Panhandle Health District I
On-Site Sewage System Application 01-09-0455

A site evaluation is not an approval or a permit to install a septic system. Permit approval depends on the following: Site evaluation approval, the predicted maximum daily sewage flow; house size and location; well / spring location; surface water locations; changes to native soil (road cuts, grading, benching); distance to neighboring structures (wells, buildings, drainfields); proposed land use; soil quality; other issues of concern.

Permits to construct a septic system are not granted until all such issues are addressed and / or submitted in writing as part of the plot plan / permit application AND found to be consistent with current regulations.

**ANY CHANGES TO THE SITE OR CONDITIONS OF THE APPLICATION AFTER
ISSUANCE OF THE PERMIT MAY RENDER THE PERMIT INVALID.**

Enclosed please find your On-Site Sewage System Permit. This permit includes three sections.

- Section One - The first section is the actual On-Site Sewage System Permit. This permit is an approval for **construction** of the sewage system. Final approval of the permit is given after a final inspection has been done.
- Section Two - The second section is a **Installer's Copy** of the permit. If you have hired a licensed installer, this is the portion of the permit which provides them with the necessary information to install the system properly. As they are licensed, they should already know all separation distances listed on the permit.
- Section Three - The third section of the permit is an **As-Built**. A drawing / plot plan of how the system was built with reference points to permanent structures should be made. This will be filed with your permit at the health district for future reference. You may wish to copy this for your own records as well.

If you have any further questions about the permit please contact the Environmental Health Specialist listed at the bottom of the permit.

• Commercial - Industrial Review • Daycare • Environmental Health Education • Epidemiology (Animal Bites, Food Borne Illnesses, Water Borne Illness, Vector Borne Illness)
• Food Establishments (Permits, Inspection) • Geographical Information System • Hazardous Materials (Lead, Radon) • Indoor Air Quality • Land Development
• Lead Health Program • Mortgage Surveys • Non-Domestic Waste Water • Public Pools • Public Water Systems • Public Health Nuisances • Rathdrum Aquifer Protection
• Sewage Pumpers (Permits, Inspections) • Shoshone Co. Institutional Control Program • Subsurface Sewage (Permits, Inspections) • Vectors

Panhandle Health District I ON-SITE SEWAGE SYSTEM PERMIT

Septic Permit # SP 01-09-0455

Issue Date 2/27/2002

This permit is valid for one year from issue date for an individual subsurface sewage disposal system for:

Parcel # 007720000040A, Township 55N, Range 03W, Section 5, Boise Meridian; Lot 4, Block of AHAUB ACRES; a 6.40 acre plot currently belonging to CAROL R. BYRON. The system has been sized for a 1800 square foot single family residence with 2 bedrooms and 2 baths.

The following conditions are placed upon the permit:

SEPTIC TANK-

- Tank Capacity will be at least 0 gallons
***It is recommended that the tank capacity be increased 50% due to utilization of a Garbage, Disposal or tank pumping frequency increased to annually.

DRAINFIELD (& replacement area)-

- Drainfield size will be at least 300 square feet

CONDITIONS-

No parking, driving, structures or livestock over the drainfield or replacement area.
Maintain all separation distances listed on the permit and/or listed within the Technical Guidance Manual for Individual and Subsurface Sewage Disposal. Septic tank not being replaced--tank pumped by Endicott and baffles found to be OK--Garbage disposal removed from kitchen

SEPARATION DISTANCES:

- Distance of tank from dwelling foundation - 5 feet minimum
- Distance of tank from well - 50 feet minimum
- Distance of tank from private water lines - 10 feet minimum
- Distance of tank from public water lines - 25 feet minimum
- Distance of field from property line - 5 feet minimum
- Distance of field from dwelling foundation - 20 feet minimum
- Distance of field from well - 100 feet minimum
- Distance of field from surface water - 200 feet minimum
- Distance of field from septic tank - 6 feet minimum
- Distance of field from water lines - 25 feet minimum
- Drainfield must not exceed 4 feet in depth unless specified alternative system

Permit Issued by  , Environmental Health Specialist

Lorne E. Braun

Final Approval of this Permit requires inspection of the system in the ground, uncovered, and submittal of a plot plan distinguishing system construction specifications and final layout including location on the plot with respect to other permanent structures. To Schedule a final Inspection call the number listed below.

Note: These tracts may not be further subdivided without written approval of the Planning and Zoning Coordinator and County Commissioners.

As-Built Plans and Specifications

We require as-built plans on all installations so that current and future owners can locate and maintain their sewage systems and avoid disrupting them with buildings, driveways, etc. as outlined in *Rules for Individual and Subsurface Sewage Disposal Systems*, Section 16.01.03.005,15. An accurate drawing depicting actual construction must be submitted to Panhandle Health District within thirty (30) days of an approved final inspection.
