Software Engineer | Frontend Developer | Backend Developer | MERN Stack Developer | Full Stack Developer
+923167459279 | mehfooz.salik@gmail.com | linkedin.com/in/mehfooz-salik | mehfooz.netlify.app

Innovative and results-driven software engineer with 4+ years of expertise in front-end development, specializing in React and Next.js. Skilled in crafting intuitive, high-performance user interfaces and solving complex problems with a creative, analytical approach. Passionate about driving impactful solutions and collaborating with dynamic teams to shape the future of technology. Eager to contribute my expertise to a forward-thinking organization that values innovation and excellence.

Experience

Software Engineer (React)

Tipping Points Pvt Ltd

Sep 2022 – Present

- Developed and implemented an NPM module for core functionalities, standardizing methods across web and mobile platforms to improve code reusability and reduce development time.
- Transitioned the application from Ionic to React Native, leveraging Redux, Redux Toolkit, and Firebase to enhance scalability and performance.
- Established Maestro for end-to-end testing, ensuring reliability in mobile app functionalities.
- Spearheaded the Next.js front-end development for a unified profile view, reducing redundant efforts for future features.
- Contributed to a reusable design system with standardized MUI and TailwindCSS components, ensuring consistency across the platform.
- Enhanced the user experience of a legacy booking form by adding new features using React and GraphQL.

Front-End Developer (React)

Bitcredit Protocol

April 2023 – Oct 2024

- Led the development of a React Native mobile app, integrating RevenueCat for subscriptions and focusing on UI/UX design with Bootstrap and MUI.
- Streamlined user onboarding by optimizing data handling and workflows, enhancing the overall experience.
- Set up CI/CD pipelines using AppCenter, ensuring efficient deployment for Android and iOS platforms.
- Collaborated with international stakeholders to align product requirements and business objectives, facilitating a successful app launch.
- Conducted technical interviews to onboard skilled developers, contributing to the team's growth.

UI/UX Developer

Imtiaz Super Market

Sep 2021 – Sep 2022

- Designed and developed interactive, responsive user interfaces using React and Next.js, optimizing SEO and performance with server-side rendering.
- Translated design mockups into functional, user-friendly web interfaces while collaborating with cross-functional teams using Figma and JIRA.
- Improved navigation and user engagement through Redux for state management and TailwindCSS for responsive layouts.

UI/UX Designer & Developer

SoftZone

Jan 2021 – Sep 2021

- Designed and implemented web application interfaces using React, improving responsiveness and user interactivity.
- Integrated APIs and developed functionality using Node.js and ExpressJS, ensuring seamless backend connectivity.
- Collaborated with teams to transform Figma prototypes into production-ready designs with a focus on usability and performance.

Education

Software Engineering, Mirpur University of Science and Technology
Bachelor of Science in Software Engineering

Mirpur AK, Pakistan
