Database: PostgreSQL | MySQL | MongoDB (NoSQL)

Tools: Git | Github | Figma | Notion

EDUCATION

NNAMDI AZIKIWE UNIVERSITY	BA ECONOMICS	2022(Graduated)

WORK EXPERIENCE

AFFIONG MEDIA — FullStack Developer — Contractual

Affiong Media specializes in Social Media Management but helps out their clients in need of specialized technical services such as customized Wordpress/Wix Integrations with external services (Payments, Zapier etc), website or mobile development.

- Designed and prototyped mobile application concepts in collaboration with product managers.
- Redesigned poorly performing mobile applications, significantly improving usability.
- Built and tested new application features and assets.

RAD5 TECH HUB — Fullstack Developer (Intern) — 2022 - 2024

RAD5 Tech Hub is a venture studio and tech innovation hub based in Aba, Abia State. Their mission includes reducing startup failures and lowering talent migration by providing access to the right resources, mentorship, community and infrastructure for early stage entrepreneurs.

LINDASALESPRO: LindaSalesPro is a mobile CRM platform geared toward businesses and sales teams, helping them organize leads (from ads/campaigns), follow up via phone/SMS/WhatsApp/email, and automate lead-nurturing to turn leads into customers.

- Implemented an "autopilot" follow-up/automation feature for leads so recurring or scheduled follow-ups are handled automatically.
- Ensured CRM is mobile friendly (or mobile-first), optimizing UI/UX for salespeople on the go.
- Improved data reliability and sync, maybe managed offline fallback or latency, so leads aren't lost and responses are timely.

CHOOYA: Chooya is a tech startup that digitizes word-of-mouth marketing and acts as a search engine for African traditional/local markets to help businesses gain new customers affordably

- Built and maintained front-end UIs (React, Next.js etc.) to allow businesses to list their offerings and manage "advocate" referrals.
- Improved data reliability and sync, maybe managed offline fallback or latency, so leads aren't lost and responses are timely.

PROJECTS

FAMILEEY — Full-Stack Web Engineer — 2025

Developed a social platform for family connection, story sharing, and media engagement.

- Developed Famileey backend API in TypeScript with Express running on Bun.
- Integrated Firebase Auth and Realtime Database with middleware for token verification and secure endpoints.
- Implemented messaging, posts, families, and notifications with Expo push integration, request validation, and Winston logging.

PHOTOGRAM — Full-Stack Web Engineer — 2025

An app where photos are uploaded which triggers a cloud function to strip of photos EXIF/metadata

- Developed a cross-platform image-sharing app using Expo React Native and Firebase, enabling seamless photo uploads and viewing on iOS and Android.
- Implemented Python Cloud Functions with Pillow to automatically strip EXIF metadata, ensuring user privacy and secure image handling.

HONORS & AWARDS

- **Leadership Award**: Issued by the Faculty Of Agriculture, Nnamdi Azikiwe Unizik
