

## Research Scientist, Immunology

**Location:** Barcelona, Spain (Parc Científic de Barcelona, PCB)

### Position Summary

Orikine Bio is seeking a highly motivated **Research Scientist in Immunology** to join our R&D team focused on developing engineered cytokines for the treatment of human diseases.

This role requires hands-on, resourcefulness, scientific rigor, and adaptability within a fast-paced, entrepreneurial biotech environment. The successful candidate will contribute to the execution of research projects, including novel assay development and in vitro proof-of-concept studies, while supporting the advancement of our cytokine engineering platform.

We are looking for an enthusiastic individual who thrives in dynamic, high-growth settings and is eager to directly contribute to cutting-edge immunology research.

### Key Responsibilities

- Apply immunological laboratory techniques to support research and development projects.
- Perform experiments with precision and attention to detail, maintaining accurate and thorough records.
- Generate, analyze, and present experimental data to supervisors and team members.
- Contribute intellectually and technically to project discussions and scientific strategy.
- Support assay development and in vitro experimental workflows.
- Perform additional duties as required to support overall immunology team and company objectives.

### Skills & Competencies

- Strong hands-on laboratory experience, particularly in:
  - Assay development
  - Work with primary cells and cell lines
  - ELISA
  - Flow cytometry
  - Immune cell phenotyping
  - Target validation and protein analytics
- Highly adaptable and responsive to evolving technical priorities.

- Ability to work autonomously and collaboratively in a fast-paced start-up environment.
- Strong organizational skills and exceptional attention to detail.
- Excellent written and verbal communication skills in English.
- Confident, execution-focused, and team-oriented.
- Execution-focused, proactive, and comfortable operating in a start-up environment.

## Education & Experience

- PhD in Molecular Biology, Biotechnology, Biochemistry, Immunology, or a related discipline, with official EU homologation.
- 4+ years of relevant laboratory experience.
- Experience in drug discovery and/or pharmaceutical or biotechnology environments is desirable but not required.

## Why joining Orikine Bio

Orikine Bio is a privately held, early-stage biotech company at the forefront of cytokine-based therapeutic innovation. As a core team member, your work will directly shape and advance our scientific programs, contributing to meaningful breakthroughs in immunotherapy. We offer a collaborative, flexible, and mission-driven culture that values scientific excellence, ownership, and innovation.
