Algorithms of Late Capitalism

Things We Taught the Machines To Do Vol. 1
January 2020, Barcelona Spain
Editors: Internet Teapot (Adriaan Odendaal & Karla Zavala)

“human decisions are now being made on the basis of apparatus decisions”

– Vilém Flusser

Algorithms of Late-Capitalism

Vol. 1
“Things We Taught the Machines to Do”

Machines aren't malevolent. Computers aren't cruel. Algorithms aren't evil.

Not on purpose, anyway.

When we talk about technology being biased, socially corrosive, or downright exploitative, we are actually talking about what the humans behind the tech programmed it to do. Be it through naïve techno-positivism, Silicon Valley hubris, corporate greed, or all of the above. The problem, of course, is that technology is always a force multiplier. When we make machine learning software that categorizes people based on available cultural data, we get anti-Semitic Facebook algorithms, racist search engines, or corporations using behavioural marketing to sway public opinion about global warming on an unprecedented scale.

When we talk about machines being malevolent, computers being cruel, or algorithms being evil, we are really saying: Look what we taught the machines to do.

9 Kids Can Interact With A New Sex Doll With A "Family Mode" Setting

...in 2018 one company rolled out a sex doll named Samantha that made the semi-robotic sex doll even more controversial. Samantha comes with a "family mode" setting which does back everything talk to her. Apparently some families who own a sex doll like to play with the doll and even say the doll feels...

Rubgrub

Get it, and get chuffed!

How to set up RubGrub

- Download RubGrub to your iPhone or Android.
- Add Wi-Fi, Bluetooth and location services to your phone.
- Put pizza & other food items in your RubGrub! Food will be delivered to your phone.

RubGrub is a programmable robot with camera that is on your phone and pairs with your RubGrub (a pizza robot). When you address and connect device in the app and choose what you're eating. When that pizza will appear to be magically in one click.
