Taimoor
Ghafar

Mobile App Developer

Work Experience (2+ Years)

- **Flutter Developer**   Sep 2022 - Present
  TechNest G-8 Islamabad

- **Junior Flutter Developer**   Mar 2022 - Aug 2022
  TechNest G-8 Islamabad

  - Developed and deployed 5 Android applications from scratch using Flutter and 1 using Jetpack Compose, overall maintaining 10 apps. with a focus on creating intuitive user interfaces and seamless user experiences.
  - Proficiently integrated various APIs, including _Google AdMob_, _Google Maps_, and other third-party services to enhance application functionality and monetization opportunities.
  - Leveraged _Firebase_ services, such as Cloud Firestore, Push Notifications, Storage, and Authentication, to enable real-time data synchronization, secure user authentication, and efficient data storage.
  - Utilized _MVVM_ and _Clean Architecture_ principles to design robust, scalable, and maintainable codebases.
  - Employed _BLoC_ and _Provider_ as state management solutions, facilitating efficient data flow and separation of concerns within applications.
  - Acquired expertise in local databases, employing _Hive_ _Isar_ and _Realm Database_ to enable efficient data persistence and retrieval in offline scenarios.
  - Utilized _Constrained Layout_ techniques in Android to create visually appealing and responsive Native Ads.
  - Demonstrated proficiency in working with B_ackground Services_ in both Flutter and native Android, allowing for efficient execution of tasks while the application is not in the foreground.
  - Personal NodeJS projects including JWT Auth, Handlebars and MongoDB.

Education

- **Bachelor of Computer Science**
  CGPA 3.4
  International Islamic University Islamabad
  Final Project : Augmented Reality based Furniture Ecommerce Store
