to develop new games. In March 2020, the company's brand Logitech G entered into a partnership with Herman Miller to create furniture solutions for gamers. In December 2019, the company acquired CHALLONGE. Through this acquisition, the company can gain access to global footprint and resources will help the company to enhance its platform to serve tournament organizers, participants, and partners.

#### **Opportunity - Positive Outlook for Global Hardware IT Market**

Logitech stands to benefit from the growing global hardware infrastructure market. According to in-house research, the global IT hardware market was valued at US\$272.1billion in 2018 and is expected to grow to US\$300.6 billion in 2023, at a CAGR of 2%. The client computing & peripherals segment of IT hardware market accounted for 52.7% of market share, followed by server computing with 19.3%, network infrastructure with 13.8%, storage infrastructure with 10.4% and security hardware & appliances with 3.7%. The US is projected to dominate the market with a share of 34.9%, followed by Asia-Pacific (30.4%), Europe (25.5%), Middle East (0.3%), and rest of the world (9%).

# Logitech International SA - Threats

#### **Threat - Intense Competition**

The PC peripherals industry is intensely competitive. It is characterized by short product life cycles, continual performance enhancements, and rapid adoption of technological and product advancements by competitors in the retail market, and price sensitivity in the market. Such increase in competition may lower the price and reduced demand for the company's products. The competitors for PC web cameras offered by the company include Microsoft, Creative Labs and Philips. Its major competitors in PC, mobile entertainment and PC headset market include Plantronics and its Altec Lansing, Creative Labs and Bose Corporation. In audio business, the company faces competition from several small organizations and also from established consumer electronics giants such as Sony and Philips. In the gaming business, competitors of Logitech include CSG International, Pelican Accessories, Mad Catz, and its Saitek subsidiary. Competitors of the company in remotes area include Philips, Universal Remote, Universal Electronics, RCA, and Sony. Many of its competitors have greater marketing resources and brand name recognition than the company. Due to convergence of the markets for computing devices and consumer electronics, competition in the future is expected to intensify.

#### **Threat - Dependence on Third Party Product Sales**

Some of the newly developed products of the company have been designed for use with third-party platforms such as the Apple iPad, iPod, iPhone and Siri, Android phones and tablets, Google Assistant, Amazon Alexa, Microsoft Xbox, Sony PlayStation and Nintendo Wii. The business growth of Logitech is partly dependent on the sales of these products. The company's brands and reputation also depends on third parties such as producers, suppliers, distributors, retailers, product reviewers and the media. However, the business in these categories relies on the availability of access to the platforms of third parties, which could be withdrawn, denied or not be available on terms acceptable to the company. In some cases, Logitech could be required to pay a royalty, to access these third-party platforms. Such a scenario could lower the product margins of the company and affect its profitability.

#### **Threat - Environmental Regulations**

The company's business operations are subject to various environmental regulations in Europe, North America, and Asia-Pacific. In Europe, its operations are restricted for usage of certain hazardous substances in electrical and electronics equipment directive 2011/65/EU (RoHS Directive) of the European Union (EU). China passed the Management Methods for Controlling Pollution by Electronic Information Products, which could restrict import of products for use in China, which contain substances similar to those banned by the RoHS directive. In the US and Canada, the company's operations are subject to the appliance efficiency regulations adopted through the US Energy Independence and Security Act of 2007, the California's Proposition 65, the section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. In Australia and New Zealand, Logitech operations are subject to the compliance of Minimum Energy Performance Standards (MEPS) regulations. Such regulatory restrictions could hamper the production of electrical and electronic goods using certain hazardous substances. This scenario demands accountability in specified collection, recycling, treatment and disposal of past and future covered products by the companies in the industry.

## Section 4 – Company's Recent Developments

# Dec 04, 2019: Logitech commits to ambitious 1.5°C Climate Pledge and 100% Renewable Electricity Goal

Logitech International, an award-winning design company and maker of cloud peripheral products, is extending its commitment to future generations by setting ambitious sustainability goals for its products, packaging, and operations.

Today, Logitech unveils its support of the Paris Agreement, pledging to limit its carbon footprint to support the ambitious 1.5°C goal and for the Company to be powered exclusively by renewable electricity by 2030.

"For more than a decade, Logitech has actively worked to minimize our climate footprint while designing and delivering products that help better the world. As a small company playing in a global market, we appreciate the value of collaboration, and today we are publically committing to being part of global efforts to co-create a more sustainable world, said Bracken Darrell, president and CEO of Logitech. "We recognize that Logitech's growth does not come without an environmental impact and, while we have made progress, we have only just begun our efforts in designing for sustainability.

Logitech commits to support the Paris Agreement, pledging to establish science-based targets to limit its greenhouse gas emissions to support the ambitious 1.5°C trajectory by 2050. The Company is participating in the Science Based Target Initiative (SBTi), and supporting science-based objectives that can be measured across industry and across the globe to affect the real change needed now. As a member of RE100, Logitech commits to source 100% of the Company's global electricity consumption from renewable sources by 2030. The Company is working to hit the target early - it has already achieved 75% renewable electricity consumption due to its early efforts at its Lausanne, Switzerland and Cork, Ireland offices which now run on 100% renewable electricity. The Logitech manufacturing plant in Suzhou, China, is also a certified CarbonNeutral®building through the purchase of renewable electricity and carbon offsets, reducing 17,000 tonnes of carbon each year. Logitech has long tracked and reported on its sustainable efforts and will now formally align with the U.N.'s Sustainable Development Goals (SDGs). This commitment represents a transformational but natural next step in the Company's sustainability journey. Logitech expands beyond carbon-neutral operations to carbon-neutral products. All Logitech gaming products are now certified CarbonNeutral, in accordance with the Carbon Neutral Protocol which is managed by Natural Capital Partners. The carbon footprint of the materials, design, manufacturing, and shipment of all Logitech G and ASTRO Gaming products have been reduced to net-zero emissions. Logitech commits to maintain carbon neutral gaming products and intends to expand the certification to other product categories in the future. Designing For Sustainability

The biggest opportunities to reduce a product's environmental impact come early in the design process when key decisions about a product are made. Logitech's teams across all business groups are integrating environmental impact assessments into new product designs, alongside cost, customer experience, manufacturing, and technical innovation. Each category is exploring how product materials are sourced, assembled, shipped, used and, ultimately, disassembled and recycled. Already the company has converted to sustainable packaging on multiple new Logitech G and MX Master 3 products, started to introduce recycled plastic in its mice, keyboards, and webcams, and removed PVC from new product cables and feasible external parts.

"As an award-winning design company, we are making a pledge to future generations that we will use our leadership in design not only to create a great customer experience but to do so in a way that is sustainable for the planet, continued Darrell. "We want to leave our mark on the future. We know that mark can be positive or negative, depending on the large and small decisions we make every day.

## Section 5 – Appendix

The data and analysis within this report is driven by GlobalData.

GlobalData gives you key information to drive sales, investment and deal making activity in your business.

Our coverage includes 200,000 + reports on 185,000+ companies (including 150,000+ private) across 200+ countries and 29 industries. The key industries include Alternative Energy, Oil & Gas, Clean Technology, Technology and Telecommunication, Pharmaceutical and Healthcare, Power, Financial Services, Chemical and Metal & Mining.

#### Methodology

GlobalData company reports are based on a core set of research techniques which ensure the best possible level of quality and accuracy of data. The key sources used include:

- · Company Websites
- · Company Annual Reports
- SEC Filings
- · Press Releases
- Proprietary Databases

Currency Codes

#### **Ratio Definitions**

#### **Capital Market Ratios**

Capital Market Ratios measure investor response to owning a company's stock and also the cost of issuing stock.

# Price/Earnings Ratio (P/E)

Price/Earnings (P/E) ratio is a measure of the price paid for a share relative to the annual income earned per share. It is a financial ratio used for valuation: a higher P/E ratio means that investors are paying more for each unit of income, so the stock is more expensive compared to one with lower P/E ratio. A high P/E suggests that investors are expecting higher earnings growth in the future compared to companies with a lower P/E. Price per share is as of previous business close, and EPS is from latest annual report.

Calculation: Market Cap / Net Income

Enterprise
Value/Earnings before
Interest, Tax,
Depreciation &
Amortization
(EV/EBITDA)

Enterprise Value/EBITDA (EV/EBITDA) is a valuation multiple that is often used in parallel with, or as an alternative to, the P/E ratio. The main advantage of EV/EBITDA over the PE ratio is that it is unaffected by a company's capital structure. It compares the value of a business, free of debt, to earnings before interest. Price per share is as of previous business close, and shares outstanding last reported. Other items are from latest annual report.

Calculation: {(Market Cap + Debt + Minority Interest + Preferred Stock (Redeemable + Non-Redeemable) - Cash & Cash Equivalents)} / (Operating Income + Depreciation + Amortization)

# Enterprise Value/Sales

Enterprise Value/Sales (EV/Sales) is a ratio that provides an idea of how much it costs to buy the company's sales. EV/Sales is seen as more accurate than Price/Sales because market capitalization does not take into account the amount of debt a company has, which needs to be paid back at some point. Price per share is as of previous business close, and shares outstanding last reported. Other items are from latest annual report.

Calculation: {(Market Cap + Debt + Minority Interest + Preferred Stock (Redeemable + Non-Redeemable) - Cash & Cash Equivalents)} / Revenue

#### **Enterprise**

 $\hbox{ Enterprise Value/Operating Profit measures the company's enterprise value to the operating profit. Price \\$ 

Value/Operating Profit	per share is as of previous business close, and shares outstanding last reported. Other items are from latest annual report.  Calculation: {(Market Cap + Debt + Minority Interest + Preferred Stock (Redeemable + Non-Redeemable) - Cash & Cash Equivalents)} / Operating Income
Enterprise Value/Total Assets	Enterprise Value/Total Assets measures the company's enterprise value to the total assets. Price per share is as of previous business close, and shares outstanding last reported. Other items are from latest annual report.  Calculation: {(Market Cap + Debt + Minority Interest + Preferred Stock (Redeemable + Non-Redeemable) - Cash & Cash Equivalents)} / Total Assets
Dividend Yield	Dividend Yield shows how much a company pays out in dividends each year relative to its share price. In the absence of any capital gains, the dividend yield is the return on investment for a stock.  Calculation: Annual Dividend per Share / Price per Share
GlobalData	

Equity Ratios				
These ratios are based on	per share value.			
Earnings per Share (EPS)	Earnings per share (EPS) is the portion of a company's profit allocated to each outstanding share of common stock. EPS serves as an indicator of a company's profitability.  Calculation: Net Income / Weighted Average Shares			
Dividend per Share	Dividend is the distribution of a portion of a company's earnings, decided by the board of directors, to a class of its shareholders.			
Dividend Cover	Dividend cover is the ratio of company's earnings (net income) over the dividend paid to shareholders. Calculation: Earnings per share / Dividend per share			
Book Value per Share	Book Value per Share measure used by owners of common shares in a firm to determine the level of safety associated with each individual share after all debts are paid accordingly.  Calculation: {Shareholders Equity - Preferred Stock (Redeemable + Non-Redeemable)} / Outstanding Shares			
Cash Value per Share	Cash Value per Share is a measure of a company's cash (cash & equivalents on the balance sheet) that is determined by dividing cash & equivalents by the total shares outstanding.  Calculation: Cash & equivalents / Outstanding Shares			
GlobalData				

Profitability	<sup>,</sup> Ratios
---------------	---------------------

Profitability Ratios are used to assess a company's ability to generate earnings, based on revenues generated or resources used. For most of these ratios, having a higher value relative to a competitor's ratio or the same ratio from a previous period is indicative that the company is doing well.

Gross Margin	Gross margin is the amount of contribution to the business enterprise, after paying for direct-fixed and direct-variable unit costs.  Calculation: (Gross Profit / Revenue)*100
Operating Margin	Operating Margin is a ratio used to measure a company's pricing strategy and operating efficiency.  Calculation: (Operating Income / Revenue) *100
Net Profit Margin	Net Profit Margin is the ratio of net profits to revenues for a company or business segment - that shows how much of each dollar earned by the company is translated into profits.  Calculation: (Net Profit / Revenue) *100
Profit Markup	Profit Markup measures the company's gross profitability, as compared to the cost of revenue.  Calculation: Gross Income / Cost of Revenue
PBIT Margin (Profit	Profit Before Interest & Tax Margin shows the profitability of the company before interest expense &

Before Interest & Tax)	taxation. Calculation: {(Net Profit+Interest+Tax) / Revenue} *100
PBT Margin (Profit Before Tax)	Profit Before Tax Margin measures the pre-tax income over revenues.  Calculation: {Net Income Before Tax / Revenue} *100
Return on Equity	Return on Equity measures the rate of return on the ownership interest (shareholders' equity) of the common stock owners.  Calculation: (Net Income / Shareholders Equity)*100
Return on Capital Employed	Return on Capital Employed is a ratio that indicates the efficiency and profitability of a company's capital investments. ROCE should always be higher than the rate at which the company borrows; otherwise any increase in borrowing will reduce shareholders' earnings.  Calculation: Operating Income / (Total Assets – Current Liabilities) * 100
Return on Assets	Return on Assets is an indicator of how profitable a company is relative to its total assets, the ratio measures how efficient management is at using its assets to generate earnings.  Calculation: (Net Income / [Current Year Total Assets + Last Year Total Assets)/2])*100
Return on Fixed Assets	Return on Fixed Assets measures the company's profitability to its fixed assets (property, plant & equipment).  Calculation: (Net Income / [Current Year Fixed Assets + Last Year Fixed Assets)/2]) * 100
Return on Working Capital	Return on Working Capital measures the company's profitability to its working capital.  Calculation: {Operating Income / (Current Assets-Current Liabilities)} * 100
GlobalData	

Cost Ratios	
Cost ratios help to understand the costs the company is incurring as a percentage of sales.	
Operating costs (% of Sales)	Operating costs as percentage of total revenues measures the operating costs that a company incurs compared to the revenues.  Calculation: (Operating Expenses / Revenue) *100
Administration costs (% of Sales)	Administration costs as percentage of total revenue measures the selling, general and administrative expenses that a company incurs compared to the revenues.  Calculation: (Administrative Expenses / Revenue) *100
Interest costs (% of Sales)	Interest costs as percentage of total revenues measures the interest expense that a company incurs compared to the revenues.  Calculation: (Interest Expenses / Revenue) *100

#### Liquidity Ratios

GlobalData

Liquidity ratios are used to determine a company's ability to pay off its short-terms debts obligations. Generally, the higher the value of the ratio, the larger the margin of safety that the company possesses to cover short-term debts. A company's ability to turn short-term assets into cash to cover debts is of the utmost importance when creditors are seeking payment. Bankruptcy analysts and mortgage originators frequently use the liquidity ratios to determine whether a company will be able to continue as a going concern.

mortgage originators frequently use the liquidity ratios to determine whether a company will be able to continue as a going concern.	
Current Ratio	Current Ratio measures a company's ability to pay its short-term obligations. The ratio gives an idea of the company's ability to pay back its short-term liabilities (debt and payables) with its short-term assets (cash, inventory, receivables). The higher the current ratio, the more capable the company is of paying its obligations. A ratio under 1 suggests that the company would be unable to pay off its obligations if they came due at that point.  Calculation: Current Assets / Current Liabilities
Quick Ratio	Quick ratio measures a company's ability to meet its short-term obligations with its most liquid assets.

	Calculation: (Current Assets - Inventories) / Current Liabilities
Cash Ratio	Cash ratio is the most stringent and conservative of the three short-term liquidity ratio. It only looks at the most liquid short-term assets of the company, which are those that can be most easily used to pay off current obligations. It also ignores inventory and receivables, as there are no assurances that these two accounts can be converted to cash in a timely matter to meet current liabilities.  Calculation: {(Cash & Bank Balance + Marketable Securities) / Current Liabilities)}
GlobalData	

#### Leverage Ratios

Leverage ratios are used to calculate the financial leverage of a company to get an idea of the company's methods of financing or to measure its ability to meet financial obligations. There are several different ratios, but the main factors looked at include debt, equity, assets and interest expenses.

assets and interest expenses.	
Debt to Equity Ratio	Debt to Equity Ratio is a measure of a company's financial leverage. The debt/equity ratio also depends on the industry in which the company operates. For example, capital-intensive industries tend to have a higher debt-equity ratio.  Calculation: Total Debt / Shareholders Equity
Debt to Capital Ratio	Debt to capital ratio gives an idea of a company's financial structure, or how it is financing its operations, along with some insight into its financial strength. The higher the debt-to-capital ratio, the more debt the company has compared to its equity. This indicates to investors whether a company is more prone to using debt financing or equity financing. A company with high debt-to-capital ratios, compared to a general or industry average, may show weak financial strength because the cost of these debts may weigh on the company and increase its default risk.  Calculation: {Total Debt / (Total Debt + Shareholders Equity)}
Interest Coverage Ratio	Interest Coverage Ratio is used to determine how easily a company can pay interest on outstanding debt, calculated as earnings before interest & tax by interest expense.  Calculation: Operating Income / Interest Expenses

GlobalData

#### **Efficiency Ratios**

Efficiency ratios measure a company's effectiveness in various areas of its operations, essentially looking at maximizing its use of resources.	
Fixed Asset Turnover	Fixed Asset Turnover ratio indicates how well the business is using its fixed assets to generate sales. A higher ratio indicates the business has less money tied up in fixed assets for each currency unit of sales revenue. A declining ratio may indicate that the business is over-invested in plant, equipment, or other fixed assets.  Calculation: Revenue / [Current Year Fixed Assets + Last Year Fixed Assets)/2]
Asset Turnover	Asset turnover ratio measures the efficiency of a company's use of its assets in generating sales revenue to the company. A higher asset turnover ratio shows that the company has been more effective in using its assets to generate revenues.  Calculation: Revenue / [Current Year Total Assets + Last Year Total Assets)/2]
Current Asset Turnover	Current Asset Turnover indicates how efficiently the business uses its current assets to generate sales.  Calculation: Revenue / [Current Year Current Assets + Last Year Current Assets)/2]
Inventory Turnover	Inventory Turnover ratio shows how many times a company's inventory is sold and replaced over a period. A low turnover implies poor sales and, therefore, excess inventory. A high ratio implies either strong sales or ineffective buying.  Calculation: Cost of Goods Sold /[Current Year Inventory + Last Year Inventory)/2]
Working Capital Turnover	Working Capital Turnover is a measurement to compare the depletion of working capital to the generation of sales. This provides some useful information as to how effectively a company is using its working capital to generate sales.

	Calculation: Revenue / (Current Assets – Current Liabilities)
Capital Employed Turnover	Capital employed turnover ratio measures the efficiency of a company's use of its equity in generating sales revenue to the company.  Calculation: Revenue / (Total Assets – Current Liabilities)
Capex to sales	Capex to Sales ratio measures the company's expenditure (investments) on fixed and related assets' effectiveness when compared to the sales generated.  Calculation: (Capital Expenditure / Revenue) *100
Net income per Employee	Net income per Employee looks at a company's net income in relation to the number of employees they have. Ideally, a company wants a higher profit per employee possible, as it denotes higher productivity.  Calculation: Net Income / No. of Employees
Revenue per Employee	Revenue per Employee measures the average revenue generated per employee of a company. This ratio is most useful when compared against other companies in the same industry. Generally, a company seeks the highest revenue per employee.  Calculation: Revenue / No. of Employees
Efficiency Ratio	Efficiency Ratio is used to calculate a bank's efficiency. An increase means the company is losing a larger percentage of its income to expenses. If the efficiency ratio is getting lower, it is good for the bank and its shareholders.  Calculation: [Non-interest expense / (Net Interest Income + Non-Interest Income)] * 100
GlobalData	

#### Notes

- · Financial information of the company is taken from the most recently published annual reports or SEC filings
- · The financial and operational data reported for the company is as per the industry defined standards
- Revenue converted to USD at average annual conversion rate as of fiscal year end

#### About GlobalData

GlobalData is one of the world's leading providers of company operational data and strategic analysis, providing detailed information on tens of thousands of companies globally. Our highly qualified team of Analysts, Researchers, and Solution Consultants use proprietary data sources and various tools and techniques to gather, analyze and represent the latest and the most reliable information essential for businesses to sustain a competitive edge. Data is continuously updated and revised by large teams of research experts, so that it always reflects the latest events and information. With a large dedicated research and analysis capability, GlobalData employs rigorous primary and secondary research techniques in developing unique data sets and research material for this series and its other reports. GlobalData offers comprehensive geographic coverage across world's most important sectors, focusing particularly on energy and healthcare.
