Guilherme Ramos

iOS Software Engineering on Zup Innovation
Belo Horizonte, Minas Gerais, Brazil

Summary

I'm a software engineer that is passionate about mobile applications. Experienced in building applications with both Objective-C, Swift and management of the whole process from the planning to publishing of an app. I worked on the creation of some mobile bank applications and a car integrated app. I love bringing life to innovative ideas and create solutions that try to help people in their daily life.

Experience

Zup Innovation
Development Analyst
April 2017 - Present
Belo Horizonte, Minas Gerais, Brazil

ZUP focuses on helping companies handle the entire complexity of systems integration and outsourcing services, supporting large customers from various segments of the economy.

ZUP has the platform and tools to enable digital strategies technically and financially. Its technology was first developed in 2007 and seeks to solve IT challenges.

-

Currently working on a bank company application (app) in Objective-C and Swift (interop). I'm responsible on mantaining and evolving both architecture and the code of the app, as well as creating scripts in ruby to compound the continous integration ecosystem.

Tools and/or languages used: Objective-C, Swift, Ruby (Fastlane);

Stefanini
6 years 1 month
