- 2017** - **Researcher** (2017) Strategic development plan for Upper Northern Thailand Province Cluster 2, 20-year period (2017-2036).

SUMMARY OF EXPERTISE

I am an experienced researcher and academic professional with expertise in applied economics, social policy research, and regional development studies. I hold advanced degrees in Education and Business Administration, which enable me to bring interdisciplinary perspectives to my research endeavors. My research portfolio spans over a decade, encompassing diverse areas including criminal economics, environmental policy, labor economics, and industrial development planning. I have contributed significantly to policy-oriented research projects focusing on traffic law enforcement efficiency, sustainable waste management systems, and regional strategic planning for Northern Thailand. My specialized knowledge extends to informal labor markets, market dominance analysis, and agricultural trade policy barriers. I have demonstrated expertise in empirical research methodologies, particularly in analyzing socio-economic relationships such as income inequality and crime correlation, as well as environmental economics including CO₂ emissions determinants. My research contributions have been recognized through publications in national academic conferences and through my active participation in government-sponsored policy research initiatives. I possess extensive experience in collaborative research environments, having served in various capacities from research assistant to principal investigator across multiple high-impact projects that directly inform public policy and regional development strategies.
