Work History

May 2023 - Dec 2023

Tech Lead

IQGateway Pvt Ltd

Project title: Machine Learning

As a dedicated Tech Lead specializing in ReactJS, I played a crucial role in leading a focused team through the development of a sophisticated machine learning project. I guided the frontend development process from inception to completion, ensuring seamless integration of ReactJS technologies. Collaborating closely with cross-functional teams, including machine learning engineers and UX designers, I translated complex technical requirements into elegant and intuitive user interfaces. With meticulous attention and strategic decisions, I led the project, overcoming challenges and optimizing performance.

Aug 2021 - Apr 2023

● **Team Lead Frontend**

Cloudtrade Technologies Pvt Ltd (client company of Tradelab Technologies Pvt Ltd)

Project title: Trading website

Project description: Guide a team of frontend developers responsible for developing and maintaining web frontend code for trading application. Ensure that correct content, product assortments and UI functionality is developed, tested, scheduled and validated before it is deployed in a live environment.

Oct 2020 - Jul 2021

● **Senior frontend Developer**

Tradelab Technologies Pvt Ltd

Project title: Trading website

Project description: Develop and maintaining website using Reactjs, strictly following the structure of the project. Planning and design flow for new features. Deploy build in live and staging server after development task is done. Leading my team to accomplish in time delivery of new features.

Most challenging part in this work period is implementing a chart feature for showing stock value.

Jan 2018 - Oct 2020

● **Frontend Developer**

Mind Inventory

Project title: Photo editing and shopping (zoomin.com)

Project description: Develop and design website with ReactJS. This is a website with a target user of 1Million all over the world. Created UI for image editing. The whole website is created with reusability of components. Advanced ReactJS coding structure is used in this project. This website is fully scalable for feature updates.

The most challenging work in this website is creating Single component for editing all varieties of image products under a single editor.

Project title: Social network

Project description: Design and develop a fully functional website in ReactJS. Created layout with bootstrap. Maintained standard coding. Implemented all features that a complete social network must have. This website is basically for news content type. Where users from all over the world can access the content.

The most challenging part of this website is it supports Arabic Language. Where the layout must be right to left, not like the English language left to right.

Project title: Educational App

Project description: This app is for both Android and IOS using IONIC, with the functionality that students are finding their study material very easily. I used very few third party frameworks to achieve all the functionality and meet the entire client requirement.

Project title: Health Organization

Project description: This is a Wordpress website. Worked with full stack developers and helped them in designing and responsive websites for desktop tablet and mobile.
