

Online certificate course

Data Analyst (IHK)

Maximising the potential of data for the company

LearningTogetherOnline

Qualification for specialists

What it's about

Data is the basis of digitalisation. In almost all sectors, there is a demand for specialists who can leverage this "capital" and utilise it in a targeted manner to make work and business processes more efficient and innovative, and to further develop value creation.

Who is it for?

the course is conducted in English.

Benefits for participants and companies

- analyse the **potential of using data** to optimise work and business processes in a practice-oriented way
- promote data-supported decisions, e.g. in production, marketing or logistics
- contribute to **increasing competitiveness**
- design and implement company-specific data projects
- improve their career prospects through innovation

Registration

Please register via your IHK or your IHK training center.

Technical requirements: Up-to-date operating system with soundcard/sound output and connection for headset // headphones with microphone (headset), webcam // Internet access with min. 0.6 Mbps downstream and at least 1 Mbps upstream (can be verified in the router or under Settings/Network Speed) // Up-to-date version of an HTML5 browser (e.g. Chrome, Firefox) // Included in the course: Exercises that are carried out with an analytics platform and a BI tool. A download (free of charge) is required to use both applications. A Microsoft environment is required for the BI tool. Mac users need to install a virtual environment. // Participants can access the virtual classroom via a link.

Privacy information: In accordance with the requirements of the applicable data protection provisions, the IHK or the IHK training center stores and processes personal data required for registration in accordance with the requirements of applicable data protection regulations. This data is disclosed to service providers of the organisation solely for the purpose of conducting online training.

Online certificate course

Data Analyst (IHK)

Maximising the potential of data for the company

Scope and contents (selection)

Online-Kick-off event, five training modules and a final test with a total of **57 training hours as live online training** and approx. 26 training hours as a module-accompanied self-study programme.

Kick-off event	Technology check, participants' expectations and introduction to the course programme
Basics of Data Analytics - ETL Process	Use tasks and function of data analytics, visual analyt- ics tools, organise and document data processes
Visual Analysis and Reporting - BI Tools	Familiarise yourself with the tasks and functions of visual analyses and reporting, use BI tools safely, visual- ise content and data efficiently and comprehensibly
Advanced Data Ana- lytics - Databases, Machine Learning, Workflow Control	Work confidently with databases, understand ma- chine learning and its potential, develop data models for machine learning, apply methods for workflow control
Data Projects - Evalu- ate, Plan, Implement	Planning and communicating data projects, convey project parameters and goals transparently, agile methods for greater project efficiency
Practical Training	Apply data analytics in (your own) professional context, identify sources of information for further development and potential for improvement through data analytics and take steps to exploit this potential
IHK certificate test (online)	Short presentation of (your own) data analytics project including discussion and final talk (approx. 50 minutes in total). Small groups with several partici- pants can be formed.

Online certificate course

- Centralised implementation with experienced online trainers
- Varied blended learning concept for optimal learning success
- Nationally recognised IHK certificate (in German and English) incl. digital IHK badge for social media profiles, email signature, etc.
