#### LEGO AT SEA

4.1.	
------	--

On 13 February 1997, a Japanese ship, the Tokyo Express, was hit by a huge wave. The ship did not sink but the wave was so strong that the ship moved 60 degrees forward and then 40 degrees back the other way. As a result, 62 steel containers fell overboard. One of these containers was full of Lego blocks.

4.2.	
------	--

No-one knows how the blocks got out of the steel container, but shortly after the incident they began appearing on beaches in Cornwall. There are stories of kids in the 1990s finding blocks in many different shapes. They built whole sets out of them. The biggest one was the sea collection made of octopuses, fish, divers, sea dragons and pirates.

4.3.	
------	--

Oceanographers have calculated that over so many years the blocks have had enough time to circle the globe and can wash up on any beach in the world. Researchers have been trying to track the lost Lego blocks, but it is still a mystery where most of the pieces are. Experts can't explain why the Lego pieces from the Tokyo Express have been reported only in Cornwall.

4.4.	
------	--

Scientists have known for years that litter and plastic pieces can keep going around the seas for centuries and are a great risk to wildlife, which might take it for food. So the blocks, which were produced to give kids fun, have now become a threat to many sea creatures.

##### **MY CHAMPION**

My heart started beating faster in my chest when I saw this elegant animal that I knew was going to be mine. I played it cool but my daughter kept dancing around saying “wow”. I calmly watched the horse, in the middle of the yard, amazed to find such a beautiful creature in this faraway place. I asked the usual questions about his temperament and health, then asked to see his papers, as the owner had assured me the horse was registered. It really was. Then I led him calmly around, touching him, and evaluating his disposition. I was delighted. I realized that with some training, it was going to be one of my best racehorses.

#### **5.1. The text is about**

- A. training a horse for a race.
- B. finding the right horse.
- C. saving a horse from a bad owner.

#### **Tekst 2.**

##### **BROWN PANTHER**

Michael Owen, the famous English ex-football player, did not go with his nation’s team to support them in the World Cup 2014 in Brazil. Instead, he went to Ascot, England, where his best racehorse, Brown Panther, was to take part in one of the most famous horse races, the Gold Cup. Although Brown Panther wasn’t a favourite to win, everyone knew the horse could get a good result. It had come first in three other races before Ascot.

After Royal Ascot Michael said, “Brown Panther always tries his best. He’s got the heart of a lion and obviously he’s run a brilliant race. To be fourth in a race like this is a great result. I’m more than pleased.”

*adapted from <http://michaelowenonline.co.uk>; <http://www.theguardian.com>*

#### **5.2. Which is TRUE about Brown Panther?**

- A. It was expected to win the Ascot race.
- B. It had never won any race before running in Ascot.
- C. It made its owner proud in the Ascot race.

#### **Tekst 3.**

##### **DO YOU KNOW...?**

Horse riding is more about balance than holding the animal tightly. Your muscles must be active, but not tense. Pressing the horse’s sides too much may be misunderstood by your horse as encouragement to move forward. All in all, such a style of riding can make your horse behave in a way you have not intended.

Sitting on horseback, also try to avoid sudden movements and be focused and relaxed at the same time. In this way your horse will understand better what you want it to do.

*adapted from <http://horses.about.com>*

#### **5.3. The author of the text**

- A. gives advice to readers on how to control a horse.
- B. encourages readers to take up horse riding.
- C. describes the first horse riding class he had.

#### SKILCRAFT PEN

If you have worked for an American government institution, most probably you have seen a Skilcraft pen. It has the following inscription on it: *Skilcraft U.S. Government*. Its design is elegant, it's most often black, and it's difficult to break. It's commonly used by soldiers because it fits inside a U.S. military uniform sleeve pocket. It is a kind of Coca-Cola of pens – everyone recognizes it.

About five million dollars' worth of these pens are sold every year, and they have quite a story behind them. To begin with, they are produced by the blind. In 1938, after the Great Depression, the government decided to support blind workers financially by creating jobs for them. President Roosevelt signed a new law which said that the federal government had to buy specific goods produced by blind Americans.

The *Skilcraft* brand was created in 1952. Today the company employs over 5,500 blind workers in many American states and produces a lot of different office supplies. The pens are made in factories in West Allis, Wisconsin and Greensboro, North Carolina. The factory in North Carolina is called *Greensboro Industries for the Blind* and it has had the ballpoint pen contract with the U.S. government since 1970. It employs 160 workers and ninety percent of them are blind. Thirty-five to forty people make the pens.

The production building and machines are like in any other factory, but a closer look shows the differences connected with employing blind workers. The floors are not slippery, they are covered with a material that prevents falls. All signs have Braille letters and walkways are always kept free of machinery or other objects. The blind workers don't use any special cards to get into the factory. When they come to work in the morning, they just touch large screens to check in. And their guide dogs can walk freely in a special area behind the factory building.

The details of the pens produced in the factory are described in a long document that was first written more than 50 years ago. The pens must be able to write in temperatures up to 160 degrees and down to 40 degrees below zero. You can use them in the rain and even after they go through the wash. It's a tried and tested product. It has stood the test of time.
