

Kona Perch

Between a touchdown space, and a soft lounger that supports a more upright posture; Kona Perch rethinks the way we use traditional benches or stools. USB and power ports facilitate a more functional touchdown space, and handles allow for maneuverability around a workspace. The simplicity of form allows a more relaxed approach to the postures we use at a bar height work environment and takes shared spaces to the next level. Due to the popularity of the Kona Pouf, we have extended the Kona family to include a new category--perch seating. The well-known mobility of the Kona Pouf has carried over and now that we've included a power port, Kona Perch is sure to be a fast favorite.
