If the answer to any of the items in Section 3 is yes, explain (attach additional sheets if necessary):

(Water Damage Not Due to a Flood Event) Freak accident not caused by any building issues: The A unit (shared western wall) had Best Buy installing a flat screen TV. The installer was informed of a water line behind the wall and ignored the homeowners instructions, drilling into the steel plate covering the line, then continuing and hitting the line. The result was a water incursion from Unit A impacting some of the floor board and behind a limited area of shared wall. Paul Davis water remediation was called in and everything was quickly dried out, there was no mold or any further issues. A small amount of sheet rock and flooring was replaced out of an abundance of caution. I then used the opportunity to replaced the wood floor in the kitchen and entry way (two high traffic/dirt prone areas) with Terazzo marble stone which ended up being an upgrade both functionally and visually
