

Acknowledgments

I would like to express my sincerest appreciation for the individuals and institutions who made it possible for me to get this far.

Firstly, thank you to Mrs. Jennifer Jones, my high school advanced chemistry teacher turned mentor, for encouraging my ideas and facilitating an environment in which I could sufficiently challenge myself for the first time in my life.

Additionally, thank you to Dr. Bradley Jay Hoppens. Dr. Hoppens has his DDS and MS, but more importantly he is the man I call dad. No matter what, Dad was always supportive of my loftiest aspirations, and I aspire to be like him one day.

Finally, I would like to thank Jay Cecrle, Randall Lienemann, and the Nebraska Junior Academy of Sciences for providing the opportunities to present scientific research on a state level, and for all the work they do organizing events.
