Roberto Dellantonio

Fullstack Developer

👤 Profile

Recent graduate in Information Engineering and Business Organization. My greatest passion is **programming and web development,** and for this reason I have always kept myself informed and trained on different development languages and frameworks. I have carried out several projects in this sector, and I hope to be able to gain as much experience as possible by learning from **professionals and experts**. I am available to demonstrate my knowledge and skills if necessary. Furthermore, I can work in a team and relate well within a business context. Always ready to help and to let me help to solve complex problems. I always try to find **simple and replicable solutions** to all the problems that arise. Ready to use skills and passion to promote the corporate mission.

🎯 Goals

I would like to deepen my knowledge and pursue a career in the world of web development, a sector in which I am passionate thanks to the experiences both in the workplace and in my studies.

💼 Work Experience

Fullstack Software Developer at Fleap s.p.a.
Since April 2023

- I work as a FullStack developer at Fleap spa, a startup that digitalizes the corporate structure using blockchain.
- Design, development, testing and maintenance of complex features.
- Using Spring boot, React, MariaDB, NextJs and integrations with Hyperledger.

Fullstack Software Developer at GPI s.p.a
January 2021 - April 2023

- Development and testing of the java backend part of the software produced by the company.
- Development and testing of the frontend part of the application using Angular
- Development and testing of complex sql queries for data management.
- Using Spring on Eclipse, Oracle sql, Fork Dev for versioning, VsCode for Angular and JasperSoft for report printing.

🎓 Education and Internships

Digital Marketing at Comercial Eventos y Productos S.L., Barcellona
october 2019 - december 2019

I spent three months in Barcelona in Spain for an internship contract in an e-commerce company carrying out various web-marketing activities.

Bachelor's degree in Information Engineering and Business Organization, University of Trento
september 2016 - september 2020

I graduated with a score of 94/110 on 21 September 2020 at the University of Trento.

Details

Bachelor Degree in Information Engineering and Business Organization
Trento - 2016 / 2020

Hobbies
Running, Mountain bike, Gym, Snowboard

Languages
Italian
English

📁 Projects

https://www.my-portfolio.it/users/roberto-dellantonio/diary/projects

- I worked on a **java** based web application to manage shopping lists. I created the application for an academic purpose. For the project I used GIT, Sql, linux, java, netbeans, html, css and javascript with the JQuery library.
- I created a first version of an **e-commerce site in java** with the same characteristics of the project described above.
- For the same site I created an exact copy using **wordpress** and **woocommerce**. The site is online at: https://www.macelleriadellantonio.it
- I am developing a web application based on **ReactJs** and **Spring-boot** for the creation of training personnel and for the orientation of staff and trainees in companies. (https://github.com/Rob097/myForment.git)
- I've just started developing a personal portfolio in Angular which is hosted in firebase. It's possible to watch this project at: https://myportfolio-6a771.web.app/ or you can explore my git repository at: https://github.com/Rob097/portfolio

📁 Skills

As a full stack developer, my skills differ in many ways. Programming languages, frameworks and tools, devOps, social skills.
The following are the ones I'm most familiar with:

Back End
1. **Java >= 8**
2. **Spring - Spring boot - Spring security (JWT)**
3. **Microservices architecture**
4. Hibernate
5. Multi tenant design
6. Redis L2 cache system

Front End
1. **Html 5 / CSS3 / Javascript**
2. **Angular**
3. **React**
4. Bootstrap / Angular Material
5. Module federation (Microfronted)

Data
1. **MySql**
2. **Oracle**
3. **PlSql**
4. **MongDB**

DevOps & Tools
1. **Docker**
2. **Kubernetes**
3. **Git / Gitlab / Github**
4. **Eclipse**
5. Intellij
6. Atlassian Jira
7. Heroku
8. Firebase
9. VS Studio Code
10. Fork

Social
1. Team players
2. Punctual with deadlines
3. Focused on customer needs
4. Problem solving
