## SUMMARY OF EXPERTISE

I am an experienced research assistant and community engagement specialist with a Bachelor's degree in Economics from Payap University. My expertise lies in economic research, data collection and analysis, and community participation facilitation across diverse sectors including transportation infrastructure, agricultural development, and labor economics. Over the past decade, I have contributed to numerous significant research projects focusing on sustainable tourism development, agricultural innovation adoption, road safety assessment, and labor market analysis in Northern Thailand. My specialized knowledge encompasses public consultation processes, environmental impact assessment support, and regional economic development planning, particularly in border provinces and highland agricultural areas. I have extensive experience working with government agencies including the Department of Rural Roads, Royal Thai Police, and various ministries on policy-oriented research initiatives. My practical skills include field data collection, stakeholder engagement, community outreach, and economic analysis of transportation projects, waste management systems, and industrial development strategies. I possess strong capabilities in facilitating public hearings and community participation processes for infrastructure development projects. My research contributions span informal labor market studies, supply chain modeling, and regional development analysis, demonstrating my commitment to evidence-based policy development and sustainable community development in Thailand.
