

A Look at Diabetes in Georgia

Symptoms include frequent urination, excessive hunger, extreme thirst, blurred vision, fatigue and nausea.

Bridging the gap with virtual care

Diabetes can lead to **complications**

A 2017 Emory University study found that hospitalizations due to diabetes have climbed significantly in Georgia. Highest rates occur in rural areas, where access to care is limited.

Lack of access to care can lead to major diabetes complications.

Onduo:
a virtual diabetes clinic
that's made for you.

Get personalized support
wherever you are, whenever
you need it.

KNOW — Use monitoring tools to record sugar levels at home and on-the-go.

ACCESS — Get advice from coaches, diabetes educators and doctors on how to stay in range.

CHOOSE — Make better choices based on what you see in the app and what you learn from your support team.
