

App version 4.5

Changes to our terms and policies

We have always been committed to protecting your privacy and your data. The European Union's General Data Protection Regulation has prompted us to review our policies and make sure that we are doing the right thing for all of our users worldwide.

- We have made it easier to understand what types of data we collect and how we use your data.
- As part of our new data-retention policy, we will now delete accounts that have been inactive for more than one years and where the user has never engaged in any meaningful activity.
- We may send account-related email messages that are triggered by your app activity, such as welcome emails, notifications and reminders.
- For the purposes of the General Data Protection Regulations (GDPR), your name, callsigns, email address and QSOs personal data stored in iDX cloud database. Under article 47 of the regulation, a legitimate interest exists. You can review your personal data and edit it using the features of iDX app (for example, the iDX Account in side bar menu). If you wish to remove your personal data, you can delete your account from the iDX Account in side menu the app.

Account Registration

Although the App provides for anonymous and pseudonymous participation, in some instances in order to use certain services, is require an account registration.

- This requires a first name or radio name associated with your account, your callsign an email address at which we can contact you when you change password, email.
- After creating your account, the call sign provided by your country's legal authority will be verified.
- Your callsign is the registration key, it can not be changed. If you receive a new callsign, you must create a new user and delete the previous one. Before deleting an account, make sure that a copy of your data as a Logbook has been made. Deleted data can not be recovered.
- The iDX App uses the security login that involves (SSL encryption). This process is managed by Google Cloud Platform. Your password is also managed by Google Cloud Platform *Firebase, in such a way that it is not even possible for the database administrator to inadvertently find your password. You are encouraged though, to create a secure password and keep it in safe place. Avoid predictable or easily guessed passwords. Never share your account with someone else. Use of account information: your user account information will always be carefully protected
- Accounts with unauthorized callsign, inactive or expired, may be blocked or deleted without prior notice.
- This account may only be used by licensed Amateur Radio.

Information Collected Automatically

iDX App receives and records information from your mobile device when you use the App, such as your Internet Protocol (IP) address and unique device identifier. Cookies and data about which modules you visit on our app allow us to optimize the Services we provide to Amateur Radio operator.

Information collected with the user authorization.

To facilitate the reinstallation of the app, or use your account on another device you may also choose to store data in the iDX Cloud, the

current configuration, screen settings, search history, preference, grid locator and login data to service providers such as ClubLog.

if you do not choose this option, the settings has been kept in the local database of your device.

The real-time location data provided by your device (GPS) is used only internally to provide antenna azimuth. If you prefer to keep automatic global positioning disabled you can store your grid locator or coordinates on your device to get this information. The Grid Locator or latitude and longitude coordinates will not be shared with others without your authorization. In order to accurately target antennas, iDX App maintains a second database of station locators, obtained through published lists, dx cluster, dx pedition ads and or informed by users. The accuracy of this information on the map will always be that of the center point of the 6-digit grid-locator.

About iDX Logbook

I consider it important that only the owner of a log can see the QSOs within that log, and iDX logbook follows this principle. However, part of the purpose of iDX app is to analyse and report about new one country, CQ zone or anothers useful information to Dx'ers, for example, to create propagation paths and possible indicatives currently available to some online users. This is done by analysing as many QSOs as possible, including those you upload. Please be sure you are happy with this before you join to logbook.

Important: Consider when you using idx logbook, that you should keep an active backup on your personal computer, avoiding possible data loss and or interruption of the iDX Logbook service.

★ This is an auxiliary feature. keep your logbook of your choice on your personal computer and periodically export the contacts registered in iDX. Limited to 100 records.

Sending DX Spots

The user is responsible when send comments through the dxcluster system via telnet provided by iDX, many other nodes collect spots around the world, however the data sent through the iDX, are kept in own file with information of origin and responsible for information.

Information provided by the user

All the information posted by iDX users on iDX NOW or other shared module within the app is under the responsibility of that who had provided the information. The iDX App is not responsible by any means for the content posted by third parties. If any public information from the Internet is used, it must contain credits and/or authorization, whenever applicable

Storage location

All data stored and generated by the iDX application uses the virtual machine database (VMs) and Compute Engine provided and hosted by Google Cloud Platform.

Development, Management and Maintenance of Services

The app development, management and expenses with these platforms are maintained, exclusively by Amateur Radio PY4OG J.Marcio.

So far, this application is not commercial, the possible reference of a company does not mean that it is linked to this purpose. Possible virtual space usage is courtesy of the developer.

All versions of the iDX app maintains serious policies of software distribution, every version of application is reviewed and only after approved by the rigorous selection managed by Apple will be available on the AppStore.

You can contact J.Marcio, PY4OG if you have concerns about the security of your personal data.
