

## Hightower

The Juicy Pendant is an elegant modern pendant comprised of three components (wire, cone, and shade) that fit smoothly together to create a striking whole. A subtle polycarbonate ring breaks the surface as the cone meets the shade, allowing light to illuminate the surface of the pendant. Finished off with a honeycomb diffuser to concentrate and soften the light, creating a warm and inviting glowing - regardless of whether you use a traditional low-energy light source or the newest LED alternatives. 6m cord standard in matching color.
