

Manuel Facundo Fernandez

Junior Front-end developer

Bariloche - Argentina, 26 yo

ABOUT ME

Front-end web developer with over a year of robust experience in independent and collaborative projects.

TECHNICAL KNOWLEDGE

Programming languages: Javascript & Typescript.

Frameworks: NextJS.

Web Design: TailwindCSS, MaterialUI, Bootstrap.

Libraries: Redux, NextAuth, React Router, Formik.

Additional: ESLint, Git, Gitflow, SASS.

PROJECTS EXPERIENCE

Union Solidaria - NextJS, NestJS, TypeScript, MongoDB

Co-creator of the project. The interface was developed using NextJS and TailwindCSS, incorporating additional libraries such as NextAuth, SWR, and react-hook-form. On the backend, NestJS and MongoDB with Mongoose were implemented, both parts written in TypeScript to ensure robust code. The project's goal is to connect individuals with charitable organizations. Users with the 'Organization' role can define initiatives, to which 'Volunteers' have the option to register. Additionally, I contributed to configuring the workflow and defining project standards in the repository.

Realtime chat - NextJS, TypeScript, TailwindCSS

I developed a real-time chat platform that provides users the ability to send and receive instant messages, manage their friends list, and receive real-time notifications of relevant events. This application was built using NextJS with Typescript and Tailwind CSS. Database management was handled through the Upstash client, implementing Redis. Real-time functionality was achieved through the integration of the Pusher API.

Medicine logger at NoCountry - NextJS, Laravel, TypeScript, TailwindCSS

Frontend developer in an interdisciplinary team of 8 members. We worked on a web application that allows users to create treatment lists and receive medication reminders for proper tracking. NextJS with TypeScript and Tailwind were used on the frontend, while Laravel with PostgreSQL was used at the backend. In addition to my role, I also contributed to configuring the workflow in the repository and defining standards for the project's structure.

WORK EXPERIENCE

Cashier & HR Collaborator at Teleférico Cerro Otto - JANUARY 2022 - DECEMBER 2022

I organized groups of passengers in coordination with several drivers of the company and other sales points. Great teamwork and communication were essential in meeting high demands and achieving peak season goals. Also participated alongside my supervisor in the personnel selection process, successfully filtering candidates aligned with the values and goals of the company and optimizing the time invested in the selection process.

Manager at Merchandising Teleférico - JANUARY 2016 - DECEMBER 2018

I handled procurements from over 15 suppliers to keep up with the high product demand during peak season maximizing profits. Also organized schedules and tasks for temporary staff. This experience honed my skills in communication, teamwork, and task planning.

EDUCATION

Back-end developer - *EDTeam*

Currently studying

React front-end developer - *Coderhouse*

July 2022 - December 2022 (6 months)

Bachelor of Mathematics - *CRUB Universidad del Comahue*

March 2018 - present (3 of 5 years completed)
