Together, let's stop COVID-19 one arm at a time

The COVID-19 vaccines are safe, effective and approved by Health Canada.

Improved technology, worldwide collaboration, and increased government funding helped speed up the development of the vaccines.

The vaccine works to:
Recognize the virus	Destroy the infected cells	Produce antibodies to fight the virus	Remember the virus and how to fight it, if you are exposed to it again

Talk to a health care provider in your community, if you have questions about the vaccine.
