Plasson

Grindex

Grindex was founded in 1940. Since 1960, dedicated solely to develop absolutely the best quality electrical submersible pumps-designed without compromise for professional users the world over. The range includes a pump for every need: drainage, sludge and slurry, in most challenging environments imaginable.

Grindex brand is a world leader in electrical submersible pump technology for demanding applications such as construction, mining and heavy industry. The pumps are known for their high reliability, durability and dependability. Thanks to the built-in motor protection and the air valve, the pumps can run unsupervised for longer periods, and even run dry for a length of time.

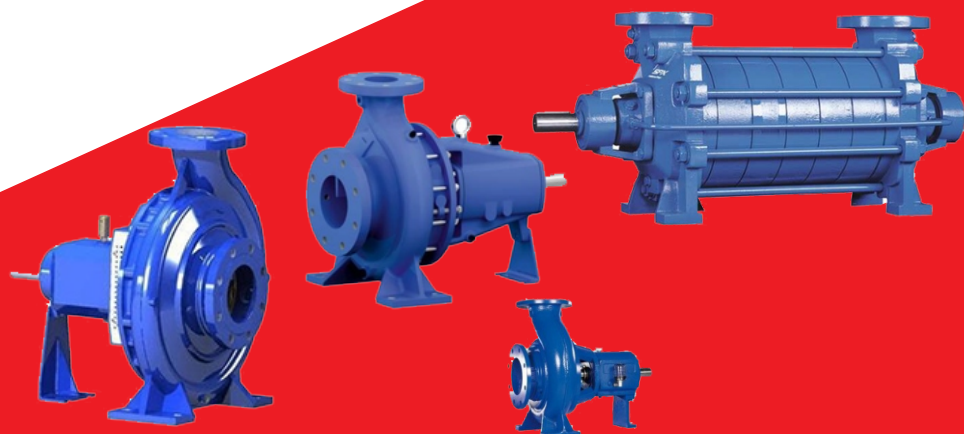

Curo Pumps

CURO PUMPS was established in 1980 with the clear intention to epitomize excellence in the centrifugal pump environment. Our commitment to client service, hands-on approach, and continual improvement have earned us fast growth and expansion of our service and product portfolio.

We currently service clients across the African continent and worldwide in countries that include Malaysia, Siberia, Indonesia, Vietnam, Saudi Arabia, Australia, The United Kingdom, Canada, Kazakhstan and Russia, Ghana, Malawi, Zambia, Namibia, Botswana, Lesotho, Zimbabwe, and Tanzania, to mention but a few.

CURO PUMPS has an unrelenting quest for excellence and continual improvement. All our operational systems are aligned to local SABS and international ISO 9001:200.

Bray

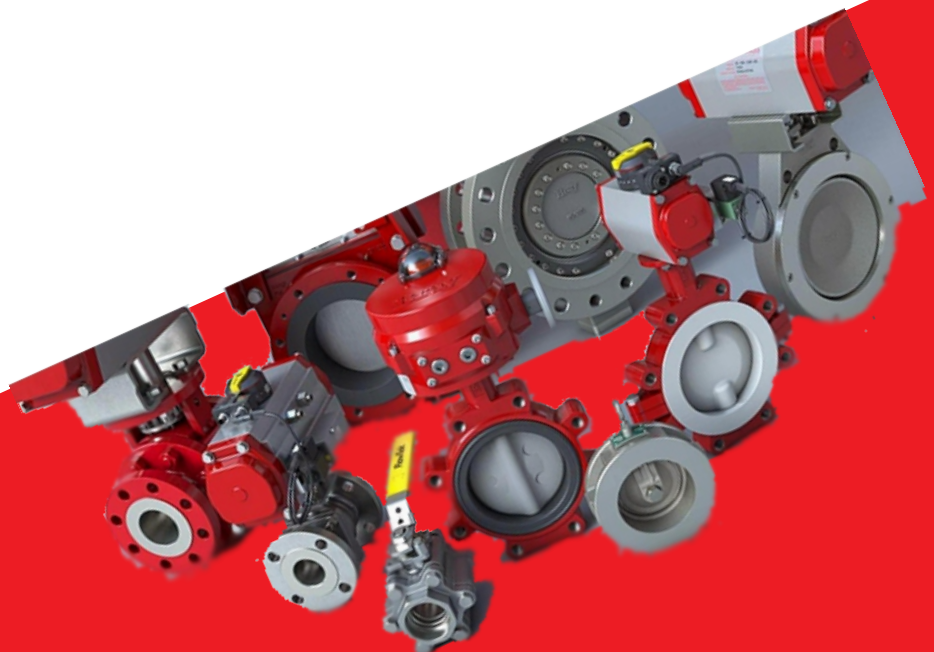

Bray International, Inc. is a High-Performance Company with over 30 years of continued success and global operations in over 40 countries, Bray is one of the premier manufacturers of flow control and automation products and accessories in the world.

Our modular product line of valves, actuators and accessories offer the best compatibility, economy and quality performance in the flow control industry.

Bray's extensively trained staff is knowledgeable in all aspects of flow control technology and provide personal attention to every customer.

Our performance tested products are in compliance with a variety of global certifications and approvals, including Lloyd's Register, UL, ABS and more.

Aes Seal

At AESSEAL is company located in UK, we design and manufacture sealing solutions for a sustainable future.

We combine both our own success with environmental protection and being a good corporate citizen.

AESSEAL is a member of the European Sealing Association. AESSEAL® has adopted the European Foundation for Quality Management (EFQM) model. Promoting best practice, it includes measures in all key business areas including resources, people management and customer satisfaction. AESSEAL is certified to ISO 9001, ISO 14001, ISO/IEC 20000-1:2018, ISO/IEC 27001:2013, ISO/TS 29001:2010, ISO 37001:2016, ISO 45001:2018 and ISO 50001 for our Global Headquarters and selected global locations.

Accreditations and awards are pertaining to AESSEAL plc (UK) unless otherwise stated.

Lattytex

GROUPE LATTY major, an internationally recognised stakeholder in the field of industrial sealing: mechanical seals, packings, static sealing rings. GROUPE LATTY helps its customers to incorporate the technical innovations demanded by an increasingly competitive environment with the Innovation as the driver for over 100 years.

Our production site is located in Brou, in Eure-et-loir (France) over more than 10,000 sq.m. Men and women contribute to expertise that has been built up over the company's century of existence.

Our development relies on the competence of our teams and the marketing of innovative products. We offer a broad range of jobs in various fields. Our production site located near Chartres, in Eure et Loir (France) has state-of-the-art structure. Our network of subsidiaries offer career prospects in all the above-mentioned areas.

Plasson Coupling

The PLASSON Way as a leading company in its field, one that emerged from the principles quality and partnership, PLASSON has implemented these values in its day-to-day way of doing business since its establishment. We are proud of our legacy and our success, which we attribute first of all to our employees worldwide, to all our business partners, and to the mutual commitment between PLASSON and the communities where we live.

PLASSON has built a reputation as a manufacturer of high quality products, meeting the strictest standards in its areas of activity. Quality is the key concept in all of PLASSON'S processes, from development and design through production, assembly, packaging, distribution, delivery, and after-sales services.

With over fifty years of experience in product development, we constantly aim to develop added value and stand at the forefront of technology in the development of innovative products and solutions to suit the ever-evolving needs of our customers.

We place great emphasis on providing the best services to our customers. The PLASSON Group facilitates the exchange of the most innovative practices and knowledge across all countries and segments. In all our manufacturing sites and subsidiaries across the world, PLASSON teams strive for operational excellence and efficiency in delivering the best and most efficient service.
