# GT2™

BouMatic®
For the life of your dairy

## EFFICIENT & CONFIGURABLE

## PARABONE MILKING SYSTEM

# GT2

## EFFICIENT & CONFIGURABLE PARABONE PARLOUR

*The GT2 combines the best of herringbone and parallel stalls in an affordable parlour solution. Compact 76 cm stall spacing with front exit makes this stall design ideal for installing into narrow buildings.*

*Parallel-style udder access provides efficient milking from the rear.*

## Modern 60° stall system

- **Rugged design –** Robust two-inch pipe construction for a solid, longlasting milking parlour.
- **Bolt-together construction –** Provides quick, economical installation.
- **Feature-rich & configurable –** Many popular option packages such as sinus curbing for best operator comfort and ultimate udder access. Configurable in order to meet your needs and your budget. Available with stationary or indexing brisket rails with feed troughs on front rail.
- **Compact footprint –** This stall system can be installed in many existing buildings.
- **Productivity –** The open exit design allows for excellent cow traffic and throughput.
- **Cow-friendly contour rump panels**
- **Optional DualFlo Swing-Over System -** Ideal for DualFlo Swing-Over installations.
