## SUMMARY

---

Software Engineer with 2+ years of experience in Frontend Development and passionate in Full Stack Development. Proficient in React, Typescript and experienced in Agile Software Development and demonstrated ability to deliver high-quality, scalable software solutions that meet both user and business needs.

## EDUCATION

---

**Bachelor Of Engineering in Information Technology (9.09 CGPA)** 2018 - 2022  
Savitribai Phule Pune University

**Higher Secondary Education in Science (80.15%)** 2016 - 2018  
Maharashtra Board

## WORK EXPERIENCE

---

**Software Engineer** Dec 2022 - Present  
*Accenture Solutions Pvt. Ltd.* *Pune, Maharashtra*

- **CMS Website for Major German Supermarket Chain**

- Built a custom UI Component library from scratch using React, Sass, and Storybook, ensuring consistency across the client's digital ecosystem. This library provided reusable and modular components, enhancing development efficiency and maintaining a cohesive brand experience.
- Collaborated in the development of a high-performance CMS website using Next.js and React, custom UI library, integrating Algolia Search for advanced search capabilities and Uberall API for precise store location services. Magnolia CMS was implemented as the backend to streamline content management and improve scalability.
- Performed deployments for various environments along with pipeline debugging for vulnerabilities and SonarQube issues.
- Established and maintained 90% unit test case coverage using Jest and React Testing Library.

- **Freight Logistics B2B Application for one of Australia's Largest Rail Freight Businesses**

- Developed a custom UI Component library using Material UI and React, providing reusable components to ensure design consistency and efficiency across the application.
- Contributed to the development of a web application that allowed customers to manage freight bookings for containers and trips, along with comprehensive reporting and user management features.
- Leveraged Next.js, Turborepo, Material UI, Redux Toolkit, and Content Stack for content management while integrating microservices provided by the client.
- Established and maintained 90% unit test case coverage using Jest and React Testing Library.
- Executed deployments across multiple environments and debugged pipelines to resolve vulnerabilities and SonarQube issues.

**Cybersecurity Intern** Sept 2021 - Aug 2022  
*Nethur Systems Pvt. Ltd.* *Pune, Maharashtra*

- **VAPT Web Scanner Application**

- Designed and created a Python-based web scanner tool for vulnerability assessment and penetration testing, leveraging Linux CLI tools. Built a MERN stack web application with 90% contribution to the source code of the scanner, enabling users to submit URLs, schedule scans, and view results in a tabular format.

## SKILLS

---

<b>Languages</b>	Javascript, Typescript, Java
<b>Technology Stack</b>	Java + React, MERN
<b>Frontend</b>	HTML5, CSS3, React.js, Next.js, Redux, TailwindCSS Material UI, Microfrontends
<b>Backend</b>	Node.js, Express.js, Springboot, MySQL, Prisma ORM, AWS S3, Amplify
<b>Tools</b>	Postman, JIRA, Confluence, Azure Devops, Git, GitHub, SonarQube
<b>Soft Skills</b>	Problem solving, Self learning, Debugging, Adaptability, Collaborative Development
<b>Areas of Interest</b>	Software Development, Cyber Security

## PROJECTS

---

### *Portfolio*

- Built a portfolio website showcasing my career experience and achievements using Next.js, TailwindCSS, Aceternity UI, Shadcn-UI, Firebase storage and AWS Amplify.

### *Taskman*

- Developed a microservice that enables user to perform CRUD operations on his/her various tasks. Epics include multiple tasks and tasks include multiple subtasks.
- Developed using Springboot, Spring Data JPA and MySQL.

### *Rentbandhu*

- Developed a full stack application that enables users to search properties, host a property and rent a property.
- Developed using Next.js, Shadcn UI, Redux and React Hook Form for frontend and Springboot, Java and MySQL for backend along with AWS S3 bucket integration for user documents.

### *Flow Nodes*

- A web application that enables user to create roadmaps and schemas using drag and drop options.
- Developed as part of trying out React Flow library with Next.js App router, Typescript, Redux Toolkit, TailwindCSS and Shadcn-UI.

### *Movies App*

- Developed a website that provides user with reviews and highlights of a movie. Developed using Next.js App router with TailwindCSS, Shadcn-UI and TMDB API.
- Next.js, Shadcn and TailwindCSS learning based project

## ACHIEVEMENTS AND CERTIFICATIONS

---

- FY'25 Q1 Growth Catalyst ACE Award by Accenture
- Awarded with January 2024 Accenture iChamp Winner for Design & Digital Products category.
- NPTEL Certification in Relational Database Management System.
- MERN Full Stack Development Certification by StackRoute.
