## 📁 PROFESSIONAL EXPERIENCE

---

**Full Stack Web Developer Intern, Vips Delhi** [↗](#)

11/2022 – present

- Web Redesign & Development:
  - Revamped the website using React and Firebase, making it more user-friendly.
  - It boosted user engagement by a good 25%.
  - Also, create new websites like podcasts and blogs.
- Domain Management:
  - Handled the registration and renewal of crucial domains, securing a valuable .edu domain.
  - Created and maintenance of more than 10 strategic subdomains.
- Search Optimization & Website Maintenance:
  - Improved our website's search results, bringing in 30% more people from online searches. Regular updates made the site 15% faster and better overall.
- Technical Training & Collaborative Work:
  - Helped the team get better at using new tech by organizing training of 1 months. This made the team more skilled.
  - Worked closely with different teams, using better methods that made projects finish 10% faster.

**Software Developer Engineer Intern, Requestly** [↗](#)

05/2023 – 10/2023

- Management & Redesign of Requestly's main website for an improved user experience.
- App Changes
  - Implemented some updates to Requestly's app.
- Resolved Several Bugs
  - Identified and addressed various bugs to enhance user experience.
- Documentation Website
  - Created and maintained a user-friendly documentation website for product information.

## PROJECTS

---

### **Vips Website**, *College Website* [↗](#)

Revamped the website to make it more **user-friendly** using **React** and **Firestore**, and it got people more interested — engagement went up by a good 25%. I also handled the important stuff like getting a special **.edu domain** and keeping everything organized with more than **10 subdomains**. On top of that, I made sure our site shows up more in online searches, bringing in 30% more visitors.

### **CloudBox**, *Web-based Storage Solution* [↗](#)

Web-based storage solution for all your **images, files, and documents**. Easily keep everything in one place and share them with friends using **expirable links**. Enjoy effortless data management with Cloud Box!

### **Hack-VSIT**, *Hackathon Website* [↗](#)

Developed an interactive **website** for a **hackathon**. The platform provides a user-friendly interface for project submissions and event updates. Designed to enhance the hackathon experience.

### **Vips Rhythm**, *Podcast Website* [↗](#)

Designed and developed the **official podcast website** for our **college**, creating a virtual space where students, faculty, and listeners can explore, engage, and enjoy a variety of podcasts. The website offers a **user-friendly** interface for **easy navigation, showcasing episodes**, special features, and relevant information

### **Portfolio**, *Personal Portfolio* [↗](#)

I made a website to show off my **skills** and **projects**. It's like an **online resume** where you can easily check out what I've done and what I'm good at. Take a look around to see the cool stuff I've worked on!

### **Overlow**, *Blog website* [↗](#)

Built a website where you can create and read blogs easily. Whether you're a writer sharing your thoughts or a reader looking for interesting content, this platform makes it simple and fun. Enjoy a user-friendly experience where you can write and explore blogs hassle-free!
