For the life of your dairy

BouMatic Composite SHELL

BouMatic Composite SHELL

BouMatic takes our gently, fast and complete philosophy seriously. This lightweight shell offers a new component that significantly improves comfort for the cow and the milker.

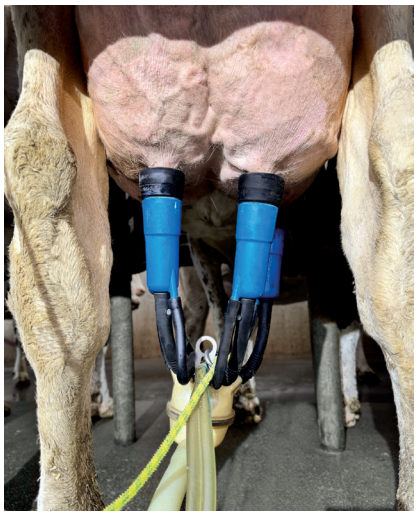

The BouMatic Composite Shell is modelled after our stainless-steel shell that has been loved by generations.

Cow comfort - Composite plastic material reduces strain upon the animal and keeps her comfortable.

Lightweight - Weighing at only 81g, it greatly reduces strain on the operator during long shifts vs. the stainless-steel shell weight of 184g.

Anti-Twist - The knurled rim of the shell helps to keep the liner from twisting; ensuring proper performance throughout its recommended lifespan.

Universal - This shell will work on any BouMatic Magnum or Turbo Liner.
