

About AEGIS

AEGIS integrated security solutions and service

Overview

- **Aegis:** A joint venture corporation established in 2024.
- **Founding Partners:** AEGIS (MID), CCS, MTI, and Cube.
- **Focus Areas:** Infrastructure, security, and advanced technology sectors.
- **Core Strength:** Combines expertise from strategic partners to deliver innovative and comprehensive solutions.

Vision

- Aspire to be a global leader in integrated solutions.
- Enhance security, operational efficiency, and technological advancement for governments, businesses, and individuals.

Mission

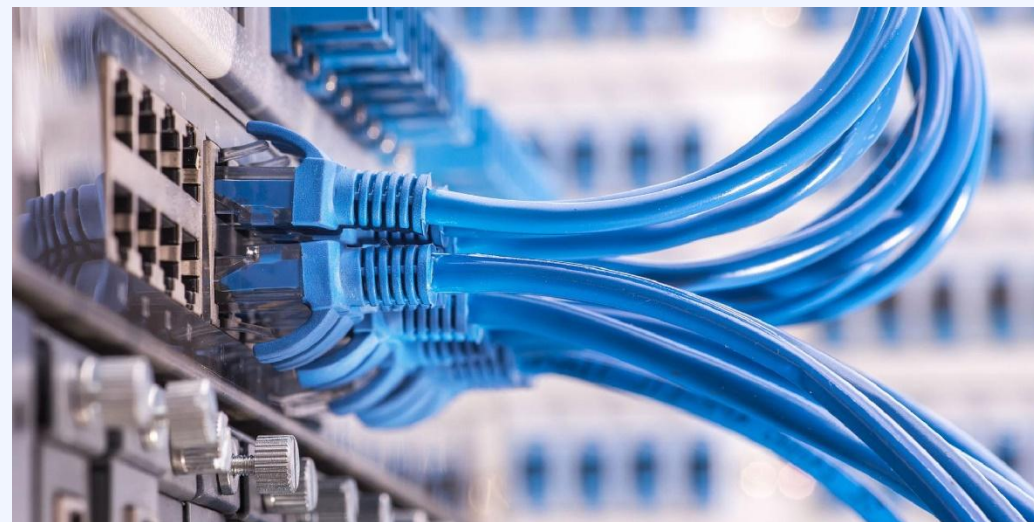

- Provide state-of-the-art products and services by merging diverse expertise.
- Leverage cutting-edge technology to address evolving defense and security challenges.
- Emphasize innovation, collaboration, and a dedication to excellence.

Company Core Competencies

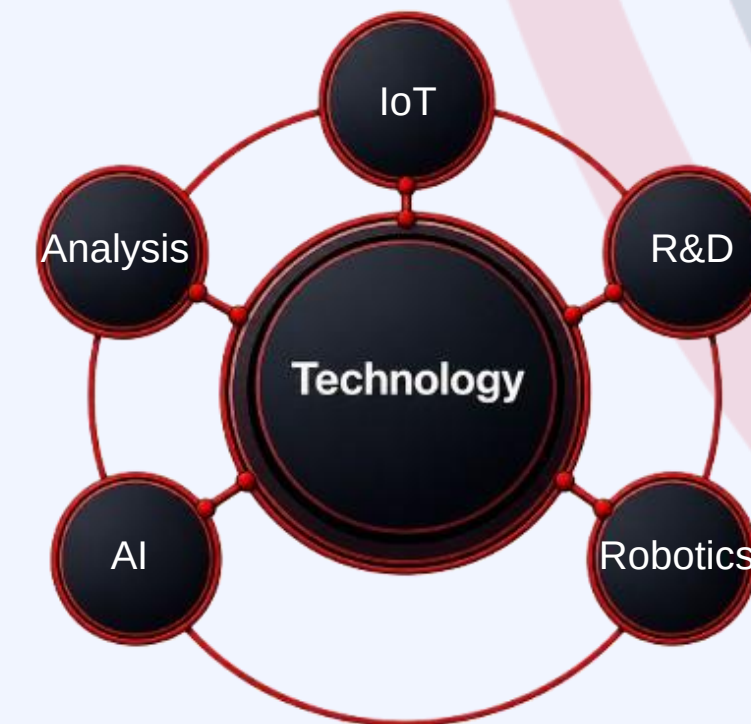

Physical Security & Integration

Network Infrastructure

Security Defense Solutions

Technology Development

AEGIS Areas of Expertise

1

Surveillance and Low-Current Systems

- Surveillance and Low-Current Systems involve the deployment of CCTV, alarm, and communication systems to monitor activities and support safety, security, and efficient building operations.

2

Integrated Security Solutions

- Solutions combine multiple security systems—such as surveillance, access control, and intrusion detection—into a unified platform for enhanced protection, monitoring, and centralized management

3

Networking and Infrastructure Solutions

- Solutions encompass the design, deployment, and management of reliable IT networks and systems that ensure seamless connectivity, performance, and scalability across an organization.

4

Access Control Systems

- security solutions that regulate and monitor who can enter or exit a facility or restricted area, ensuring only authorized individuals gain access.

5

Perimeter Security Systems

- Integrated solutions designed to detect, monitor, and prevent unauthorized access to the outer boundaries of a property or facility.

6

Software Development and AI Integration

- Custom software and artificial intelligence applications for enhanced security.

AEGIS Areas of Expertise

7 Automation and Control Systems

- Smart solutions for industrial and security automation.

8 Security Defense Solutions

- Deliver advanced, mission-critical technologies and integrated systems designed to protect military assets, critical infrastructure, and personnel against sophisticated threats and hostile operations.

9 Operation and Maintenance Services

- Ensuring long-term performance and efficiency of security systems.

10 Specialized Security Consulting

- Expert advice across all aspects of security systems and technologies.

AEGIS R&D and Future Goals

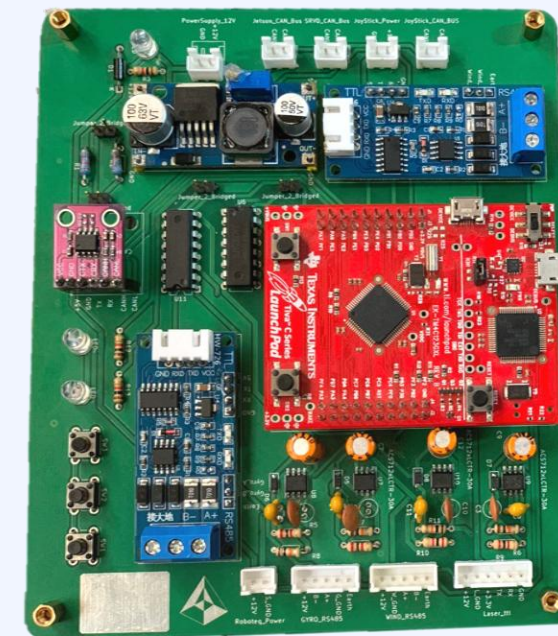

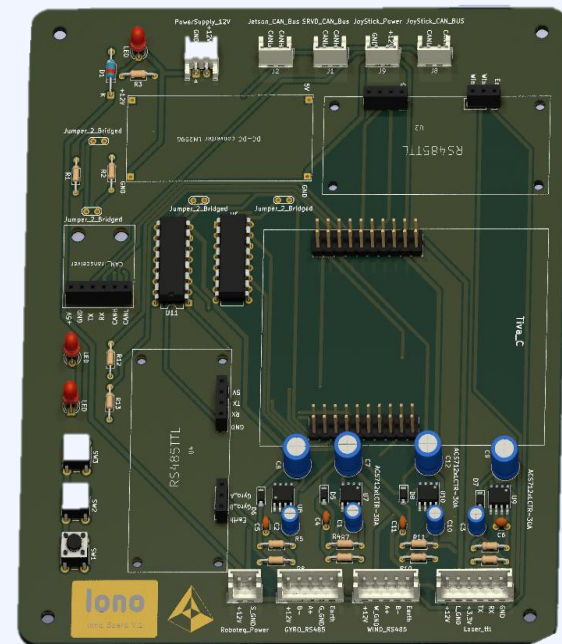

Access control gates – R&D

Design and build of vehicle and pedestrian gates.

Access control gates – Future Goals

- Aegis aspires to expand its reach into international markets, develop proprietary technologies, and contribute to shaping the future of global defense and security.
- The availability of manufacturing capabilities enables the development of the alliance's future potential for local production, thereby reducing reliance on dollar-based components.

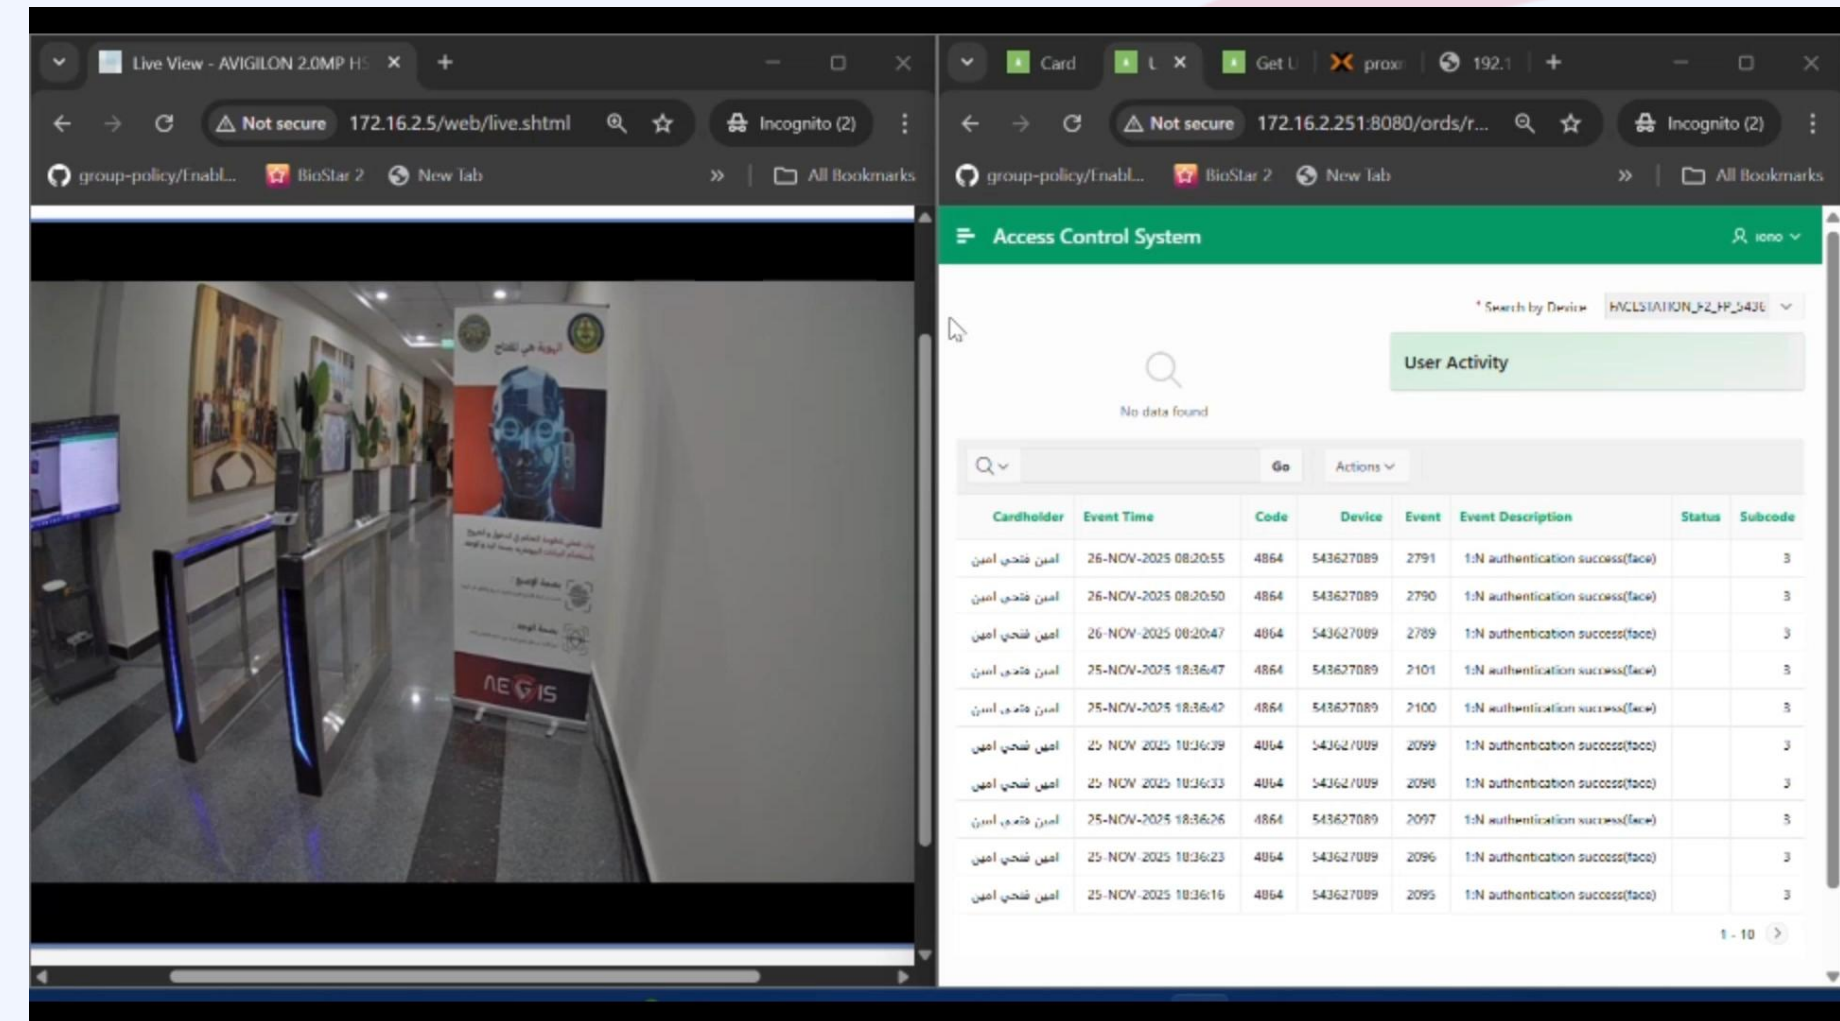

PCB Design & Build

Military College – Success Story

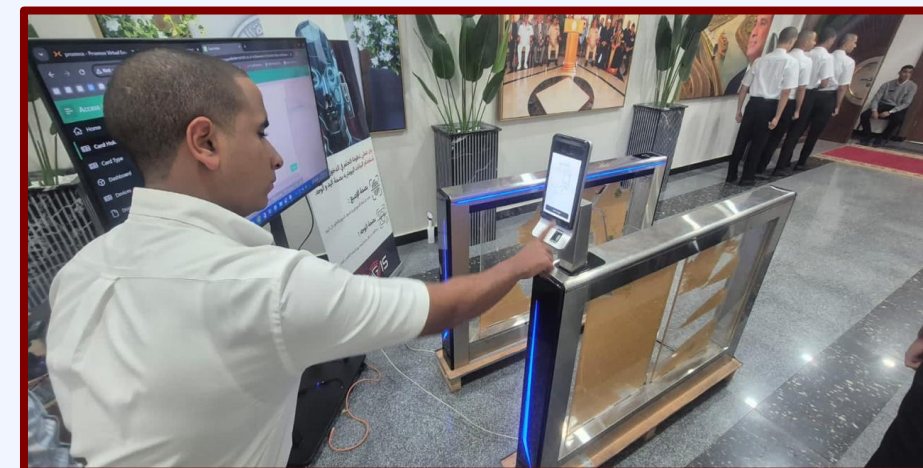

Strategic Management of Biometric Identity for the Military Academy

Implementation of a scalable biometric platform for 10,000 military officers and cadets, compliant with the standards of the Egyptian Personal Data Protection Law and the International Civil Aviation Organization (ICAO).

The screenshot displays the Access Control System interface. On the left, a live video feed shows a hallway with a biometric scanner. On the right, the 'Access Control System' dashboard is visible, featuring a search bar and a table of user activity.
