

User Based Comparison Report

Using our Panorama Assessment Tool (PAT), you can easily add employees and invite them to take assessments. After completion, you can compare individual reports, identifying variations in each employee's perception and understanding of the company's purpose and operations. Our platform visualizes these comparisons in clear, intuitive graphs, allowing you to identify areas of misalignment and promote better team alignment and collaboration.

Time Based Comparison Report

Monitor your team's progress over time with PAT's time-based comparison feature. Employees can take assessments monthly, and their reports are compiled and visualized in detailed graphs. This allows you to monitor changes and trends in your team's performance and understanding, offering valuable insights to guide strategic decisions and drive continuous improvement.
