FEEDING

AUTOMATED FEEDING

BUTTLER GOLD PRO - FEED PUSHER

1

The Butler Gold Pro pushes the feed gently onto the feed trough, without applying pressure. Thanks to its special patented auger, the freshness and quality of the feed is maintained and it motivates the animals to eat the feed.

ADVANTAGES

- *Up to 70% time saving.*
- *Low energy consumption without emissions.*
- *Better cow behaviour.*
- *Increased milk production.*

SHUTTLE ECO – FEEDING ROBOT

The Shuttle Eco is an autonomous, easy-to-manage feeding robot. It supplies your animals with precisely measured quantities of fresh feed around the clock 365 days a year. Accurate feeding is the most important factor in looking after your livestock. Higher feed consumption leads to higher yield and profits.

ADVANTAGES

- *Feed available 24/7, to each group of animals.*
- *Clean kitchen and fresh feed.*
- *Optimized feeding efficiency.*
- *Perfectly mixed and chopped.*

AUTOMATIC BEDDING.

FLYPIT – BEDDING ROBOT

4

The FlyPit is a robot that automatically distributes different types of bedding into your barn (cubicles or straw area). Regular bedding provides a dry area to lie and improves hygiene in the pens. The health of the animals can be improved by customising the requirements for every animal in each pen. The only work required is to fill the port with round or square bales, which are then automatically chopped using a patented chopping system and straw screen.

ADVANTAGES

- *Save on straw.*
- *Efficient distribution.*
- *Reduce dust level.*
- *Time saving.*

MILKING

GEMINI UP

The BouMatic Gemini UP milking robot takes your dairy farming to the next level of performance: focus on best milking practices, cow comfort and reduced energy consumption. The Gemini UP milking robot can be supplied as a single or double box. It adapts and evolves with the size of your herd.

2

ADVANTAGES

- *Milking from behind.*
- *Open view for a happier and more social cow.*
- *Optimized teat attachment, even on the most complicated udders.*
- *Flexible and intelligent selection.*

MANURE HANDLING

BVS

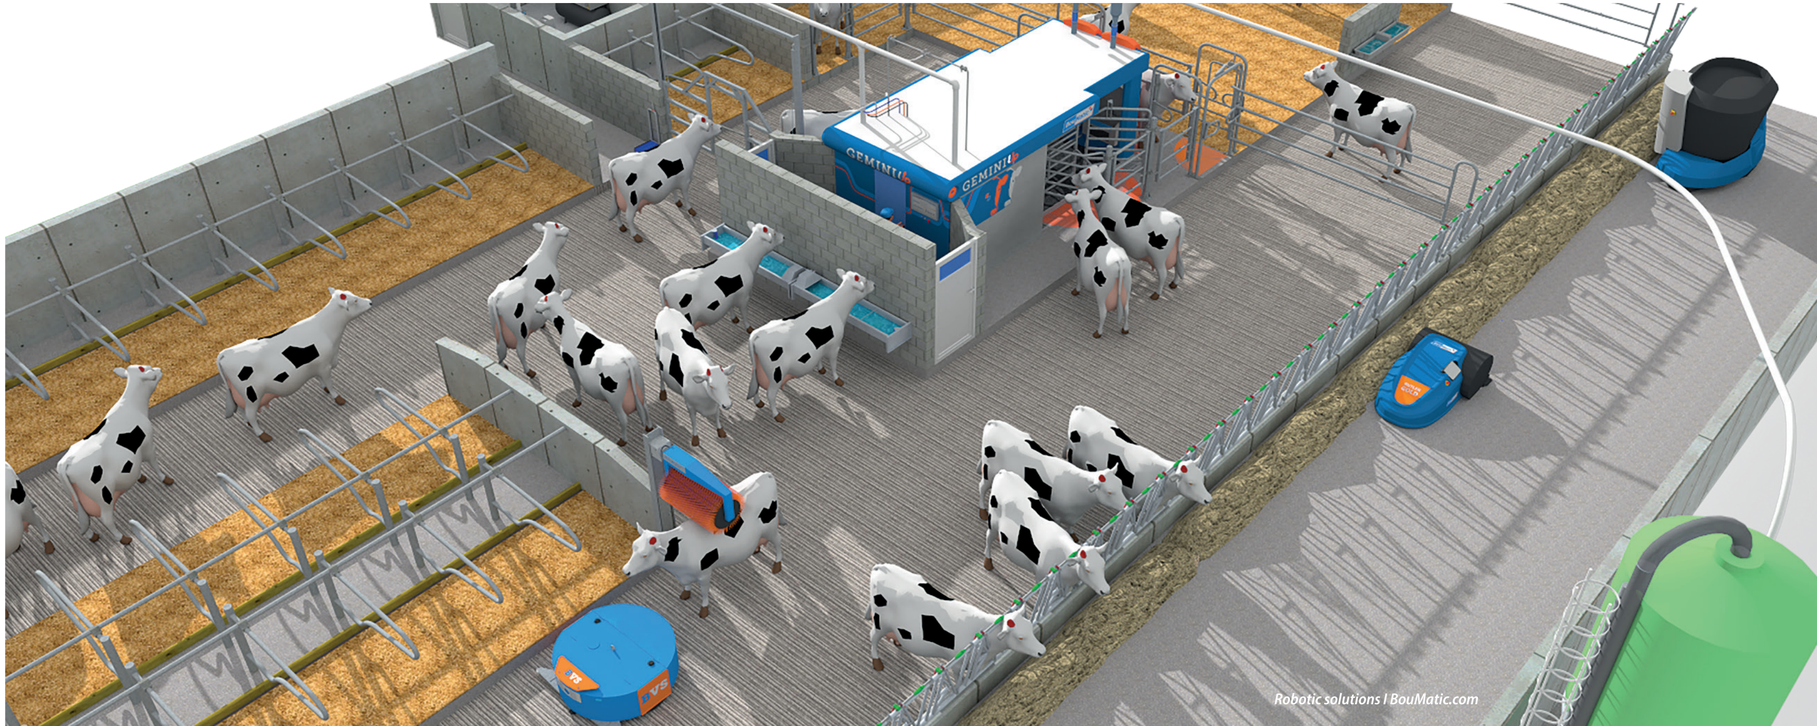

The BVS vacuum cleaner robot from BouMatic is an innovative solution for slurry collection. This automated system can clean solid, as well as slatted floors regularly, ensuring a healthy environment for your herd. This will ultimately improve claw and udder health leading to increased yields.

3

ADVANTAGES

- *Time saving and higher efficiency.*
- *"Plug and play" installation, remote control.*
- *Built to last, energy efficient.*
- *Improved cow welfare, higher milk quality.*

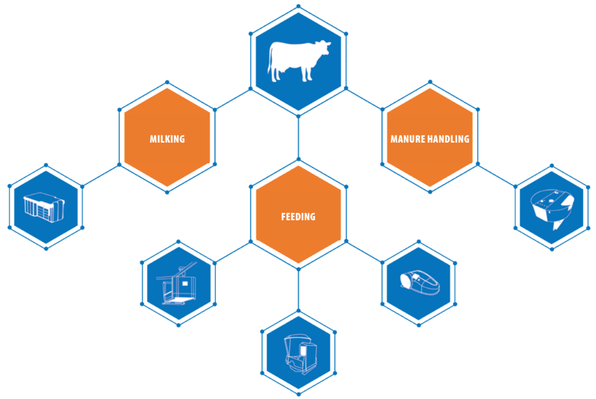

AUTOMATE WITH PRECISION, MANAGE WITH EXPERTISE.

Do you want to **enhance** the **efficiency and productivity** of your dairy farm while tackling the ecological and economic challenges head-on? BouMatic is here to support you in achieving your goals. Milking robotization has seen significant advancements in recent years and has become a standard practice. **Milking robots provide you with greater flexibility and enhance the comfort of your cows.** Even artificial intelligence is stepping into the scene; for instance, the Gemini Up robot utilizes it to optimize teat attachment, even on the most complex ones.

However the benefits of robotization extend beyond just milking! **Physical, repetitive tasks that demand precision can now be taken care of by robots.** Feed pushers, automated feeders, manure handling robots and bedding robots offer you as a dairy farmer labour saving.

This automation is vital in addressing the growing **challenge of labour shortages**. Skilled labor is crucial, as any lack of precision can significantly impact milk production. With **robots,** you can **efficiently manage various tasks** while **ensuring accurate daily operations** and i**mproving your business results.**

OUR PHYLOSOPHY

From our modest beginnings, we have always stayed true to the core values of our founders.

Today, as an industry leader, those values have become our guiding principles.

- Animal health
- Engagement in scientific research
- Profitability
