EXPERIENCE & PROJECTS

Full-Stack Software Engineer | Arcade hotel website

A commercial hotel Website | **Source code**   React | Node.js | Express | MongoDB | Sockets.Io

- Built user authentication and authorization functionality using JWT and bcrypt to ensure secure login and registration.
- Created a RESTful API for handling requests related to booking, food ordering, and ticket buying, and implemented error handling to improve user experience.
- Designed and implemented the front-end using React, styled-components, and Material-UI, ensuring a responsive and user-friendly design.
- Implemented real-time communication between clients using Socket.IO, allowing for seamless chatting between users and hotel staff.

Github

Full-Stack Software Engineer | Eighth Note Music studio Website

Music Studio website ||**Desktop version**   React | GraphQl | Node.js | MongoDB

- Created a GraphQL API to handle requests for booking music sessions and learning music instruments, improving the efficiency and flexibility of the app.
- Designed and developed the front-end using React, styled-components, and Material-UI, ensuring a modern and intuitive user interface.
- Configured and deployed the app to Vercel, optimizing performance and ensuring fast loading times.

Github   Visit website

Front-End Engineer, UI Lead | Nirvana Digital Agency

A digital Marketing agency | **Responsive**   TypeScript | Next.js | tailwindCSS | MongoDB

- Designed and developed the front-end using Next.js, tailwindCSS, and MongoDB, creating a responsive and visually appealing website.
- Developed custom UI components to ensure consistency across the website and improve user experience.
